اكرر هدفي فقط من هذه الخدمة أن نذكر بعضنا باننا نحتاج ان نستعد. والاستعداد ليس فقط قبل مجيء المسيح بل ايضا قبل الظلمة التي ستسبق مجيؤه ليكون عندنا زيت في مصابيحنا يكفي ان نعبر هذه الظلمة وتكون مصابيحنا مضيئة وقت مجيؤه او من منا سيسلم وديعته في أي وقت. بمعنى نحتاج من الان ان نستعد بقوة بأيمان عامل وبتنقية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحنا لان الظلمة والضيقة اقتربت جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة لان وقتها تجميع زيت سيكون صعب جدا بل أستطيع ان أقول من مثل العذاري انه لن يكون هناك زيت الا ما جمعته سابقا.

أفضل ان اقول لنفسي ولكم استعدوا الان لأنه اقترب فنكون مستعدين سواء جاء او نحن ان سلمنا وديعتنا عن أنى لا اقول انه اقترب لكيلا يقال عني كاذب وانشر اشاعات او اخيف البعض

ولكنه يأتي بسرعة بغته. لا اعتقد اي أحد ندم لأنه كان مستعد ومنتظر مجيء المسيح ولم يأتي

المسيح في زمنه ولكنه انتقل وهو مستعد ولكن كثيرين جدا ندموا على عدم الاستعداد عندما

انتقلوا

المسيح قال بعض العلامات مثل

انجيل لوقا 21

21: 10 ثم قال لهم تقوم امة على امة ومملكة على مملكة

21: 11 وتكون زلازل عظيمة في اماكن ومجاعات واوبئة وتكون مخاوف وعلامات عظيمة من

السماء

21: 25 وتكون علامات في الشمس والقمر والنجوم وعلى الارض كرب امم بحيرة البحر والامواج

تضج

21: 26 والناس يغطى عليهم من خوف وانتظار ما يأتي على المسكونة لان قوات السماوات

تتزعزع

21: 27 وحينئذ يبصرون ابن الانسان اتيا في سحابة بقوة و مجد كثير

سفر اعمال الرسل 2

2: 19 واعطي عجائب في السماء من فوق وآيات على الارض من أسفل دما ونارا وبخار دخان

2: 20 تتحول الشمس الى ظلمة والقمر الى دم قبل ان يجيء يوم الرب العظيم الشهير

2: 21 ويكون كل من يدعو باسم الرب يخلص

لماذا قال المسيح بعض العلامات؟

أولا لكيلا نرتاع

انجيل متى 24

مت 24: 6 وسوف تسمعون بحروب واخبار حروب **لا ترتاعوا** لأنه لا بد ان تكون هذه

كلها ولكن ليس المنتهى بعد

ثانيا لنؤمن

وَقُلْتُ لَكُمْ الْآنَ قَبْلَ أَنْ يَكُونَ، حَتَّى مَتَى كَانَ تُؤْمِنُونَ.

ثالثا لنتنبه ونستعد

انجيل لوقا 21

28 وَمَتَى ابْتَدَأَتْ هَذِهِ تَكُونُ، فَانْتَصِبُوا وَارْفَعُوا رُؤُوسَكُمْ لِأَنَّ نَجَاتَكُمْ تَقْتَرِبُ.»

A total solar eclipse will cross the continental United States this summer, an event that hasn't happened in roughly a century.

Everyone will experience on Aug. 21 at least 60 percent of the sun being covered, and the resulting semidarkness. Those within about a 60-mile wide diagonal line from the Pacific Northwest through South Carolina will see the sky go dark and the accompanying temperature drop.

## Solar filament explodes hurling a CME into space – G1-class geomagnetic storms possible this weekend

On April 9, 2017, a dark solar filament exploded hurling a powerful CME into space.

At first it appeared that the CME would miss Earth, but a new analysis by NOAA forecasters suggests that a glancing glow is possible on April 15th. G1-class geomagnetic storms are possible when the CME arrives this weekend.

Astronomers both amateur and professional will have a rare opportunity to observe a potentially hazardous asteroid in coming days. It will be the asteroid's closest approach to Earth in 400 years, and will not come as close again for another 500 years.

The relatively large asteroid, known as 2014 JO25, will be at its most visible on April 19 (12:24 UTC) when it will come within 1.8 million km of Earth. This is very close for an asteroid of its size, according to NASA's [Planetary Defense Coordination Office](#).

Even though there is no chance the asteroid will collide with the planet – it will be almost 5 times as far away as the moon – it is still one of the small proportion of about 16,000 identified [Near Earth Asteroids \(NRAs\)](#) classified as potentially hazardous, coming within 7.48 million km of the planet.

After hitting New Caledonia with strong winds and heavy rain, Tropical Cyclone "Cook" has undergone extratropical transition but what's left of it is still very potent and is now moving toward New Zealand landfall. Over the past several weeks the country has already seen huge amounts of rain and is under a strong influence of a low which is moving west of the South Island, directing a moist and unsettled northeasterly airstream over New Zealand, ahead of the cyclone. MetService warns Ex-tropical Cyclone "Cook" is expected to make landfall Thursday afternoon (local time) describing the event as 'very significant and likely to produce widespread flooding, slips and wind damage.'

More than a quarter of the UK's birds are struggling to survive, with species including curlews and puffins now joining the at-risk list, according to a new report.

Entries to the UK's 'red list' of endangered birds - those in urgent need of conservation - have swelled to 67 species out of a possible 247.

Since the last review in 2009, 15 new species have been added to the list, which is reserved for species in danger of extinction or that have seen a sharp drop in population or habitat in recent years.

## Trump seeks options for eliminating NKorea nuke threat

By Olivia HAMPTON  
Washington (AFP) April 9, 2017

As a US strike group led by an aircraft carrier steamed toward the Korean peninsula Sunday, a senior official said President Donald Trump has asked to be provided with a range of options for eliminating the North Korean nuclear threat.

The US naval move will certainly raise tensions in the region and comes hard on the heels of a US cruise missile strike on Syria that was widely interpreted as putting Pyongyang on warning over its refusal to abandon its nuclear ambitions.

North Korea denounced Thursday's attack as an act of "intolerable aggression" and one that justified "a million times over" the North's push toward a credible nuclear deterrent.

Secretary of State Rex Tillerson insisted in an interview broadcast Sunday that the United States does not intend to try to remove the regime of Kim Jong-Un.

"That is not our objective and so the whole reasons underlying the development of a nuclear program in North Korea are simply not credible," Tillerson told the ABC program "This Week."

He said the United States expects China, the main ally of North Korea, to do more to rein in the regime in Pyongyang.

"They have indicated that they will, and I think we need to allow them time to take actions," Tillerson said.

### N Korea blasts US strikes on Syria, says justify nukes: state media

Seoul (AFP) April 8, 2017 - North Korea has said the US missile strikes on Syria were an "intolerable act of aggression" that "proves a million times over" that strengthening its nuclear programme was the right choice, state media reported Saturday.

The comments were Pyongyang's first since US President Donald Trump ordered the strikes on an air base in the war-racked country Thursday in retaliation for an apparent chemical attack.

"The US missile attack against Syria is a clear and intolerable act of aggression against a sovereign state and we strongly condemn it," KCNA news agency quoted an unnamed spokesman for the North Korean foreign ministry as saying.

"The reality of today shows that we must stand against power with power and it proves a million times over that our decision to strengthen our nuclear deterrence has been the right choice."

Analysts had earlier said the strikes contained a clear message for Pyongyang that the US was

North Korea has denounced the deployment of the US naval strike group to the peninsula, warning that it is ready for war and Washington will be fully responsible for any potentially "catastrophic consequences" in the event of an invasion.

In a show of force last week, Washington rerouted the Carl Vinson nuclear strike group into Korean waters, after having cancelled its planned trip to Australia. The repositioning of US forces in the region coincided with President Donald Trump's talks with his Chinese counterpart Xi Jinping.

## WAR DRUMS: Japan sending warships to join US fleet to be ready for conflict.

APRIL 14, 2017

North Korea has enemies surrounding its borders after causing global terror with its nuclear weapons program. Kim Jong-un has threatened to nuke many of his neighbors and the US as the dastardly dictator flexes his muscles. In response, **Donald Trump has sent its naval fleet to the Korean peninsula** over fears of North Korea's ICBM development. And it has now been revealed that Japanese warships will be joining the Carl Vinson as Kim's reign of terror faces collapse. A military source said:

## China, SKorea vow strong measures if NKorea tests nuke again

By Hwang Sunghee  
Seoul (AFP) April 10, 2017

China has agreed to "strong" new measures to punish North Korea if it carries out a nuclear test, Seoul said Monday after the US signalled it may act to shut down Pyongyang's weapons program.

South Korea's top nuclear envoy made the comment after talks with his Chinese counterpart Wu Dawei, as the US sent a naval strike group to the region in a show of force.

"We agreed that there should be strong additional measures based on UN Security Council resolutions if the North pushes ahead with a nuclear test or an ICBM launch despite warnings from the international community," Kim Hong-Kyun told reporters.

The North may stage a "strategic provocation" to mark key political dates this month, Kim said, adding that Wu's visit would serve as a "strong warning" against Pyongyang. Wu did not speak to the media after the talks.

China is the isolated country's sole major ally and economic lifeline, and Beijing in February suspended all coal imports from the North in punishment for Pyongyang's latest missile test.

Speculation of an imminent nuclear test is brewing as the North marks anniversaries including the 105th birthday of its founding leader on Saturday -- sometimes celebrated with a demonstration of military might.

President Donald Trump, fresh from a missile strike on Syria that was widely interpreted as a warning to North Korea, has asked his advisors for a range of options to rein in its ambitions, a top US official said on Sunday.

China has warned the US against using military force against North Korea, after a surprise redeployment of an aircraft carrier group. Washington's regional allies said they expect it to consult with them before any action.

Tension is mounting in the region as US President Donald Trump said he would solve the "North Korean problem" with or without China's help. The warning came amid the diversion of the aircraft carrier group 'USS Carl Vinson' to the Korean Peninsula and a week after Trump ordered the US Navy to fire a barrage of 59 Tomahawk missiles at a Syrian airbase as punishment for an alleged chemical attack in Idlib province.

In accordance with the order, 600,000 people should be urgently evacuated. Experts note that the evacuation will most likely be conducted due to extremely strained tensions in relations with the United States of America.

Reportedly, Pyongyang's bomb shelters will not be able to accommodate the entire population of the North Korean capital. Therefore, 600,000 people - mostly individuals with criminal records - will have to leave Pyongyang to let others use bomb shelters.

### Logistics support by the SDF (in the event of local conflict)

Based on security legislation, the government will recognize the situation as having an important influence on Japan's security and safety. The SDF will provide logistics support for U.S. forces conducting military operations, such as refueling fighter jets and transporting supplies.

**Protection of Japanese citizens in South Korea**  
The SDF will confirm the safety of Japanese citizens in South Korea and support their return to Japan using chartered or government airplanes. In case of emergency, the SDF could be dispatched to South Korea.

**Preparation for armed attacks against Japan**  
Due to a fear of Japan coming under direct attack, the government will recognize the situation as an "imminent armed attack situation." The SDF will take actions to maintain public order within Japan.

**Civil protection and response to evacuees**  
Based on the Civil Protection Law, the government will issue warnings and evacuate residents, while accepting foreign evacuees from the Korean Peninsula in facilities.

### Use of force by the SDF (in the event of a full-scale war)

Based on security legislation, the government will recognize the situation as a "survival-threatening situation." Through the right of collective self-defense, the SDF will protect a U.S. Aegis-equipped destroyer on guard against the launch of ballistic missiles and U.S. vessels transporting evacuees to Japan, and conduct minesweeping operations in the Tsushima Strait and other activities that fall under the use of force.

## Hawaii panel asks state to prepare for North Korea attack

Published: Friday, April 14th 2017, 9:51 am MDT

HONOLULU (AP) - Hawaii lawmakers want state officials to update plans for coping with a nuclear attack as North Korea develops nuclear weapons and ballistic missiles that can reach the islands.

The state House Public Safety Committee unanimously passed a resolution Thursday.

Committee Vice Chairman Matt LoPresti says he's not trying to spread fear. But he wants the public to know the government is taking steps to protect them in the worst case scenario.

He's aiming to get state funding to re-equip Cold War-era fallout shelters.

The resolution that moved forward Thursday said that in 1981, Oahu had hundreds of fallout shelters -- "many stocked with medical kits, food, and sanitary kits." But in later years, funding dried up, and stocks were thrown out.

Hawaii Emergency Management Agency Executive Officer Toby Clairmont showed lawmakers a response plan from 1985 that hasn't been updated since.

He says there's also a need to educate the public about what they can do for themselves.

Chinese Foreign Minister Wang Yi said Israeli-Palestinian peace talks should be revived in an effort to correct the "historical injustice" of Palestinians not having their own state.

Wang's comments on Thursday came at a press conference following his meeting with Palestinian Foreign Minister Riyad al-Maliki in Beijing, the *Associated Press* reported.

Turks vote in historic referendum on expanding Erdogan's power

By Tuvan Gumrukcu

ANKARA (Reuters) - Turks vote in a hotly contested referendum on Sunday that could place sweeping new powers in the hands of President Tayyip Erdogan and herald the most radical change to the country's political system in its modern history.

Opinion polls have given a narrow lead for a "Yes" vote, which would replace Turkey's parliamentary democracy with an all-powerful presidency and may see Erdogan in office until at least 2029.

## Scientists make cells **RESISTANT** to HIV in major breakthrough against the disease

- Scientists have discovered a way to make cells resistant to HIV
- Antibodies that fight HIV are tethered to immune cell receptors
- They block the virus from accessing the cell receptor and spreading infection
- Cells without antibody protection die off and protected cells pass on the protective gene to new cells

Researchers have found a way to make cells resistant to **HIV**, a new report reveals.

In a major breakthrough, scientists have tethered HIV-fighting antibodies to immune cells, creating a cell population resistant to the virus.

These resistant cells can quickly replace diseased cells, making it more effective than other therapies - and potentially curing the deadly disease.

The researchers plan to collaborate with investigators at City of Hope's Center for Gene Therapy, in **California**, to evaluate this new therapy in efficacy and safety tests, as required by federal regulations, prior to testing in patients.

CARACAS (Reuters) – Venezuelan opposition supporters took to the streets again on Monday to protest a grinding economic crisis and an erosion of democracy under leftist President Nicolas Maduro, in the first sustained wave of anti-government demonstrations in three years.

A Supreme Court decision in late March to assume the functions of the opposition-led congress sparked outcry among a population already suffering from triple-digit inflation and widespread shortages of basic goods.

## The Price Of Gold Spikes As Investors Get Spooked By Talk Of World War III And Nuclear Conflict

By Michael Snyder, on April 11th, 2017

Whenever the world starts going crazy, investors instinctively begin flocking to precious metals. So it wasn't exactly a surprise when gold and silver prices started to move upward aggressively as global leaders continued to talk about the possibility of World War III and nuclear conflict. The price of gold spiked to a five month high on Tuesday, and as I write this article gold is currently sitting at \$1277.10 an ounce. Right now silver is at \$18.35 an ounce, and many analysts believe that it is poised for a dramatic jump in the weeks and months to come as global tensions continue to rise. Google searches for the phrase "going to war" are the highest that they have been at any point in recent years, and many people out there are starting to understand that the U.S. could soon be facing military conflicts in Syria and in North Korea simultaneously.

In response to persistent threats from the Trump administration, the North Koreans are promising that they will not hesitate to use nuclear weapons if they are attacked by the U.S. military.

## Tech Stocks Experience Their Longest Losing Streak In 5 Years As Panic Begins To Grip The Market

By Michael Snyder, on April 12th, 2017

S&P 500 tech stocks have now fallen **for 9 days in a row**. The last time tech stocks declined for so many days in a row was in 2012, and that was the only other time in history when we have seen such a long losing streak. As I have stated [before](#), the post-election "Trump rally" is officially done, and the market is starting to roll over as investors begin to realize that all of the buying momentum has completely evaporated. Tech stocks tend to be particularly volatile, and so the fact that they are starting to lead the way down should definitely be alarming to many in the investing community.

Of course it isn't just tech stocks that are falling. The Dow was down another 59 points on Wednesday, and the S&P 500 has closed beneath its 50 day moving average [for the very first time since the election](#). For those that have been waiting for a key technical signal before getting out of the market, there is one for you.

## The Dow Falls Another 138 Points As Geopolitical Shaking Forces Investors To Race For The Exits

By Michael Snyder, on April 13th, 2017

Stock prices just keep on falling, and many analysts are now wondering if a full-blown stock market crash is in our near future. On Thursday, the S&P 500 and the Dow both closed at 2 month lows after Donald Trump dropped "the mother of all bombs" in Afghanistan. It was the first time that one of these bombs has ever been used in live combat, and it is being reported that each of these bombs weighs 22,000 pounds and cost 16 million dollars to make. Of course Trump was trying to send a very clear message to the rest of the world by dropping this bomb, and investors interpreted it as a sign that we are getting even closer to war.

The financial markets will be closed on Friday for the long holiday weekend, and with so much uncertainty about what may happen in Syria and in North Korea, many investors wanted to get their money out of the market while they still could. The historic losing streak for S&P 500 tech stocks extended to 10 days in a row on Thursday, and all of the major stock indexes are now below their 50 day moving averages for the first time in over a year.

North Carolina Lawmakers Seek to Ban Gay Marriage

A protester holds up a sign in support of the traditional definition of marriage at the 'Let the People Vote' rally in New York City on July 24, 2011.

Three Republican lawmakers in North Carolina are now looking to ban same-sex marriage in the state with a bill called the "[Uphold Historical Marriage Act](#)," which critics say is already "dead on arrival."

The bill, [House Bill 780](#), sponsored by Reps. Larry Pittman, Michael Speciale and Carl Ford argues that the U.S. Supreme Court overstepped its "constitutional bounds" in 2015 when it struck down what was known as Amendment One.

"HB 780 is about the need for the states to reassert their rights. As the bill states, marriage is not a federal matter. For too long, the federal government and federal courts have been allowed to overstep their bounds because the states have not had the courage to say no. Upholding the U.S. and North Carolina constitutions means demanding that laws and court rulings do not contradict the very constitutions we are obligated to uphold. I appreciate Rep. Speciale and Rep. Ford for having the courage to stand with me and say so," Pittman said in a statement [cited by WSOC-TV](#).

More than 60 percent of North Carolina voters [approved of Amendment One](#) in 2012 which declares that "marriage between one man and one woman is the only domestic legal union that shall be valid or recognized in this state."

In October 2014, however, U.S. District Judge Max Cogburn of Asheville [struck down](#) Amendment One.

Supporters of gay marriage wave the rainbow flag after the U.S. Supreme Court ruled on Friday that the U.S. Constitution provides same-sex couples the right to marry at the Supreme Court in Washington, June 26, 2015. The court ruled 5-4 that the Constitution's guarantees of due process and equal protection under the law mean that states cannot ban same-sex marriages. With the ruling, gay marriage will become legal in all 50 states.

Last Friday, Republican Governor Susana Martinez signed Senate Bill 121 into law, which banned what critics often label "gay conversion therapy."

Also known as reparative therapy, SOCE therapy for those struggling with unwanted same-sex attraction. Critics claim the practice has damaging effects on patients while others argue that it helps a person overcome harmful unwanted sexual attraction.

In a statement released Friday, Gov. Martinez argued that while she generally supported limited government, this matter was an exception.
