والعلامات حتى 1 مارس 2016

اكرر اننا لا نحدد مواعيد بل فقط نشجع بعضنا بعضا بقرب مجيء المسيح

وأيضاً أوضح أنه يوجد نبوات لم نراها بعد مثل ابن الهلاك وهرمجدون

ولكن أيضاً علامات كثيرة من التي قال عنها الكتاب انها في الزمان الاخير بدأت تحدث بوضوح

ويجب أن ننتبه اليها. ونذكر بعضنا باننا نحتاج ان نستعد. والاستعداد ليس فقط قبل مجيء

المسيح بل أيضاً قبل الظلمة التي ستسبق مجيؤه ليكون عندنا زيت في مصابيحنا يكفي ان نعبر

هذه الظلمة وتكون مصابيحنا مضيئة وقت مجيؤه. بمعنى نحتاج من الان ان نستعد بقوة بأيمان

عامل وبتنقية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحنا لان الظلمة والضيق اقتربت

جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة لان وقتها تجميع زيت

سيكون صعب جدا بل أستطيع ان أقول من مثل العذارى انه لن يكون هناك زيت الا ما جمعه

سابقا. أفضل ان اقول لنفسي ولكم استعدوا الان لأنه اقترب فنكون مستعدين سواء جاء او نحن ان سلمنا وديعتنا عن أنى لا اقول انه اقترب لكيلا يقال عني كاذب وانشتر اشاعات ولكنه يأتي بسرعة بغته. لا اعتقد اي أحد ندم لانه كان مستعد ومنتظر مجيء المسيح ولم يأتي المسيح في زمنه ولكنه انتقل وهو مستعد ولكن كثيرين جدا ندموا على عدم الاستعداد عندما انتقلوا

المسيح قال بعض العلامات مثل

انجيل لوقا 21

21: 10 ثم قال لهم تقوم امة على امة ومملكة على مملكة

21: 11 وتكون زلازل عظيمة في اماكن ومجاعات واوبئة وتكون مخاوف وعلامات عظيمة من

السماء

21: 25 وتكون علامات في الشمس والقمر والنجوم وعلى الارض كرب امم بحيرة البحر والامواج

تضج

21: 26 والناس يغطى عليهم من خوف وانتظار ما يأتي على المسكونة لان قوات السماوات

تتزعزع

21: 27 وحينئذ يبصرون ابن الانسان اتيا في سحابة بقوة و مجد كثير

سفر اعمال الرسل 2

2: 19 واعطي عجائب في السماء من فوق وآيات على الارض من أسفل دما ونارا وبخار دخان

2: 20 تتحول الشمس الى ظلمة والقمر الى دم قبل ان يجيء يوم الرب العظيم الشهير

2: 21 ويكون كل من يدعو باسم الرب يخلص

لماذا قال المسيح بعض العلامات؟

أولا لكيلا نرتاع

انجيل متى 24

مت 24: 6 وسوف تسمعون بحروب واخبار حروب **لا ترتاعوا** لأنه لا بد ان تكون هذه

كلها ولكن ليس المنتهى بعد

ثانيا لنؤمن

إنجيل يوحنا 14: 29

وَقُلْتُ لَكُمْ الْآنَ قَبْلَ أَنْ يَكُونَ، حَتَّى مَتَى كَأَن تُوْمِنُونَ.

ثالثا لننتبه ونستعد

انجيل لوقا 21

28 وَمَتَى ابْتَدَأَتْ هَذِهِ تَكُونُ، فَأَنْتَصِبُوا وَارْفَعُوا رُؤُوسَكُمْ لِأَنَّ نَجَاتَكُمْ تَقْتَرِبُ.»

Two Record-Breaking Comet Flybys In March 2016

27 FEBRUARY, 2016

March 2016 turns out to be the month of great celestial events. Two comets – comet 252P/LINEAR 12 and Comet P/2016 BA14 (PANSTARRS) – will make record-breaking Earth flybys with the passage of PANSTARRS being the closest known comet flyby of the last 230 hundred years.

Largest fireball since Chelyabinsk falls into the ocean: Nasa reports huge explosion of seven meter space rock over the Atlantic

- Event took place February 6 at 14:00 UTC, 620 miles off Brazil's coast
- Released 13,000 tons of TNT - 40 times less than the Chelyabinsk fireball
- Unlikely anyone saw it, but may have been picked up by military sensors
- Impacts like this happen several times per year, mostly in the ocean
- See the latest NASA updates at www.dailymail.co.uk/nasa

A huge fireball crashed into the Atlantic earlier this month - and went almost unseen.

The event took place on February 6 at 14:00 UTC when a meteor exploded in the air 620 miles (1,000km) off the coast of Brazil.

It released energy equivalent to 13,000 tons of TNT, which is the same as the energy used in the first atomic weapon that leveled Hiroshima in 1945.

This was the largest event of its type since the February 2013 fireball that exploded over Chelyabinsk, Russia, leaving more than 1,600 people injured.

It was one of the most intense explosions in Earth's atmosphere in three years, and yet it took weeks for anyone to talk about it. NASA announced last week that back at the beginning of February, a meteor exploded over the Atlantic Ocean. Turns out, it was one for the record books.

The fireball shot through the sky over the Atlantic Ocean just off the coast of

Amazing fireball observed over the South of Spain and Portugal on 21 Feb. 2016, at 2h42m UT. The event was produced by a meteoroid that impacted the atmosphere at about 120.000 km/h. It started at an altitude of about 100 km and ended at a height of about 42 km. The event was recorded by the meteor recording stations that the University of Huelva operates at the astronomical observatories located at La Hita (Toledo), Sevilla and Huelva.

Black water pouring out of Texas town's faucets

A Texas town is facing another crisis days after its mayor, city manager, mayor pro tempore, a city councilman and a former councilman were arrested earlier this week.

Crystal City residents don't have any water they can drink. Black water came out of the pipes in homes in the tiny city where the sweeping bribery and conspiracy indictments brought down city leaders. Volunteers handed out donated bottles of water on Friday, as state environmental officials test the water for bacteria.

February 2016 – HAWAII – Despite not being in the headlines, Mauna Loa continues to be in a state of unrest based on seismic and deformation monitoring data. The USGS Hawaiian Volcano Observatory's improved seismic network began to detect increasingly frequent, small earthquakes on Mauna Loa as early as 2013. Renewed inflation of the volcano was detected by HVO's GPS network and also with Interferometric Synthetic Aperture Radar (InSAR) in 2014. Based on the elevated rates of earthquakes and persistent inflation, the Volcano Alert Level for Mauna Loa was elevated from Normal to Advisory on September 15, 2015. According to the USGS Alert-Notification System for Volcanic Activity, an Advisory level indicates that the volcano is showing signs of unrest above known background levels, but does not mean that an eruption is certain. Another period of Mauna Loa unrest in 2004–2005 included inflation and anomalous seismicity, but did not result in an eruption.

ODNR investigates death of birds in Youngstown

YOUNGSTOWN, Ohio - The Ohio Department of Natural Resources is investigating the death of dozens of birds found Saturday along Interstate 680 in Youngstown.

Passers-by spotted the carcasses of large black birds along the north bound lane near Midlothian Boulevard.

ODNR Wildlife Officer Jesse Janosik told 21 News that he would take photographs of the dead birds and collect samples for testing.

Janosik says he expects it will take a couple of days before it is determined what caused the animals to die.

According to the Division of Wildlife website, ODNR actively follows up on reports of any wildlife diseases in Ohio and monitors the health of wildlife populations to ensure their long-term conservation.

The ODNR Division of Wildlife website lists several diseases affecting birds including Avian Flu, West Nile Virus and Conjunctivitis.

There is no indication if any of those diseases played a part in the death of these birds.

More information about wildlife diseases in Ohio can be found by following this [link](#).

Carcasses of Olive Ridley turtles wash ashore Odisha's Puri coast

Odisha Sun Times Bureau
Puri, Feb 25:

Ahead of the mass nesting of Olive Ridley turtles, at least 40 turtles of the endangered species were found dead along the beach of Odisha's Pilgrim Town Puri.

Carcasses of the endangered turtles were spotted along the coast near Digabareni Khunti (Weather Pole) here yesterday.

Tourists and local people gathered at the site to witness the rare species of turtles which were lying bloated and decomposed. The forest officials buried the carcasses of the turtles to prevent it from being preyed on by predators like wild dogs, hyenas and jackals and minimise stench emanating from it.

Multiple injuries were found on the bodies of the turtles which points towards possibility of them being hit by fishing trawlers in the sea.

"We suspect that the turtles were killed after being hit by the fan blades of the fishing trawlers in the sea," a forest official said.

Hundreds of sea lions wash up dead in Chile

By Rafael Romo, CNN

Most of the dead sea lions that are washing up along northern Chile are newborn pups. The deaths are part of a widespread die-off observed elsewhere on South America's Pacific coastline. Part of the problem: El Niño.

Story highlights

'Super lice' outbreak hits 25 states

Published February 26, 2016 · FoxNews.com

A strain of so-called 'super lice' has hit a reported 25 states, causing concern and frustration among parents because the bugs can't be killed with most over-the-counter treatments. The treatments, known as pyrethroids, had a 100 percent success rate in 2000 against lice but now only work in 25 percent of cases, [KSDK.com reported](#).

A new FDA-approved treatment called AirAlle, which was developed by Lice Clinics of America, has been found to be effective against the super lice, with treatments costing about \$170.

China is attempting to create a situation wherein the United States, to uphold international law, will either have to accede to their territorial claims in the South China Sea or openly resort to the use of hostile force, allowing China to publicly portray the U.S. as an imperialist aggressor state. Beijing is betting that the United States will not take this action and that power over the South China Sea and all the resources that lie beneath will pass to China, breaking American influence in the region.

‘For the Record’: Is Iran Working Toward an EMP Strike?

There are signs that Iran may be working toward an **Electromagnetic Pulse** strike on the United States.

“Once Iran has a nuclear weapon, they are ready to launch an EMP attack against us,” former CIA Director James Woolsey told TheBlaze TV’s *For the Record*. “I think they have conducted launches of satellites of the type that you and in the direction you would want for an EMP attack.”

In addition to those tests, Woolsey says the Iranian military has laid the groundwork for a religious justification for an EMP strike. In 2010, a **military textbook** called “**Passive Defense**” was published, which included a section that outlined how an EMP strike would be compliant with Islamic law.

“The deaths from electromagnetic pulse are all indirect,” said Woolsey. “They come from destroying the electricity grid, and thereby not being able to operate the other 17 infrastructures in the United States — food, water, finance. Everything else operates off electricity. And by not being able to operate those, you will have lots of people die of thirst, die of starvations, die of social disruption.”

“The idea, as I understand it, was that since one is not directly attacking or killing humans,” Woolsey said, “it doesn’t come under the stricture of some other ruling, or idea that one should not use nuclear weapons against people.”

U.S. detention facility at Guantanamo Bay, Cuba (Photo: Twitter)

President Obama is urging Congress to approve the closing of the detention center at Guantanamo Bay, Cuba, allow for the transfer of remaining detainees to the U.S. and try them in U.S. courts.

In calling for the policy change, Obama said the move would save taxpayers money without compromising security. In fact, Obama argues that America is less safe because of the facility.

"For many years, it's been clear that the detention facility at Guantanamo Bay does not advance our national security. It undermines it," said Obama Tuesday. "This is not just my opinion. This is the opinion of many in our military. It's counterproductive to our fight against terrorists because they use it as propaganda in their efforts to recruit."

U.S. companies racing to develop a promising gene editing technology are up against a formidable competitor — the Chinese government. China has long set its heart on building an expertise in genomics and its government is pouring funds into a new and sometimes controversial tool called Crispr, encouraging its researchers to advance the technology. Chinese scientists say they were among the first in using Crispr to make wheat resistant to a common fungal disease, dogs more muscular and pigs leaner.

NEW SURGICAL MICROCHIPS THE KEY TO THE FUTURE

Imagine a world where people can enter buildings and turn on machines using a tiny microchip in their hands. Well, that future—at least for Sweden— isn't too far out.

A few office workers in Sweden are being injected with a microchip the size of a grain of rice "that will open doors, turn on machines and serve as a business card," according to Q13 Fox.

The Swedish company plans to eventually have the chip allow workers to pay for their meals at the office café as well. Epicenter is a high-tech office complex in Sweden. The point of this product is to test the efficiency of the technology.

"We want to be able to understand this technology before big corporates and big government come to us and say everyone should get chipped – the tax authority chip, the Google or Facebook chip," Hannes Sjoblad, chief disruption officer of Epicenter, said.

Canada will build mosques for flood of Muslim refugees

🕒 Tuesday, February 23, 2016 | Chad Groening (OneNewsNow.com)

A Canadian activist says his country's new prime minister has kept his campaign pledge for the

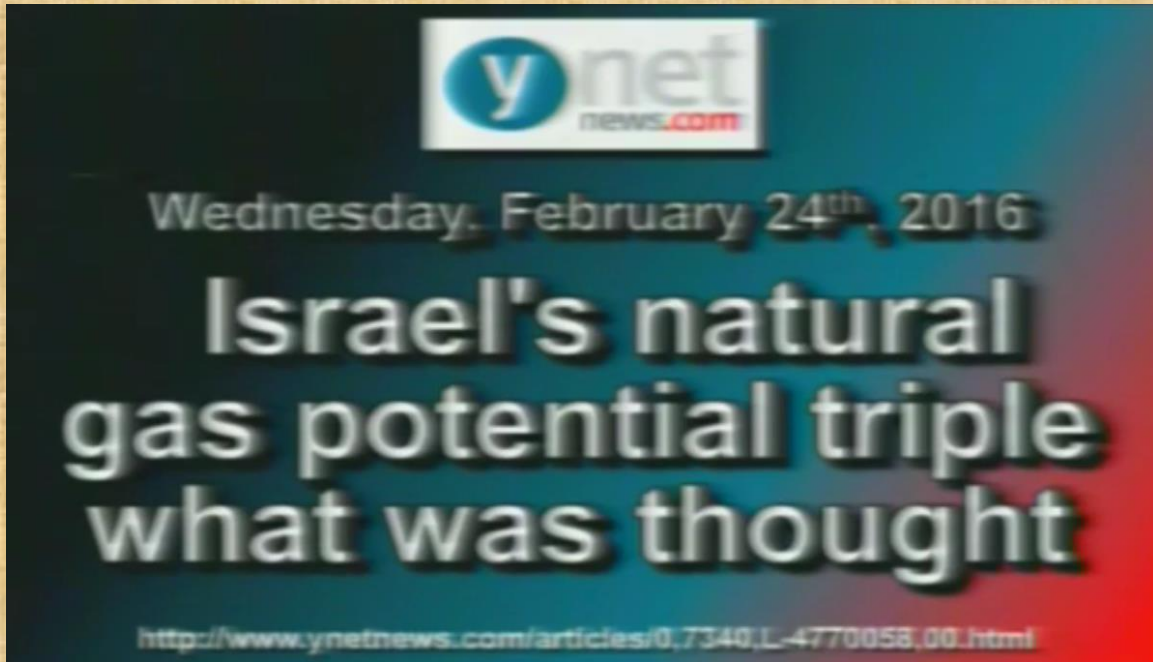

country to house thousands of Islamic refugees.

Justin Trudeau has ordered the Canadian military to draft plans to house more than 6,000 Muslim migrants at military bases.

The far-left prime minister is also pledging to build taxpayer-funded mosques as well as provide Korans, prayer mats and foot washing towels.

There are even reports that Canadian military personnel have been sent eviction notices to make way for their Muslim replacements.

As noted by Simon Black at Sovereign Man, the push for a cashless society is not just growing, it's disturbing, and for a number of reasons. First, the obvious reason is the control it would give central banks and governments over their citizens; the second is that, in the event of a societal collapse or a cyber attack on global finances, a person's wealth would be wiped out with a few

Deutsche Bank: It's time to buy gold

Gold is still expensive, but rising economic risks and market turmoil mean investors should buy it for insurance, Deutsche Bank said Friday.

The recovery since the global and European financial crises had put the [price of gold](#) under some pressure. The yellow metal, which some analysts view as a safe haven or as a protection against rising inflation, typically underperforms during periods when the economy is growing or inflation is low. However, in a note issued Friday, the German Bank said economic signs are pointing in gold's favor.

Kohl's to Close 18 Stores This Year; Sears to Shutter at Least 50

POSTED 8:46 PM, FEBRUARY 25, 2016, BY CNN WIRE AND TRIBUNE MEDIA WIRE, UPDATED AT 09:43PM, FEBRUARY 25, 2016

It's not easy being a big retailer these days.

Amazon is eating almost everyone's lunch. And consumers aren't spending as much as many economists thought they would — despite lower gas prices and rising wages. It seems that people are saving more and paying down debt.

That's bad news for the likes of Best Buy, Kohl's and Sears. All three reported their latest results on Thursday.

Best Buy's profits did top forecasts. But sales fell during the fourth quarter. And the company is forecasting a bigger than expected drop in sales for the first quarter.

Despite lining up long before an Alberta Works office opens its doors in Calgary, many people are getting sent home and told to try their luck the next day because staff can't meet the growing need for financial assistance.

That's what happened to Ashley Young, twice.

"I came here yesterday at one o'clock and they told me they had no appointments for today, to come back tomorrow morning and make sure you are here early, because the doors open at 8:15, people will line up. So I showed up at 7:45 and there's already 60 people in line, if not more."

Young says staff accepted the first 15 people in line and sent the rest away.

Global Bankers Promise 'All Tools' To Shore Up Sagging Growth

27 FEBRUARY, 2016

Finance officials of the world's biggest economies promised Saturday to use "all tools" to shore up sagging global growth and to avoid devaluing their currencies to boost exports, but made no pledges of joint action. Finance ministers and central bankers of the Group of 20 rich and developing countries tried to reassure jittery financial markets that the global economy is healthy, though they acknowledged in a statement that they "need to do more" to boost growth.

U.S. Has Record 10th Straight Year Without 3% Growth in GDP

By Terence P. Jeffrey | February 26, 2016 | 4:05 PM EST

(CNSNews.com) - The United States has now gone a record 10 straight years without 3 percent growth in real Gross Domestic Product, according to data released by the Bureau of Economic Analysis.

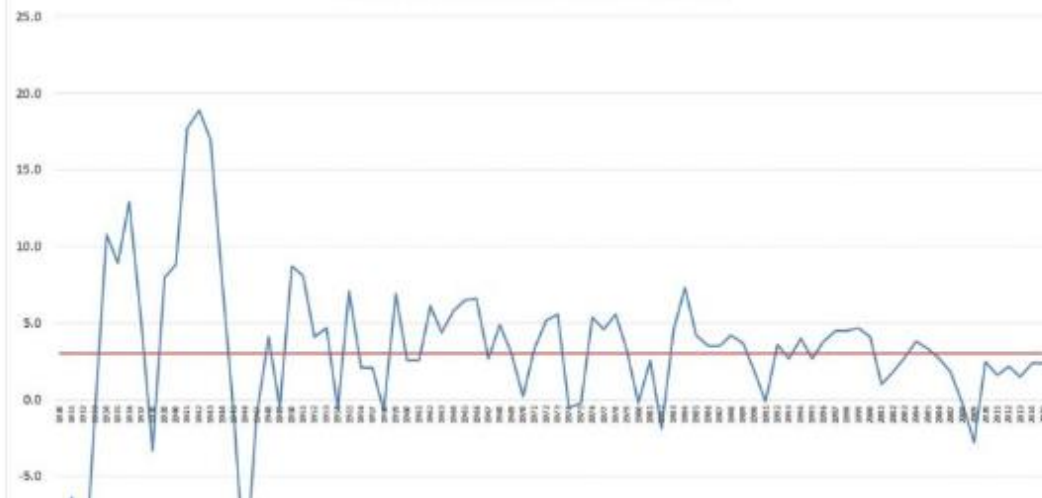

The BEA has calculated GDP for each year going back to 1929 and it has calculated the inflation-adjusted annual change in GDP (in constant 2009 dollars) from 1930 forward.

In the 85 years for which BEA has calculated the annual change in real GDP there is only one ten-year stretch—2006 through 2015—when the annual growth in real GDP never hit 3 percent. During the last ten years, real annual growth in GDP peaked in 2006 at 2.7 percent. It has never been that high again, according to the BEA.

Hostility toward religion in America has expanded dramatically in recent years, with florists targeted, bakers punished, nuns coerced and even retail companies facing discrimination for their faith, according to a new report from First Liberty Institute.

The new report, titled "Undeniable: The Survey of Hostility to Religion in America," reveals a list that admittedly is not exhaustive but still totals 1,285 cases at the start of this year.

"These cases ... show a clear expansion during this past year," the report said. "Quantitatively and qualitatively, the hostility is undeniable. And it is dangerous."

A Chinese pastor, who resisted cross removal, has been sentenced to 14 years in jail and his wife to 12 years, according to an official provincial newspaper.

A court in Southeastern China sentenced pastor Bao Guohua and his wife Xing Wenxiang after convicting them of corruption, financial crimes and gathering people to disturb social order, according to Zhejiang Daily.

The court also fined the couple heavily. Guohua had 600,000 renminbi (£66,000) confiscated and was fined £11,000. His wife had a further £66,000 confiscated and was fined £10,000.

Another ten people who were members of Guohua's church and a Christian group in the same city, Jinhua, in Zhejiang Province, were arrested, according to the newspaper.

The Chinese government has been taking an increasingly hard line regarding religion. In the last two years, officials in Zhejiang have removed more than 1,200 crosses from churches and many church buildings have been destroyed.

California School District's New Flyer Policy May Ban Religious Messages

After receiving complaints from parents about an email their children received for a "Bring Your Bible to School Day" event, one California district is instituting a ban on all religious-related announcements. Folsom Cordova Unified School District's board last week unanimously approved changes to its email announcement policy in response to students and parents who questioned why a school would be sending notices about religious events, or even atheist events, such as a flyer many received about the atheist "Freethought Day."

In speaking about being audited by the Internal Revenue Service (IRS) each year, the thrice-married, unbridled tongued Republican presidential candidate Donald Trump said Thursday night that perhaps he is being targeted by the government because he is a "strong Christian."

"I'm always audited by the IRS, which I think is very unfair," he told CNN's Chris Cuomo following the GOP debate in Houston. "I don't know, maybe because of religion, maybe because of something else, maybe because I'm doing this, although this is just recently."

Congregation members of a 145-year-old church saw first hand the prophetic fulfillment of Isaiah 40:8. Tornadoes ripped through Virginia's St. John's Baptist Church earlier this week, decimating the building and everything inside it—except for about two dozen Bibles and songbooks, according to [reports](#).

"It looks like a war zone," church member Joe Pollard said. "It's a miracle no one was killed."

The Bibles look a bit tattered, but their pages remind readers of Isaiah 40:8: "The grass withers, the flower fades, but the word of our God shall stand forever." 📖

Kenya (MNN) — Nearly 70% of people in Kenya are Christians, according to African Studies Center. And in Nairobi, there's the highest concentration of evangelicals in the world.

Yet, even in this country, there are more than 4,000,000 people unreached by the Gospel. In the northern and eastern parts of the country, the Word hits a dead zone. Why?

(Photo courtesy of World Mission via Facebook)

"Over 90% of all the mission activity in Kenya stops in Nairobi," explains Greg Kelley with World Mission. All short-term mission trips, resources, and orphan outreaches go to Nairobi, but they rarely spread out from there. "Everything is within 50 miles of Nairobi as far as the mission activity."

In this case, entire communities haven't heard of Jesus.

The Italian Senate approved on Thursday a watered-down bill allowing civil unions for same-sex and heterosexual couples, with the government using a confidence motion to ram the contested legislation through the upper house.

To overcome opposition from within his own center-left coalition, Prime Minister Matteo Renzi had to strip out the most controversial part of the text, which would have granted unmarried couples some adoption rights.

Liberal Youth of Sweden said that just because it is 'viewed as unusual and disgusting', does not mean that the deprived sexual acts should be illegal.

They want to legalize sex between two consenting siblings over the age of 15, and sex with a corpse if there is a written permission made before the person died.
