## والعلامات حتى 20 ديسمبر 2016

Holy\_bible\_1

اكرر اننا لا نحدد مواعيد بل فقط نشجع بعضنا بعضا بقرب مجيء المسيح

وأیضا لا اقصد ان اخيف أحد بل من يخاف هو لا يثق في مواعيد الرب

هـدفـي فقط أن نذكر بعضنا باننا نحتاج ان نستعد. والاستعداد ليس فقط قبل مجيء المسيح بل

ايضا قبل الظلمة التي ستسبق مجيؤه ليكون عندنا زيت في مصابيحنا يكفي ان نعبر هذه الظلمة

وتكون مصابيحنا مضيئة وقت مجيؤه او من منا سيسلم وديعته في أي وقت. بمعنى نحتاج من

الان ان نستعد بقوة بأيمان عامل وبتنقية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحنا

لان الظلمة والضيقة اقتربت جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة

لان وقتها جميع زيت سيكون صعب جدا بل أستطيع ان أقول من مثل العذارى انه لن يكون هناك

زيت الا ما جمعته سابقا.

أفضل ان اقول لنفسي ولكم استعدوا الان لأنه اقرب فنكون مستعدين سواء جاء او نحن ان  
سلمنا وديعتنا عن أنى لا اقول انه اقرب لكيلا يقال عني كاذب وانشر اشاعات ولكنه يأتي بسرعة  
بغته. لا اعتقد اي أحد ندم لأنه كان مستعد ومنتظر مجيء المسيح ولم يأتي المسيح في زمنه  
ولكنه انتقل وهو مستعد ولكن كثيرين جدا ندموا على عدم الاستعداد عندما انتقلوا

المسيح قال بعض العلامات مثل

انجيل لوقا 21

21: 10 ثم قال لهم تقوم امة على امة ومملكة على مملكة

21: 11 وتكون زلازل عظيمة في اماكن ومجاعات واوبئة وتكون مخاوف وعلامات عظيمة من

السماء

21: 25 وتكون علامات في الشمس والقمر والنجوم وعلى الارض كرب امم بحيرة البحر والامواج

تضج

21: 26 والناس يغطى عليهم من خوف وانتظار ما يأتي على المسكونة لان قوات السماوات

تتزعزع

21: 27 وحينئذ يبصرون ابن الانسان اتيا في سحابة بقوة و مجد كثير

## سفر اعمال الرسل 2

2: 19 واعطي عجائب في السماء من فوق وآيات على الارض من أسفل دما ونارا وبخار دخان

2: 20 تتحول الشمس الى ظلمة والقمر الى دم قبل ان يجيء يوم الرب العظيم الشهير

2: 21 ويكون كل من يدعو باسم الرب يخلص

لماذا قال المسيح بعض العلامات؟

أولا لكيلا نرتاع

انجيل متى 24

مت 24: 6 وسوف تسمعون بحروب واخبار حروب **لا ترتاعوا** لأنه لا بد ان تكون هذه

كلها ولكن ليس المنتهى بعد

ثانيا لنؤمن

إنجيل يوحنا 14: 29

وَقُلْتُ لَكُمْ الْآنَ قَبْلَ أَنْ يَكُونَ، حَتَّى مَتَى كَأَن تُوْمِنُونَ.

ثالثا لننتبه ونستعد

انجيل لوقا 21

28 وَمَتَى ابْتَدَأَتْ هَذِهِ تَكُونُ، فَاَنْتَصِبُوا وَاَرْفَعُوا رُؤُوسَكُمْ لِأَنَّ نَجَاتَكُمْ تَقْتَرِبُ.».

COMMENTS

A "NOISE like a thunder" was reported by shocked tourists and residents when this massive meteor fireball smashed into earth at 72,000 kmph.

Witnesses described "the earth moving" comparing the tremendous impact in southern Spain to a small earthquake or explosion.

## Earth is NOT prepared for a surprise asteroid strike: Nasa warns 'there's not a lot we can do about it at the moment'

- Nasa scientist, Dr Joseph Nuth spoke about the issue at a conference this week
- He said the warning time is not long enough to launch a deflection mission
- He says that a new interceptor rocket could be designed to launch within a year to deflect an asteroid and prevent it hitting Earth

While the possibility of a catastrophic asteroid slamming into Earth is extremely rare, it may only be a matter of time before this threat becomes a reality.

But experts have warned that humans are not prepared for an asteroid impact, and should one head for Earth, there's not much we can do about it.

A **Nasa** scientist has said that our best hope is building an interceptor rocket to keep in storage that could be used in deflection missions.

Residents in a Chinese village were left baffled after an unknown object had apparently fallen from the sky and left a big hole on the ground.

They said the object landed on the top of the mountain with a loud bang on December 12 in Zhangjiapan village, Shaanxi Province, reported **People's Daily Online**.

The crater was burning when some residents rushed over but mysteriously no object was reportedly found in the hole. Some people have linked the incident with a UFO.

ارورا قوية ستحدث في الكريسماس

**AURORAS FOR CHRISTMAS?** Earth is about to enter a solar wind stream that could spark polar auroras from Dec. 20th through 25th. Geomagnetic storming is most likely on Dec. 21st and 22nd with peak storm levels near [G2](#). Sky watchers around the Arctic Circle should be alert for Northern Lights.

The source of the solar wind is a gigantic hole in the sun's atmosphere, now directly facing Earth. Earlier today NASA's Solar Dynamics Observatory photographed the structure, which covers nearly 1/3rd of the solar disk:

This is a "coronal hole"--a region in the sun's atmosphere where the magnetic field opens up and allows solar wind to escape. We've actually seen this coronal hole before--at least twice. It is rotating around with the sun, strobing Earth like a lighthouse every ~27 days. The last two times we experienced its solar wind (Oct. 25-28 and Nov. 23-26), [G1](#)- and [G2](#)-class magnetic storms sparked bright polar auroras. A repeat performance is likely in the week ahead.

Winter has taken the northern United States by storm this weekend – quite literally – with ‘life threatening cold’ hitting the North Dakota area and snow and ice complicating holiday travel in the Midwest and Northeast.

The arctic air that has chilled large swaths of the northern United States for days will culminate this weekend with dangerous cold in Montana and North Dakota as heavy snow falls in other parts of the country, officials said.

People in North Dakota face 'life threatening cold' and the risk of frostbite with exposure of 10 minutes or less, National Weather Service (NWS) said in an advisory.

In the face of extremely Canadian weather, the country is buckling down. While the toughest conditions have hit Atlantic Canada – where the Trans Canada Highway has been closed in places by the RCMP and schools are shutting their doors – the East Coast isn't the only spot being hammered. Severe-weather warnings have been issued in every province plus Nunavut.

"It's a busy day in the weather offices across the country as we're under threat as Canadians are," David Phillips, senior climatologist with Environment Canada, said. "I guess the bit of a shocker is that it's not

Government officials have said rains have killed five people and injured 100 people since they started most of them were struck dead by lightning.

Jeremiah Mphande, spokesperson for the Department of Disaster Management said at least 3000 people have been affected as their houses have been demolished due to heavy rains and hail storm. "Our people are on the ground assisting the affected families," he said.

He however asked people to take precautionary measures by listening to weather information from the Department of Weather and Climate Change. Mphande also asked officials from district councils to submit reports on rains damages to his department as soon as the damages occur.

# BIG ONE FEARS: Huge tear on Ring of Fire could lead to CATASTROPHIC earthquakes & tsunamis

A HUGE tear the size of Tasmania in the Earth's crust sitting above the deadly Ring of Fire could cause devastating earthquakes and mega-tsunamis, experts have warned.

By SEAN MARTIN

03:33, Fri, Dec 16, 2016 | UPDATED: 09:14, Fri, Dec 16, 2016

48

The tear on the sea floor, which is some 60,000 square kilometres in size and sits over the Ring of Fire, has been confirmed north of Australia.

The Ring of Fire is the largest and most active fault line in the world, stretching from New Zealand, all around the east coast of Asia, over to Canada and the USA and all the way down to the southern tip of South America.

There have been numerous deadly earthquakes this year alone across the Ring of Fire, including in Japan, Peru and New Zealand and the discovery of a massive tear above it will only

[\[hide map\]](#) [\[enlarge map\]](#)

**Last update:** 17 Dec 2016

**Typical eruption style:** Highly explosive. Construction of lava domes and large pyroclastic flows caused by dome collapse. One of Kamchatka's largest and most active volcanoes.

**Shiveluch volcano eruptions:** 1739(?), 1800(?), 1854 (Plinian eruption), 1879-83, 1897-98, 1905, 1928-29, 1930, 1944-50, 1964 (sub-Plinian, large dome collapse and debris flow), 1980-81, 1984, 1985, 1986-88, 1988, 1989 1990-94, 1997, 1998, 1999, 1999-ongoing

Shiveluch (Sheveluch) volcano is one of Kamchatka's largest and most active volcanoes, and the one that has had the most violent eruptions.

### Background:

Shiveluch has had over 60 large explosive eruptions during the past 10,000 years. Catastrophic eruptions took place in 1854 and 1956, when a large part of the lava dome collapsed and created a devastating debris avalanche.

It belongs to the Kliuchevskaya volcano group and is about 65,000 years old. Its summit is truncated by a broad 9-km-wide caldera of about 10,000 years of age, breached to the south. Many lava domes dot its outer flanks. Widespread tephra layers from Shiveluch's eruptions are valuable time markers for dating volcanic events in Kamchatka.

Since the first case of the highly pathogenic H5N6 virus was confirmed in mid-November, another 43 cases have been reported and close to 10 million chickens and ducks have already been slaughtered in farms across the country.

In a statement, the agriculture ministry announced plans to cull an additional 2.5 million birds, making it the worst bird flu outbreak since 2014 when nearly 14 million were slaughtered.

The announcement came a day after health authorities issued a second nationwide "standstill" order—effectively restricting workers at poultry farms from moving around the country for 48 hours in an effort to stop the virus from spreading.

## Zika virus: dangerous but still puzzling

by Michael Cook | 17 Dec 2016 |

Nearly half of women infected with the mosquito-borne Zika virus experience some complications with their pregnancy, according to a preliminary study from Brazil. In an article in this week's **New England Journal of Medicine**, researchers describe the results of a study of 125 women who displayed symptoms of a Zika virus infection at some stage in their pregnancy. The study is small, but it is the first involving women who clearly had the virus.

**The results were alarming:** 55% of pregnancies had adverse outcomes after maternal infection in the first trimester, 52% after infection in the second trimester, and 29% after infection in the third trimester. The adverse outcomes include miscarriage, calcifications in a baby's brain, babies who are smaller than normal, and brain hemorrhages. There were four cases of microcephaly among the 125 infected women, or 3.4%.

Overall, 46% of the pregnancies were problematic – and this may underestimate the impact of the virus, Karin Nielsen-Saines of the David Geffen School of Medicine at the University of California, Los Angeles, told Science. "Some babies are damaged invisibly at birth, and as they're supposed to develop the problems will emerge," she said.

However, the data on Zika is puzzling researchers. Another study published this week in **JAMA** about women in the US who were infected came to a very different conclusion. Among pregnant women in the United States with completed pregnancies and laboratory evidence of possible

By Colin Packham | SYDNEY

The United States is ready to confront China should it continue its overreaching maritime claims in the South China Sea, the head of the U.S. Pacific fleet said on Wednesday, comments that threaten to escalate tensions between the two global rivals.

China claims most of the resource-rich South China Sea through which about \$5 trillion in ship-borne trade passes every year. Neighbors Brunei, Malaysia, the Philippines, Taiwan and Vietnam also have claims.

The United States has called on China to respect the findings of the arbitration court in The Hague earlier this

A Chinese warship has captured an underwater US Navy drone right in front of the eyes of the crew of an American ship in the South China sea, prompting a government official to say, 'they stole it'.

The incident has triggered a formal demarche from the United States and a demand for its return, a US defense official told Reuters on Friday.

The Iranian president has ordered the national nuclear agency start developing nuclear propulsion capability for marine transportation. Hassan Rouhani said the move is response to US 'violation' of the nuclear deal with Iran.

Rouhani's Tuesday [order](#) to Ali Akbar Salehi, the head of the Atomic Energy Organization of Iran, says the agency must prepare a project for development of both reactors for maritime use and fuel production for this purpose in three months.

According to the Iranian president, the order was Iran's response to the prolongation of anti-Iranian sanction under the law now called Iran Sanctions Act, which was passed

Attempted car attack (illustration) (Israel Police)

A female Arab terrorist was neutralized Tuesday afternoon during an attempted terror attack against Israeli security forces at the Kalandia checkpoint on the outskirts of Jerusalem.

The terrorist first attempted to ram soldiers operating the checkpoint, approaching them at a high speed.

After she failed to strike her targets, she exited the vehicle while brandishing a knife. Witnesses report the terrorist shouted "Allah Akbar" while charging soldiers.

Security forces on the scene managed to overpower the attacker and take her into custody.

## Britain agrees to license three-parent IVF babies to prevent disease

By Kate Kelland December 15, 2016

By Kate Kelland

LONDON, (Reuters) - Britain on Thursday became the first country to formally license an in-vitro fertilization (IVF) treatment designed to create babies from three people.

Critics of the treatment say it is a dangerous step that will lead to the creation of genetically modified "designer babies".

In a long-awaited decision, Britain's Human Fertilisation and Embryology Authority (HFEA) gave the final go-ahead for the treatment known as mitochondrial transfer, which doctors say could help prevent incurable inherited diseases.

Britain's parliament voted last year to change the law to allow the treatments if and when they were ready for licensing. This latest HFEA decision means the first babies created by the technique in Britain could be born in 2017.

The government's chief scientific adviser, Mark Walport, praised the HFEA's decision as a "careful and considered" assessment which put Britain at the forefront of medical advances.

The technique involves intervening in the fertilization process to remove mitochondria, which act as tiny energy-generating batteries inside cells, and which, if faulty, can cause fatal heart problems, liver failure, brain disorders, blindness and muscular dystrophy.

# Child Protective Services after NYC homeschooler

Monday, December 12, 2016 | Michael F. Haverluck (OneNewsNow.com)

After recently withdrawing her son from public school because of safety and education concerns, a New York City mom went through all the required procedures to homeschool her son, but soon found Child Protective Services (CPS) coming after her.

As a brand-new homeschooling mom, Tanya Acevedo feared that her parental rights would be swept away from her when CPS arrived at her door and entered her house. Excusing herself momentarily, the apprehensive mom called an attorney at the [Home School Legal Defense Association](#) (HSLDA) for legal advice.

"Hello? ... Child Protective Services is in my living room," Acevedo said in a shaken voice when an HSLDA attorney answered the phone. "What should I do?"

Before CPS showed up at her door and prior to seeking legal advice, the concerned mother received counsel and support from her pastor and his wife – both of whom had homeschooled their own children for years.

## No satisfying

Even though she had followed veteran homeschoolers' advice, filled out all the appropriate paperwork and strictly followed all of the school district's protocol to teach from home, CPS still

By Sam Forgione | NEW YORK

The U.S. dollar hit its highest level against a basket of major currencies in nearly 14 years on Wednesday after the Federal Reserve raised interest rates for the first time this year and signaled a faster pace of increases in 2017.

The dollar index hit 102.350, its highest level since early January 2003, after the U.S. central bank raised the target federal funds rate by 25 basis points to between 0.50

## Nigeria: Kebbi Christians face latent pressure to abandon faith

Published: Dec. 13, 2016

While violent attacks on Christians at the hands of Islamist militants Boko Haram and the Fulani herdsmen in the northeast and Middle Belt of Nigeria have captured media attention, the persistent social pressures Christians face elsewhere go mostly unnoticed.

Despite common misperceptions that they are a minority across the north of Nigeria, Christians still form the majority in half of the 12 northern states now all under Islamic law (although they are in theory exempt from Sharia provision), while there are high concentrations (25-50%) in the other northern states.

In a remote community in the north-western, Sharia-governed state of Kebbi, Christians face discrimination and persistent pressure to convert to Islam.

# Indiana School District Ends Prayer During School Programs Following Complaint From Atheist Activists

By Heather Clark on December 13, 2016 - 18 Comments

Photo Credit: Zelman Menash

**NORTH VERNON, Ind.** — An Indiana school district has discontinued all invocations during school programs following a complaint from a prominent professing atheist

organization.

Earlier this year, the Wisconsin-based Freedom From Religion Foundation (FFRF) sent a letter to the superintendent of Jennings County Schools to request that prayer be kept out of district-sponsored events.

It advised that a complainant, who was not named, informed them that students had delivered prayer at the 2014 and 2015 academic honors dinner, and that prayer is also a part of district graduation ceremonies.

"It is unconstitutional for Jennings County Schools to schedule, approve or otherwise endorse prayers or other religious messages," the [letter](#) read. "A prayer

Eddie Metcalf is lost in the crowd as he prays with students. (Keith Whitfield)

A beloved Florida middle-school coach was reprimanded for taking a knee during a student-led prayer on the football field.

Wakulla Middle School football coach Eddie Metcalf did not lead the prayer. He did not recite the prayer. He simply took a knee and bowed his head.

But according to the Wakulla County School Board, that act of reverence is against the law.

"That's not allowable under the law," Superintendent Robert Pearce told **television station WCTV**. "The coach may not participate in the prayer."

I wonder if the school district would've made a fuss if the middle-school coach had taken a knee to protest the national anthem. I reached out to the superintendent, hoping to get an answer to that.

Oxford University is encouraging students to use the gender-neutral pronoun 'ze' instead of 'she and 'he'.

The students' union wrote in a leaflet that the move was intended to reduce the risk of transgender students being offended.

Students hope that the use of 'ze' will continue into university lectures and seminars, reported **The Sunday Times**.

According to Oxford University's behaviour code, using the wrong pronoun to define a transgender person is an offence.
