

تعليق على بعض الاحداث العالمية

والعلامات حتى 11 فبراير 2014

Holy_bible_1

اكرر اننا لا نحدد مواعيد بل فقط نشجع بعضنا بعضا بقرب مجيء المسيح

وأيضاً أوضح أنه يوجد نبوات لم نراها بعد حدثت مثل ابن الهلاك وحرب هرمجدون وظهور

الشاهدين وحزقيال 38 وغيره ولا نعرف متى ولكن أشعر انها اقتربت.

ولكن ايضا علامات كثيرة من التي قال عنها الكتاب انها في الزمان الاخير وفي الجيل الأخير

بدأت تحدث بوضوح ويجب أن ننتبه اليها. فلا نعرف هل المسيح سيأتي في سنة ام سبع سنين ام

سبعين سنة أم أكثر فكرر لا احدد مواعيد ولكن نذكر بعضنا باننا نحتاج ان نستعد. والاستعداد

ليس فقط قبل مجيء المسيح بل ايضا قبل الظلمة التي ستسبق مجيؤه ليكون عندنا زيت في

مصابيحننا يكفي ان نعبر هذه الظلمة وتكون مصابيحننا مضيئة وقت مجيؤه. بمعنى نحتاج من

الان ان نستعد بقوة بأيمان عامل وبتنقية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحننا

لان الظلمة والضيقة اقتربت جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة
لان وقتها تجميع زيت سيكون صعب جدا بل أستطيع ان أقول من مثل العذارى انه لن يكون هناك
زيت الا ما جمعته سابقا.

بعض الاحداث التي قال عنها الرب يسوع

انجيل لوقا 21

21: 25 وتكون علامات في الشمس والقمر والنجوم وعلى الارض كرب امم بحيرة البحر والامواج

29: Ubinas Volcano emits ash, smoke: shaken by violent spasm of tremors

Posted on [February 5, 2014](#)

February 5, 2014 – PERU – The Ubinas Volcano near the southern city of Arequipa in Peru has become active again after several months of minimal activity. According to El Comercio, the volcano is emitting columns made of ash, smoke, and steam, as well as registering seismic movements. Since Jan. 31, the volcano has reportedly experienced as many as 100 seismic events every day, including a Feb. 1 movement which lasted for seven hours. El Comercio reports that the various ash columns released by the volcano have reached heights from 700 to 2,000 meters. The volcano's recent activity has been attributed to water seeping into the crater. When the water comes into contact with magma, the it turns into steam, which then creates pressure inside the crater. This pressure is what causes the volcano to expel ash. No damages have been reported as a result of the volcano's most recent activity. A series of similar explosions in September created health problems for many local residents, some of whom suffered from headaches and gastrointestinal problems after breathing the silicon ash released by Ubinas. The Ubinas Volcano, located in the Moquegua region 70 kilometers outside of Arequipa, has displayed a sudden burst of activity. Prior to the September

1.2 million to evacuate in Japan's Mt. Fuji Volcano erupts

Posted on [February 7, 2014](#)

February 7, 2014 – JAPAN - A new evacuation plan outlined in preparation for a possible Mt. Fuji eruption would displace an estimated 1.2 million people. Two-thirds of the number, or around 750,000 people, come from the prefectures of Shizuoka and Yamanashi, while another 470,000 currently reside in Kanagawa. A UNESCO World Heritage site, 3,776-meter Mt. Fuji is an active volcano that has erupted many times in the past. It is situated between Shizuoka and Yamanashi prefectures, and also near Kanagawa. A hazard map for the volcano was prepared in 2004 and showed areas which are at high risk of being affected by volcanic ash. Notable areas in the three prefectures are populated with wooden houses, in which locals reside. Should the volcano erupt, these houses are at risk of being crushed under heavy volcanic ash that gets its weight after absorbing rain in the atmosphere. An estimated 406,000 people from Kanagawa, 62,000 in Shizuoka, and 1,000 in Yamanashi would be affected by heavy ash measuring 30 centimeters or more. A bigger number of around 8.85 million living in other areas of the three prefectures may have their health at risk with at least 2 cm of volcanic ash. While the direct effect of volcanic ash on the population varies on other factors such as wind direction, the Meteorological Agency may still issue a strict warning based on its observations and simulations. Meanwhile, an evacuation plan for when lava flows shows the area within the volcano divided into five parts, and dependent on the time the lava is expected to reach their towns. The current evacuation plan drawn does not include volcanic eruptions, which may happen after a major earthquake comes from the Nankai Trough in the Pacific Ocean. **-JDP**

Volcano in Ecuador causing crop shortage, rising prices

By Nicole Mortillaro Global News

Watch the video above: Thick ash coats the countryside as an Ecuadorian volcano continues to erupt.

After a week of eruptions, the Tungurahua volcano in Ecuador has damaged thousands of hectares of crops, leaving a feed shortage for 110,000 head of livestock.

New suspected bird flu cases reported in S. Korea

2014/02/01 20:39

SEOUL, Feb. 1 (Yonhap) -- Two new suspected bird flu cases were reported in South Korea Saturday, stoking concerns that the highly pathogenic poultry disease may be spreading in the country, the agriculture ministry said.

According to the ministry, the additional suspected cases were reported at a chicken farm in the southern port city of Busan, and a duck farm in Jincheon, 90 kilometers south of Seoul.

A virulent H5N8 strain of avian influenza has so far been confirmed in 27 cases in South Korea since it was first detected on Jan. 16 in Gochang, 300 kilometers south of Seoul.

More than 2.4 million chickens and ducks have so far been culled.

The government has pointed to migratory birds as the original source of bird flu after the H5N8 virus was identified in a group of wild ducks found dead Jan. 17 at a reservoir near a duck farm that reported the first outbreak of AI. The highly pathogenic strain of bird flu has since been identified in 13 other cases that involved wild birds.

Health officials said the H5N8 strain, unlike a few other strains of bird flu, poses no immediate threats to humans. No human infection of the strain has been reported, they said.

P5.2M worth of tilapia hit in Lake Sebu fish kill

By [MindaNews](#) on February 5 2014 3:30 pm

GENERAL SANTOS CITY (MindaNews / 5 Feb) – Around P5.2-million worth of tilapia have been devastated as another fish kill hit anew portions of the critical Lake Sebu in South Cotabato in the last three weeks.

Rudy Muyco, Lake Sebu town's lake warden, said Wednesday the continuing fish kill has already destroyed a total of 68.291 metric tons (MT) of fingerlings and adult tilapia from fish cages situated in the lake's eastern and western section.

Citing the prevailing market prices, he valued the damage at P85 per kilo for the adult tilapia and P150 for the hybrid fingerlings.

As of Wednesday, he said the fish kill already affected around five hectares of fish cages and a total of 54 operators.

"The fish kill is still ongoing in some portions of the lake and the situation might get worse in the coming days due to the erratic weather condition," he told MindaNews on the phone.

Estuary fish kill numbers put at 10,000 plus

Posted Thu 6 Feb 2014, 3:00pm AEDT

The number of fish killed in the Vasse-Wonnerup Estuary this week has been revised to more than 10,000.

MAP: [Busselton 6280](#)

City of Busselton workers spent yesterday cleaning up the dead fish, mostly mullet, around the Vasse floodgate area.

The Department of Water says high levels of toxic algae are present in the waterway, which is likely to have caused the fish deaths.

The department says the oxygen levels, which were blamed for the fish kill of the same size last year, all appeared normal this time.

Findings of an independent review into the waterway's management are set to be handed down this month.

by Wawmeesh G. Hamilton - Alberni Valley News
posted Feb 5, 2014 at 6:00 PM

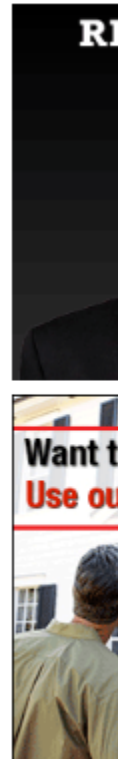

A virus outbreak has killed 60,000 juvenile steelhead at Robertson Creek Hatchery and prompted the involvement of the Canadian Food Inspection Agency.

Fisheries and Oceans Canada has confirmed that there was an outbreak of Infectious Haematopoietic Necrosis (IHN) virus at the Robertson Creek Hatchery.

The virus was diagnosed in January after extensive laboratory testing, said Fisheries and Oceans Canada (DFO) spokesperson Carrie Mishima, who only responded to questions from the News by e-mail.

The virus has infected more than 60,000 juvenile steelhead at the hatchery, which have since been destroyed, officials said.

Hatchery staff became aware of the outbreak after noticing higher than normal mortalities in juvenile steelhead. Staff noticed signs of the virus and initiated lab tests.

URUMQI - Continuous snowstorms in northwest China's Xinjiang Uygur Autonomous Region have killed more than 300 livestock and disrupted the lives of 13,000 people, the local government said Saturday.

So far, 900 people have been relocated after heavy snowstorms and snowslides have toppled 150 houses and damaged another 4,630 in seven counties or cities of the region's Kazak Autonomous Prefecture of Ili, according to a statement issued by the prefecture government.

"It snowed almost every day during the Spring Festival holiday, and the accumulated snow crushed the cattle barn and the vehicle shed," said Ma Shaorong, a resident with the prefecture's Yining City.

Eight people were injured in 25 avalanches along the highway between Sayram and Guozigou, two tourism resorts, between January 27 and February 1. It snowed continuously for 119 hours and reached up to 2 meters near Guozigou, said the statement.

According to the weather department of Xinjiang, further snow is expected in the following days in the northern part of the region.

RAUB: Thousands of fish in Sungai Bera and Sungai Serting in the Bera area near here were found dead in the past week from poisoning or bombing activities by irresponsible individuals out to harvest fish.

This has threatened the livelihood of Orang Asli residents and settlers of the Triang Felde Cluster, who depend on catching fish from the two rivers for consumption and sale.

"They take advantage of the drop in the water level in the current draught season to harvest fish using poison or explosives," said one of the Orang Asli residents, Deris a/l Panjang, 54, to Bernama, here, on Saturday.

He said thousands of dead fish such as patin liar (wild silver catfish), baung (Mystus SPP catfish), lampam (carp) and kerai (Puntius daruphani) littered the surface of the rivers due to the illegal acts.

A settler from Triang Satu Felde, Ahmad Nazri Che Omar, 51, said, they dared not catch the remaining fish in the rivers fearing they could be poisoned and had resorted to seeking fish in nearby marshes for their own consumption.

Meanwhile, Kemayan assemblyman Mohd Fadzil Othman in urging the authorities to act against the culprits, also wanted the Village Security and Development Committee and the public to report to the authorities if they find out about illegal activities to poison fish in their areas.

Mohd Fadzil also advised the Orang Asli staying near the rivers against using water from the rivers for consumption as it could be poisoned.

A real extermination, with millions of dead bees. Beekeepers Association of the Region (AARM) yesterday reported the death of "several million bees" between Cieza and Calasparra, a catastrophe which, besides destroying the livelihood of at least seven farms threatens the pollination stone fruit crops in the area. The association has already been made in the knowledge of the Civil Guard.

We have been hit very hard, as throughout the region a population of about 30 million bees is estimated, known taxonomically as *antófilos* literally "flower lovers". According AARM, mass-extinction responding according to their evidence—an agricultural insecticide spraying. Beekeepers have been detected so far affected 1,200 hives with swarms one of them, but industry sources say many more cases are beekeepers have not yet inspected their settlements

Witnesses alerted the AARM arrival of mass deaths of hundreds of hives between Vega Alta and the Northwest, specifically between the municipalities of Cieza and Calasparra. The affected, on both sides of the road that runs between the Venta del Olivo and Calasparra area has over a thousand hives.

If we consider that each hive has a population of about 30,000 bees that had died only 15% of each, the low amount to about 5 million, although the figure is presumed much higher, according to Carlos Zafra, one of the leaders of the group said.

MURCIANAS BEES

About 90,000 hives across the region, with an estimated 30 million copies population.

150 families of beekeepers live in exclusive craft.

95% of the profit of the business is derived from the production of honey. The rest is for the pollination of crops, particularly fruit and melons Vega in the Campo de Cartagena.

ووصل الثلج في بعض المناطق الي 25 سم وأكثر

بالنسبة لموضوع الثلج الذي لا ينصهر بسهولة المرة الماضية

هذا الموضوع تكلم عنه كثيرين في انحاء العالم وبخاصة أمريكا وألف الكثيرين حوله نظرية

المؤامرة وان الحكومات تفعل هذا وطائرات ترش مواد تشبه الثلج وغيره من الكلام الغير علمي

الذي لا اقبله لأنه لا يوجد دليل عليه وأيضا كان هناك رد على هذا الامر من جهات مختلفة

بعضها حكومي بالتكذيب. فأريد ان أوضح بعش الأشياء

أولا انا قلت انه بسبب ارتفاع نسبة التلوث ولكني لم أقول بهذه المؤامرات بل انا لست مؤيد للذين

يقولوا انه بفعل فاعل لأنه لا يوجد دليل عليه وبخاصه انتشار هذه الظاهرة في ثلج كثير في بلاد

كثيرة.

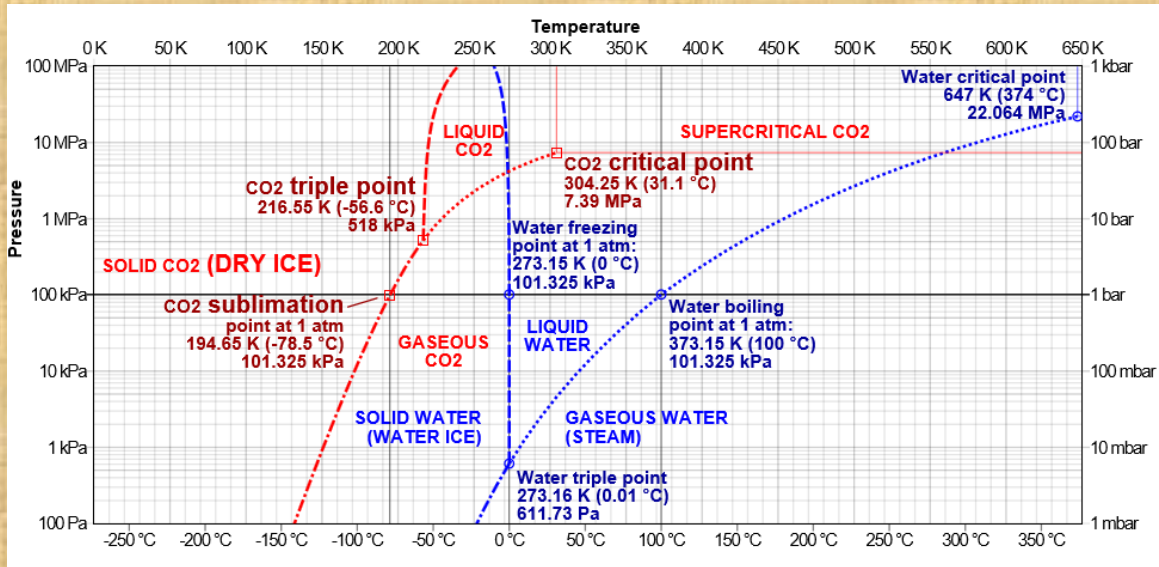

ثانيا انا أيضا ضد من يريد ان يتفه من هذا الموضوع ويقول انه كذب وملفق وجهل وان الثلج

طبيعي ولا يوجد فيه أي شيء غريب. فانا أؤيد انه امر يستحق الانتباه ودراسة محايدة.

بعض محاولات الرد من جهات سواء حكومية او غيرها قالوا انه طبيعي جدا وعدم اسالته لانه

يتحول بخار بظاهرة التسامي وهذا حسب معلومات ضعفي خطأ لان ظاهرة التسامي تحدث تحت

تفريغ وضغط اقل بكثير من الضغط الجوي فهذا تفسير خطأ

فالمياه تمر من الحالة الصلبة الي السائلة الي الغازية برفع درجة الحرارة في الضغط الجوي ولكن

بتقليل الضغط الي 1\100 ممكن يتحول ثلج لغاز بدون ان يمر بالحالة السائلة

التفسير الثاني وهو ان الثلج Snow لانه هش يمتص المياه ويتحول الي ثلج Ice تدريجيا فلا

يسيل بسهولة هذا الي حد ما صحيح ولكنه له حدود ولا يصل الي ان تنكمش كرة ثلج الي اقل من

الربع دون ان تبدأ تسيل

بل أيضا لا نري فيه الا تحول بسيط من سنو الي ايس

وأیضا هذا لا یفس رائحة احتراق بولیمرات التي شمها بوضوح كل من قام بهذه التجربة

وأیضا لا یفسر لماذا درجة حموضته PH هي 4.4

ولكن مع هذا ان لا اتفاق مع من یقول انه ليس بثلج أصلا بل هو مركبات مرشوشة فانا لست مع

نظرية المؤامرة في هذا الامر فهذا ليس صحيح فهو لا یزال ثلج مائي ولكني فقط أقول إن نسبة

التلوث به مرتفعة.

ودليلي على ارتفاع التلوث في الثلج

فبعض الثلوج التي تساقطت في سيبيريا بها ثلج اسود اللون

[Omsk](#) - Residents of the Siberian city of Omsk have been alarmed by black snow which has fallen twice this week. As black snow covered the ground concerned calls were made to the local environmental watchdog.

The [Moscow Times](#) reported that the black snow was first noticed on Wednesday, followed by further black snow on Thursday. Although residents of Omsk were told the abnormally coloured snow presented no

health threat, concerned residents made calls to the Federal Inspection Service for Natural Resources, Rosprirodnadzor.

A spokesperson for Rosprirodnadzor said "Calls about the strange snow keep on coming, indeed, from the district's residents. A laboratory is underway to the site to take samples" the [Moscow News](#) reported.

MOSCOW, February 9 (RIA Novosti) – Black snow covered the ground in a city in Siberia Sunday, raising concerns among local residents, Russia's environmental watchdog said.

This is not the first time that oddly-colored snow has fallen in the West Siberian city of Omsk.

Black snow appeared in the region last winter twice in December and was likely caused by a local thermal power station, TPP-5, that was working at overload capacity, Rosprirodnadzor said.

Kansas to Maine: Snowstorm to Impact More Than 100 Million

Posted on February 4, 2014

A major winter storm with heavy snow, ice and a wintry mix will reach from the central Plains to the Midwest and Northeast spanning Tuesday night and Wednesday. It will hit barely after some people had time to dig out from two prior storms in the Midwest and the Monday storm in the Northeast. By the time the storm has ended it will have directly affected more than two dozen states and at least 100 million people with snow and/or ice. Travel delays and disruptions to daily activities are likely. The storm will hit especially swiftly and hard over part of the central Appalachians to New England. More than 1,700 flights were canceled and another 4,100 flights were delayed as a result of the winter storm. The storm has the potential to drop 13 inches or more of snow on portions of Kansas, Missouri, Illinois, Indiana, Ohio, Pennsylvania, New York, Massachusetts, Vermont, New Hampshire and Maine. In part of the Northeast, the bulk of the snow will fall in six hours or less. Some areas are expected to see more than a foot of snow from northeastern Pennsylvania to southern New Hampshire. The storm was hitting Texas, Colorado, Oklahoma, Arkansas, Kansas, Missouri, Nebraska, Iowa and Illinois Tuesday. There is a long list of major cities that can receive enough snow to shovel and plow. These include Kansas City, Mo.; St. Louis; Chicago; Indianapolis; Cleveland; Detroit; Boston; Scranton, Pa.; Hartford, Conn.; and Buffalo, N.Y. Accumulating snow will also fall on the Canada cities of Toronto, Montreal and St. John, New Brunswick. A long stretch of the I-70, I-80 and I-81 corridors will be hit by the storm as it rolls northeastward.

Storms Continue to Batter UK and Ireland

By Eric Lelster, Meteorologist
February 05, 2014; 5:00 AM

[Share](#) | [f](#) [t](#) [in](#) [g+](#)

Yet another storm brought very strong winds and downpours to much of Ireland and the United Kingdom from Tuesday into Wednesday.

Winds over 50 mph were common across southwest and southern England with gusts surpassing 60 mph in Cornwall and the Channel Islands.

Winds also surpassed 50 mph across parts of southern and eastern Ireland, including Dublin. Strong winds also buffeted western and northern France.

More than 7,000 people are without power across southwest England and southern Wales, according to [BBC News](#). Many train services have been cancelled due to the weather while some sections of track have been destroyed and could take several weeks to repair.

More Federal Privileges to Extend to Same-Sex Couples

WASHINGTON — The federal government will soon treat married same-sex couples the same as heterosexual couples when they file for bankruptcy, testify in court or visit family in prison.

Attorney General [Eric H. Holder Jr.](#) was preparing to issue policies aimed at eliminating the distinction between same-sex and opposite-sex married couples in the federal criminal justice system, according to a speech given at a Saturday event organized by a prominent gay-rights group.

“In every courthouse, in every proceeding and in every place where a member of the Department of Justice stands on behalf of the United States, they will strive to ensure that [same-sex marriages](#) receive the same privileges, protections and rights as opposite-sex marriages,” Mr. Holder’s said.

Central VA congregation worships nude

Posted: Feb 10, 2014 12:52 AM MST

Updated: Feb 10, 2014 8:18 AM MST

By Curt Autry - bio | email

SOUTHAMPTON, VA (WWBT) - About an hour's drive south of Richmond, there's a small congregation that doesn't care about "material" things. They worship the same way we were all brought into this world, naked.

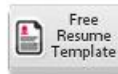

Even in February, when temperatures can average in the 20s, members show up in various forms: some fully clothed, others topless, many still completely nude.

Pastor Allen Parker says it's not about the clothes, or lack thereof. He says it's about baring his soul to Christ and leading his flock down that path of righteousness, no matter what they're wearing.

Hawaii lawmaker renews fight to end or revise controversial sex ed program

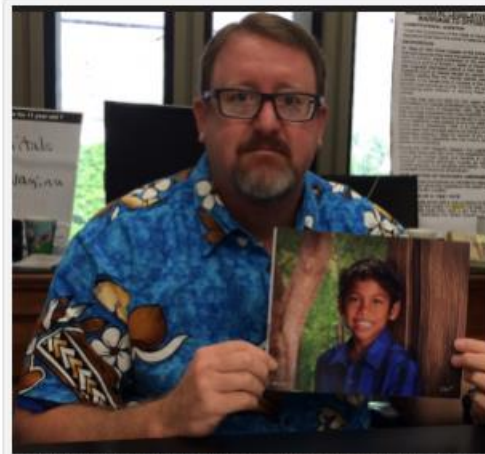

BY MALIA ZIMMERMAN - HONOLULU — State Rep. Bob McDermott, who enrolled his eight children in Hawaii's public schools, doesn't want his 11-year-old son exposed to a controversial taxpayer-funded sex education program.

That program is taught in 12 public schools across the state, and the **Hawaii Department of Education** is planning to expand the curriculum to others.

That's spurred McDermott to renew his fight to get the program revised or pulled altogether. He's releasing a 21-page report Monday entitled "**The Pono Choices Curriculum: Sexualizing the Innocent**" detailing his concerns. He also plans to make a plea to the **Hawaii Board of Education** at its Tuesday meeting, and hold a legislative briefing Wednesday evening for parents.

The 10-hour program, called Pono Choices (pono is a Hawaiian word that translates to "the right way"), is designed for youth aged 11 to 13. It has been taught to 1,700 Hawaii middle school children through an \$800,000 pilot program.

McDermott said the program is "medically inaccurate" and not biology based, and that it teaches children about topics such as anal sex, sex with multiple partners and how to put on a condom — using a cucumber or wooden replica of a penis.

INAPPROPRIATE? Bob McDermott doesn't want his 11-year-old son exposed to Hawaii DOE'S sex education curriculum.

The Chinese are preparing to deploy submarines armed with nuclear missiles that will patrol the northern Pacific Ocean and come within range of at least two US states, according to a new report from the US Navy.

Tags

[Arms](#), [China](#), [Nuclear](#), [Politics](#), [Security](#), [USA](#), [War](#)

The US Naval Institute (USNI) reported that the People's Liberation Army Navy (PLAN) has tapped the Jin-class nuclear ballistic submarines to begin patrols in 2014. The subs will carry intercontinental range missiles that are thought to have a range of no less than 14,000 kilometers (8,699 miles) and can deliver a single or multiple warheads.

"With a range in excess of 4,000 [nautical miles], the JL-2 submarine launched ballistic missile (SLBM), will enable the JIN to strike Hawaii, Alaska and possibly western portions of CONUS from East Asian waters," Office of Naval Intelligence Officer Jesse Karotkin wrote in his testimony last month to the US China Economic Security Review Commission.

US vows to defend Japan against China

By Shaun Tandon
February 7, 2014 3:31 PM

Washington (AFP) - Secretary of State John Kerry vowed Friday that the United States would defend Japan against attack including over islands claimed by China as tensions boil between the Asian powers.

Kerry, who said he would visit China next week, met in Washington with Japanese Foreign Minister Fumio Kishida and reaffirmed the 1960 treaty that commits the United States to protect its ally.

"That includes with respect to the South China Sea," he said, before correcting himself to say the East China Sea, where China and Japan have conflicting claims.

Fears of conflict rose in November when China imposed an Air Defense Identification Zone over much of the East China Sea.

Beijing says it now requires notification from planes crossing a group of islands administered by Tokyo, known in Japanese as the Senkaku and in Chinese as Diaoyu.

"The United States neither recognizes nor accepts China's declared East China Sea ADIZ and the United States has no intention of changing how we conduct operations in the region," Kerry said.

US may deploy B-52 in event of a Diaoyutai conflict: Global Times

Staff Reporter | 2014-02-09 | 16:23 (GMT+8)

A US B-52 bomber. (Photo/USAF)

The United States may deploy its B-52 strategic bomber to defend Japan's administration of the disputed Diaoyutai islands (Senkaku in Japan, Diaoyu in China) in the East China Sea if China were ever to invade the islands, according to China's state-run Global Times, citing Japanese media reports.

The US B-52 bomber, the same aircraft spotted over China's air defense identification zone (ADIZ) last year, could potentially be deployed to the area once again to conduct strategic bombings against the Chinese from its airbase at Guam.

China's DF-41 missile

BY: Bill Gertz Follow @BillGertz

February 10, 2014 4:33 pm

China's military recently disclosed a new photo of its longest-range mobile intercontinental ballistic missile (ICBM), a key element of Beijing's large-scale strategic nuclear buildup.

The photograph of the missile reportedly leaving a manufacturing plant in China was posted online Jan. 31 in what a military enthusiast website stated was the transfer of the

missile from a factory to a military unit.

The photograph shows the mobile missile covered in blue tarp and escorted by security police from the factory.

The Chinese military frequently discloses such images online as part of efforts to highlight its nuclear forces, among the most secret elements of Beijing's military forces.

According to the online posting by a user identified only as "witten," the missile was described as the Second Artillery Corps' Dong Feng-41 (DF-41) ICBM.

The bulletin board stated that the missile is considered China's SS-27 ICBM, a reference to Russia's road-mobile Topol-M missile.

**IRAN SAYS WARSHIPS HEADED
CLOSE TO US BORDERS**

TEHRAN, Iran (AP) -- Iranian warships dispatched to the Atlantic Ocean will travel close to U.S. maritime borders for the first time, a senior Iranian naval commander said Saturday.

The commander of Iran's Northern Navy Fleet, Admiral Afshin Rezayee Haddad, said the vessels have already entered the Atlantic Ocean via waters near South Africa, the official IRNA news agency reported.

The fleet, consisting of a destroyer and a helicopter-carrying supply ship, began its voyage last month from the

Iranian TV airs simulated bombing of Tel Aviv and US aircraft carrier, All the while Warships headed to US Border

Posted on February 8, 2014

Iranian state TV on Friday ran a documentary featuring a computerized video of Iran's drones and missiles bombing Tel Aviv, Haifa, Ben Gurion Airport and the Dimona nuclear reactor in a hypothetical retaliation for an Israeli or American strike on the Islamic Republic. Iranian drones and missiles are also shown carrying out simulated strikes on the American aircraft carrier USS Abraham Lincoln, downing American aircraft and striking American military targets in the Persian Gulf. The clip was broadcast amid a clear escalation of anti-American rhetoric and even action by Iran: On Saturday, an Iranian admiral announced that Iran had dispatched warships to the North Atlantic, while Iran's spiritual leader Ayatollah Ali Khamenei denounced the Americans as liars who, while professing to be friends of Iran, would bring down his regime if they could. He also said it was "amusing" that the US thought Iran would reduce its "defensive capabilities." The film, entitled "The Nightmare of Vultures," opens with Supreme Leader Khamenei addressing military academy graduates in 2011, warning: "Anybody who thinks of attacking the Islamic Republic of Iran should be prepared to receive strong slaps and iron fists from the Armed Forces." "And America, its regional puppets and its guard dog – the Zionist regime – should know that the response of the Iranian nation to any kind of aggression, attacks or even threats will be a response that will make them collapse from within," the film shows him saying.

Rabbis warn Kerry to stop negotiations "in order to avoid severe Heavenly punishment for everyone involved."

US Secretary of State John Kerry speaks to reporters with Turkish Foreign Minister Ahmet Davutoglu. Photo: REUTERS/Kevin Lamarque

A group of hard-line nationalist rabbis wrote in an open letter to US Secretary of State John Kerry that through his current mediation efforts between Israel and Palestinian negotiators he had declared war against God.

The rabbis warned that the secretary must cease such activities, to avoid divine punishment.

The Stock Market In Japan Is COLLAPSING

By Michael Snyder, on February 4th, 2014

Did you see what just happened in Japan? The stock market of the 3rd largest economy on the planet is imploding. On Tuesday, the Nikkei fell by **more than 610 points**. If that sounds like a lot, that is because it is. The largest one day stock market decline in U.S. history is only **777 points**. So far, the Dow is only down about **1000 points**

during this "correction", but the Nikkei is down **more than 2,300 points**. The Nikkei has dropped more than 14 percent since the peak of the market, and many analysts believe **that this is only just the beginning**. Those that have been waiting for a full-blown stock market collapse may be about to get their wish. Japan is absolutely drowning in debt, their central bank is printing money like crazy and the Japanese population is aging rapidly. As far as economic fundamentals go, there is very little good news as far as Japan is concerned. So will an Asian financial collapse precede the next great financial crisis in the United States? That is the question that many are asking.

والهزة الاقتصادية تزداد عنف

Market Manipulations Become More Extreme, More Desperate

Paul Craig Roberts and Dave Kranzler

Prison Planet.com

February 8, 2014

In two recent articles we explained the hows and whys of gold price manipulation. The manipulations are becoming more and more blatant. On February 6 the prices of gold and stock market futures were simultaneously manipulated.

On several recent occasions gold has attempted to push through the \$1,270 per ounce price. If the gold price rises beyond this level, it would trigger a flood of short-covering by the hedge funds who are "piggy-backing" on the bullion banks' manipulation of gold. The purchases by the hedge funds in order to cover their short positions would drive the gold price higher.

With pressure being exerted by tight supplies of physical gold bars available for delivery to China, the Fed is growing more desperate to keep a lid on the price of gold. The recent large decline in the stock market threatened the Fed's policy of taking pressure off the dollar by cutting back bond purchases and reducing the amount of debt monetization.

Thursday, February 6, provided a clear picture of how the Fed protects its policy by manipulating the gold and stock markets. Gold started to move higher the night before as the Asian markets opened for trading. Gold rose steadily from \$1254 up to a high of \$1267 per ounce right after the Comex opened (8:20 a.m. NY time). The spike up at the open of the Comex reflected a rush of short-covering, and the stock market futures looked like they were about to turn negative on the day. However, starting at 8:50 a.m., here's what happened with Comex futures and S&P 500 stock futures:
