اكرر هدفي فقط من هذه الخدمة أن نذكر بعضنا باننا نحتاج ان نستعد أي حياة اليقظة الروحية.
والاستعداد ليس فقط قبل مجيء المسيح بل ايضا قبل الظلمة التي ستسبق مجيؤه لأننا نور العالم
الذي أصبح مظلم وليكون عندنا زيت في مصابيحنا يكفي ان نعبر هذه الظلمة وتكون مصابيحنا
مضيئة وقت مجيؤه او من منا سيسلم وديعته في أي وقت. بمعنى نحتاج من الان ان نستعد بقوة
بأيمان عامل بالمحبة والتبشير وبتنقية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحنا لان
الظلمة والضيقة اقتربت جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة لان
وقتها تجميع زيت سيكون صعب جدا بل أستطيع ان أقول من مثل العذاري انه لن يكون هناك
زيت الا ما جمعته سابقا.

أفضل ان اقول لنفسي ولكم استعدوا الان لأنه اقترب فنكون مستعدين سواء جاء او نحن ان
سلمنا وديعتنا عن أنى لا اقول انه اقترب لكيلا يقال عني كاذب وانشتر اشاعات او اخيف البعض
ولكنه يأتي بسرعة بغته. لا اعتقد اي أحد ندم لأنه كان مستعد ومنتظر مجيء المسيح ولم يأتي
المسيح في زمنه ولكنه انتقل وهو مستعد ولكن كثيرين جدا ندموا على عدم الاستعداد عندما
انتقلوا

المسيح قال بعض العلامات مثل

انجيل لوقا 21

21: 10 ثم قال لهم تقوم امة على امة ومملكة على مملكة

21: 11 وتكون زلازل عظيمة في اماكن ومجاعات واوبئة وتكون مخاوف وعلامات عظيمة من

السماء

21: 25 وتكون علامات في الشمس والقمر والنجوم وعلى الارض كرب امم بحيرة البحر والامواج

تضج

21: 26 والناس يغطى عليهم من خوف وانتظار ما يأتي على المسكونة لان قوات السماوات

تتزعزع

21: 27 وحينئذ يبصرون ابن الانسان اتيا في سحابة بقوة و مجد كثير

سفر اعمال الرسل 2

2: 19 واعطي عجائب في السماء من فوق وآيات على الارض من أسفل دما ونارا وبخار دخان

2: 20 تتحول الشمس الى ظلمة والقمر الى دم قبل ان يجيء يوم الرب العظيم الشهير

2: 21 ويكون كل من يدعو باسم الرب يخلص

لماذا قال المسيح بعض العلامات؟

أولا لكيلا نرتاع

انجيل متى 24

مت 24: 6 وسوف تسمعون بحروب واخبار حروب **لا ترتاعوا** لأنه لا بد ان تكون هذه

كلها ولكن ليس المنتهى بعد

ثانيا لنؤمن

إنجيل يوحنا 14: 29

وَقُلْتُ لَكُمْ الْآنَ قَبْلَ أَنْ يَكُونَ، حَتَّى مَتَى كَانَ تُمْنُونَ.

ثالثا لنتنبه ونستعد

28 وَمَتَى ابْتَدَأَتْ هَذِهِ تَكُونُ، فَأَنْتَضِبُوا وَارْفَعُوا رُؤُوسَكُمْ لِأَنَّ نَجَاتَكُمْ تَقْتَرِبُ».

Scientists have rediscovered the 'heartbeat' from a supermassive black hole 600 million light years away, after it went missing for several years.

The black hole beats at the center of a galaxy far, far away called RE J1034+396, and was first detected over a decade ago in 2007. The heartbeat is the result of matter falling into the

NASA is reporting a rather rocky start to the week, as the Earth is set for at least five asteroid flybys. It comes hot on the heels of another asteroid unexpectedly whizzing between Earth and the Moon without anyone noticing.

Four of the five space rocks due to buzz the Earth this week were only spotted in May, raising concerns about just how prepared our planetary defenses are; While we caught them,

NAKED-EYE COMET NEOWISE? Here we go again. A comet is falling toward the sun, and it could become a naked-eye object after it skims past the orbit of Mercury on July 3rd. Michael Mattiazzo photographed Comet NEOWISE (C/2020 F3) on June 10th from Swan Hill, Australia:

"Pushing the limits of comet observing, I had to leave home to find a clear horizon," says Mattiazzo. "When I took the picture, Comet NEOWISE was very close to the sun and only 5 degrees above the local horizon. Its visual magnitude was near +7.0, below the threshold for naked-eye visibility."

It might not look like much now, but this comet could blossom in the weeks after perihelion (closest approach to the sun). Forecasters say Comet NEOWISE might become as bright as a 2nd or 3rd magnitude star. Northern hemisphere observers would be able to easily see it in the evening sky in mid-July.

RECORD COLD IN THE MESOSPHERE: It's getting cold in the mesosphere. Very cold. "At polar latitudes (60N-80N) temperatures have been breaking 14-year records in the last few days," says Lynn Harvey of the University of Colorado Laboratory for Atmospheric and Space Physics. This development is causing noctilucent clouds (NLCs) to spill out of the Arctic to middle latitudes.

"I've been waiting for years to see NLCs, and finally it happened!" reports Phil Halpert from London, England, on June 7th. He noticed their electric-blue ripples [over local rooftops](#), then rushed out to photograph them in open sky over Clissold Park:

"This is the first time I have ever seen noctilucent clouds over London!" he says.

NLCs are Earth's highest clouds. Seeded by meteoroids, they float at the edge of space 83 km above the ground. The clouds form when summertime wisps of water vapor rise up to [the mesosphere](#), allowing water to crystallize around specks of [meteor smoke](#). Usually they are best seen after the summer solstice, but this year they are getting an early start.

By Allison Chinchar, CNN Meteorologist

Updated 7:16 AM ET, Sun June 14, 2020

(CNN) — The Atlantic hurricane season is already one for the record books and it's only just getting started.

With an early jump-start to the season, a record number of named storms, and a storm reaching states that don't normally see tropical systems, this season is off to a fast and interesting start.

- Rabbit Hemorrhagic Disease virus type 2 was first detected in France in 2010
- The virus was first detected among wild rabbits in the U.S. in March
- The disease is also threatening domesticated rabbits; nearly 500 pet rabbits have been killed by the current outbreak in New Mexico alone
- The disease is extremely contagious, and can be spread through rabbits felts and feces, as well as insects who come into contact with the animals
- A vaccine has been developed in Europe, but has not yet been approved for widespread use in the U.S.

The deaths of over 150 elephants is being investigated in Botswana, southern Africa, where an official investigation has so far ruled out poaching and poisoning as factors in the huge mammals' mysterious demise.

The elephants' carcasses were found intact, indicating they were not killed by ivory-thieving poachers, over a span of two months and the cause of death was neither a man-made poison nor anthrax – known to poison elephants who consumed spores after digging into the

Coronavirus: Satellite traffic images may suggest virus hit Wuhan earlier

BBC NEWS • June 10, 2020

Students have their bags disinfected before entering Wuhan University, on the first day of classes in Wuhan on June 8, 2020

An apparent surge in traffic outside Wuhan hospitals from August 2019 may suggest the coronavirus hit the area earlier than reported, a study says.

Harvard researchers say satellite images show an increase in traffic outside five hospitals in the Chinese city from late August to December.

The traffic spike coincided with a rise in online searches for information on symptoms like "cough" and "diarrhoea".

China said the study was "ridiculous" and based on "superficial"

A new cluster of Covid-19 cases has been discovered in Beijing, with infections being linked to a local food market. Official are now rushing to test over 10,000 of its employees.

"Wartime-like" disease control measures have been deployed in Beijing's Fengtai District, local media reported, citing officials. Authorities warned of a new Covid-19 hotspot linked to the large Xinfadi wholesale food market, where 45 people have tested positive for the coronavirus.

Forty samples taken from the market's surroundings also tested positive. In particular, the

U.S. fighter planes intercepted two waves of Russian bombers flying within eight miles of U.S. airspace near Alaska on Wednesday, officials said.

"North American Aerospace Defense Command F-22 Raptors, supported by KC-135 Stratotankers and E-3 Airborne Warning and Control System, completed two intercepts of Russian Bomber formations entering the Alaskan Air Defense Identification Zone early this morning," the North American Aerospace Defense Command said Wednesday on Twitter.

"The Russian military aircraft remained in international airspace and at no time did they enter United States sovereign airspace."

The first Russian formation, of two Tu-95 bombers, two Su-35 fighter planes and an A-50 early warning and control aircraft, came within 20 nautical miles of the Alaskan Air Defense Identification Zone, a 200-mile long coastline with U.S. territorial airspace beginning 12 miles from the coast.

White House memo calls for study of improved Arctic icebreakers

Washington DC (UPI) Jun 10, 2020 - A White House memorandum on polar security has the U.S. Coast Guard considering the addition of armed, nuclear-powered icebreakers to its aging fleet.

President Donald Trump, in a memo on Tuesday, called for "a ready, capable and available fleet of polar security icebreakers that is operationally tested and fully deployable by Fiscal Year 2029."

The United States has only two operational heavy icebreakers in use, the 44-year old Polar Star and the 24-year old Healy. Each is prone to breakdowns, officials have said.

The memo comes as global warming has positioned the Arctic region as a possible shipping route, as well as a source of available mineral resources, and calls for evaluation of a "defensive armament adequate to defend against near-peer competitors and the potential for nuclear-powered propulsion."

As tensions remain high between Iran and the US, the Islamic Republic appears to have constructed a new mock-up of an aircraft carrier off its southern coast for potential live-fire drills, *The Associated Press* reported on Tuesday.

The faux foe, seen in satellite photographs obtained by AP, resembles the Nimitz-class carriers that the US Navy routinely sails into the Persian Gulf from the Strait of Hormuz, the passageway where 20% of all the world's oil passes through.

While not yet acknowledged by Iranian officials, the replica's appearance in the port city of Bandar Abbas suggests Iran's paramilitary Revolutionary Guard is preparing an encore of a similar mock-sinking it conducted in 2015.

تركيا تعد لشراء إضافات من الصواريخ S400 من روسيا

Turkey to buy additional S-400 missile defense system from Russia

by Ed Adamczyk
Washington DC (UPI) Jun 10, 2020

Turkey will purchase an additional Russian-made S-400 air defense system, the head of Turkey's Defense Industries Administration said.

"We have a basic agreement on the supply of the second batch of the Russian S-400 system, and there are some technical issues regarding transport operations," Ismail Demir said in a television interview earlier this week. "Ankara is also interested in proposals to purchase Patriot and Eurosam air defense systems."

A Turkish official said the sale would go on despite production and delivery issues caused by the COVID-19 pandemic.

Turkey received a loan from Russia to partially finance the \$2.5 billion purchase of the S-400 system of ground-to-air armaments. An agreement was signed in December 2017 and the first "Triumph" missiles and missile launchers arrived in Turkey in July 2019.

The deal caused a crisis in U.S.-Turkish relations, with Washington demanding an end to the sale in exchange for the opportunity to purchase American Patriot systems.

The United States also threatened to delay or cancel the sale of F-35 fighter jets to Turkey and impose sanctions, but Ankara did not yield to U.S. pressure.

The S-400 missile includes a command and control center capable of coordinating several battalions of troops, a radar detection system and ultra-long-range missiles.

It is a fact of science that everything on earth gives out a definite radiation. It is also a fact of science that what we call "matter", like a table, or even our bodies, is just pure energy vibrating at a specific frequency. It is the frequency and rate of vibration that creates what we call shape, size, texture, etc. These particles also generate small electrical impulses, creating some sort of "field" around objects, even if only at a microscopic/atomic level for some of them. The human aura, for instance, is the result of electrical impulses, which continue from the subatomic level until they emerge as our electromagnetic field. What we eat, how we live and where we live can alter our aura significantly. So, using the term loosely if you like, electromagnetic

Addis Ababa (AFP) - Ethiopia said Thursday it wants to limit the role of outside parties in revived talks over its Nile River mega-dam, a sign of lingering frustration over a failed attempt by the US to broker a deal earlier this year.

The Grand Ethiopia Renaissance Dam has been a source of tension in the Nile River basin ever since Ethiopia broke ground on it nearly a decade ago.

Prophecy Fulfilled: Ukrainian Jews Return to Israel After Thousands of Years in Exile

06-12-2020 - Chris Mitchell

In Hebrew, it's called "Aliyah", the Jewish people returning to the Promised Land. Just before COVID-19 hit, CBN News traveled from Israel to Ukraine for a close-up look at this prophetic story in action.

In the early morning, more than 130 Ukrainian Jews landed in Tel Aviv to begin a new life.

Many see the moment when these new immigrants step onto the tarmac at Ben Gurion Airport as the time when the words of the Bible written thousands of years ago come to life.

Venezuela on Brink of Famine With Fuel Too Scarce to Sow Crops

Bloomberg **Fabiola Zerpa, James Attwood and Nicolle Yapur**

Bloomberg June 11, 2020

(Bloomberg) -- Venezuelan farmer Roberto Latini fears his window to plant this year's crop is quickly closing.

He'd hoped to seed corn, but couldn't find the fuel to operate his trucks and equipment before the dry season ended. So he set his sights on rice, which can be planted even in heavy rains. Weeks later, fuel is still short and "as time goes by, it's getting too late to sow," Latini said.

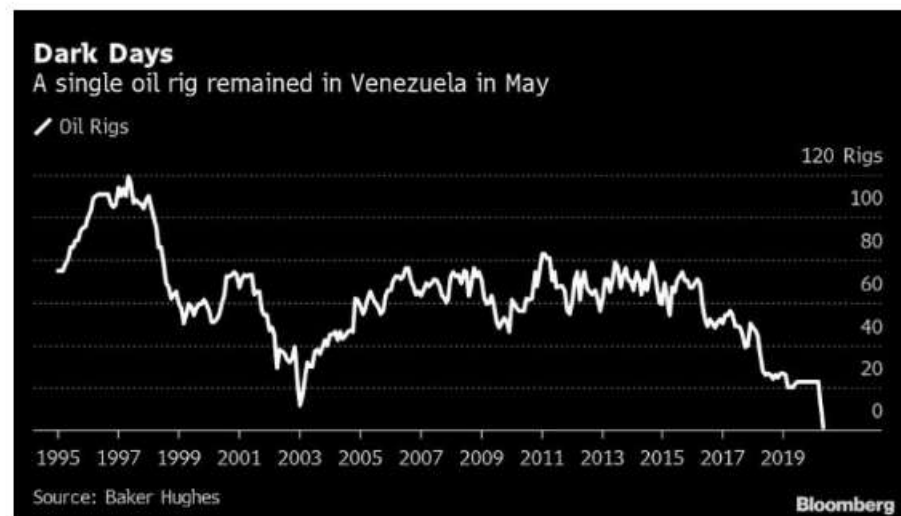

After seven years of economic collapse, Venezuela's crisis has entered a troubling new phase. In a nation that's home to the world's largest oil reserves, fuel

In Venezuela, a Single Oil Rig Works World's Biggest Reserves

Bloomberg **Fabiola Zerpa**

Bloomberg June 11, 2020

(Bloomberg) -- Venezuela's fall from oil superpower to failing producer can be illustrated in one image: a single drilling rig working the world's largest oil reserves.

As fields across the nation shut amid a relentless U.S. campaign to cut Venezuela off from global oil markets, the number of rigs drilling for crude fell to just one in May, according to data from Baker Hughes. Another lone rig was drilling for gas.

That marks a 96% decline since January, when drilling fell to levels not seen since 1963. Having a single active crude rig takes the country back to the beginning of its oil industry, well before it became a founding member of the Organization of

Chinese Churches Can Reopen... If They Preach Party Doctrine

BY ARIELLE DEL TURCO/FAMILY RESEARCH COUNCIL JUNE 09, 2020

Share this article:

While coronavirus restrictions may be lifting for state-approved churches in China, many find themselves facing an even more dangerous situation -- being told what to teach by an officially atheist authoritarian regime.

Churches in the Chinese province of Zhejiang have been told by the state-affiliated Chinese Patriotic Association that services may resume this month provided churches preach "patriotism." This instruction is deeply problematic. To the Chinese Communist Party, "patriotism" means pledging your loyalty to the Party, which is increasingly hostile to religion under the leadership of Chinese President Xi Jinping.

China Demolishes House Church One Month After Violent Raid

By [International Christian Concern](#) on June 13, 2020 - 0 Comments

XIAMEN, Fugian (*International Christian Concern*) – On June 11, local authorities brought in more than 100 officers from four different agencies to demolish Xingguang Church in China's Xiamen city, Fujian province. The demolition came a month after the violent May 3 raid of the house church, during which several members were injured.

Around 9:00 a.m., dozens of chengguan, or Urban Management Law Enforcement officials, lined up outside of Xingguang Church in Jimei district, before storming the church located on the fifth floor with other dozens of fire fighters, public security officers, and religious affairs bureau staff.

The house church, purchased by the members and also the home of several members, was soon was reduced to rubble. Since the authorities barred the church members from entering, when a churchgoer managed to record the demolition, a chengguan yelled, "What are you filming with your cell?" while attempting to knock away the phone.

Indian Christian Teen Stabbed and Stoned to Death for His Faith

By Morning Star News on June 11, 2020 - 2 Comments

NEW DELHI (*Morning Star News*) – Incited by Hindu extremists, followers of traditional tribal religion in eastern India last week stabbed and stoned a 16-year-old Christian boy to death for his faith, sources said.

The mutilated body of Sambaru Madkami was found on Friday, buried in the jungle of Malkangiri, about six kilometers (less than 4 miles) from his village of Kenduguda, Malkangiri District, Odisha state. The village animists had seized him on Thursday night after deciding to kill the male heads of the three Christian families in the village, area sources said.

Two Christian Pastors Attacked in Northeast India Amid COVID Pandemic

By International Christian Concern on June 11, 2020 - 0 Comments

(International Christian Concern) – On May 9, Tirpan Oraon was brutally attacked by his younger brother, an attack reportedly instigated by radical Hindu nationalists. On May 31, another pastor was assaulted while distributing COVID-19 food relief. Both of the incidents occurred in Jharkhand, a state located in northeastern India, where Christians have faced increased hostility during the COVID-19 pandemic.

In 2005, Tirpan and his family converted to Christianity. Since then, the family has faced ever-increasing levels of harassment and persecution from local radicals. In a recent interview with International Christian Concern (ICC), Tirpan's son, Parameswar, described the harassment against his family.

Poland's President Andrzej Duda has equated LGBT "ideology" to communism, warning that in a bid to indoctrinate the youth this "neo-Bolshevism" is even more harmful and destructive.

The conservative politician, who is seeking re-election, catered to his audience at a Saturday rally where he said that his parents' generation did not fight communism only to bow now to a new "ideology" that is "even more destructive to the human being."
