اكرر هدفي فقط من هذه الخدمة أن نذكر بعضنا باننا نحتاج ان نستعد. والاستعداد ليس فقط قبل مجيء المسيح بل ايضا قبل الظلمة التي ستسبق مجيؤه ليكون عندنا زيت في مصابيحنا يكفي ان نعبر هذه الظلمة وتكون مصابيحنا مضيئة وقت مجيؤه او من منا سيسلم وديعته في أي وقت. بمعنى نحتاج من الان ان نستعد بقوة بأيمان عامل وبتنقية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحنا لان الظلمة والضيقة اقتربت جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة لان وقتها تجميع زيت سيكون صعب جدا بل أستطيع ان أقول من مثل العذاري انه لن يكون هناك زيت الا ما جمعته سابقا.

أفضل ان اقول لنفسي ولكم استعدوا الان لأنه اقترب فنكون مستعدين سواء جاء او نحن ان سلمنا وديعتنا عن أنى لا اقول انه اقترب لكيلا يقال عني كاذب وانشر اشاعات او اخيف البعض

ولكنه يأتي بسرعة بغته. لا اعتقد اي أحد ندم لأنه كان مستعد ومنتظر مجيء المسيح ولم يأتي

المسيح في زمنه ولكنه انتقل وهو مستعد ولكن كثيرين جدا ندموا على عدم الاستعداد عندما

انتقلوا

المسيح قال بعض العلامات مثل

انجيل لوقا 21

21: 10 ثم قال لهم تقوم امة على امة ومملكة على مملكة

21: 11 وتكون زلازل عظيمة في اماكن ومجاعات واوبئة وتكون مخاوف وعلامات عظيمة من

السماء

21: 25 وتكون علامات في الشمس والقمر والنجوم وعلى الارض كرب امم بحيرة البحر والامواج

تضج

21: 26 والناس يغطى عليهم من خوف وانتظار ما يأتي على المسكونة لان قوات السماوات

تتزعزع

21: 27 وحينئذ يبصرون ابن الانسان اتيا في سحابة بقوة و مجد كثير

سفر اعمال الرسل 2

2: 19 واعطي عجائب في السماء من فوق وآيات على الارض من أسفل دما ونارا وبخار دخان

2: 20 تتحول الشمس الى ظلمة والقمر الى دم قبل ان يجيء يوم الرب العظيم الشهير

2: 21 ويكون كل من يدعو باسم الرب يخلص

لماذا قال المسيح بعض العلامات؟

أولا لكيلا نرتاع

انجيل متى 24

مت 24: 6 وسوف تسمعون بحروب واخبار حروب **لا ترتاعوا** لأنه لا بد ان تكون هذه

كلها ولكن ليس المنتهى بعد

ثانيا لنؤمن

إنجيل يوحنا 14: 29

وَقُلْتُ لَكُمْ الْآنَ قَبْلَ أَنْ يَكُونَ، حَتَّى مَتَى كَانَ تُؤْمِنُونَ.

ثالثا لنتنبه ونستعد

انجيل لوقا 21

28 وَمَتَى ابْتَدَأَتْ هَذِهِ تَكُونُ، فَانْتَصِبُوا وَارْفَعُوا رُؤُوسَكُمْ لِأَنَّ نَجَاتَكُمْ تَقْتَرِبُ.»

LOS ANGELES (Reuters) – Southern California cleaned up on Saturday after its biggest storm in years unleashed a wave of rain and snow that killed at least three people and triggered flooding, mudslides, high winds and power outages, officials said.

Vital highways and railways were shut down and sinkholes opened on main roads under the heaviest rainfall in the drought-stricken region in at least five years, according to the National Weather Service.

Worst Case Scenario: 100 Foot Tsunami Would Wipe Out Entire Cities If There Is A Catastrophic Failure Of The Oroville Dam

By Michael Snyder, on February 13th, 2017

The situation at the Oroville Dam has stabilized for the moment, but more storms are coming this week. When those storms arrive, will authorities be able to avoid the kind of catastrophic incident that almost happened over the weekend? As you will see below, it is being admitted that a collapse of the emergency spillway at Lake Oroville would have sent a "30-foot wall of water coming out of the lake" and into local communities. At one point authorities were concerned that such a collapse was imminent, and that is why they ordered the evacuation of nearly 200,000 people. But many are also concerned that more storms could ultimately cause a catastrophic failure of the infrastructure at the dam that would bring about a "worst case scenario". According to the experts, if that were to occur

A reservoir of melting carbon covering an area almost the size of Mexico has been discovered beneath the western US, casting doubt over previous estimates of carbon levels inside the Earth.

The discovery was made by a team from the University of Royal Holloway London using the world's largest array of seismic sensors that identified the carbon from vibrations generated in Earth's upper mantle.

The reservoir is believed to have been formed when a Pacific tectonic plate was forced underneath the western US, according to the research published in *Earth and Planetary Science Letters*.

Taiwan bird flu culls reach nearly 130,000 as H5N6 cases confirmed

Taiwan has culled nearly 130,000 poultry since the start of this year as authorities on Tuesday reported a fresh strain of bird flu cases on the island.

The highly pathogenic H5N6 avian flu has been confirmed in three cities and counties, the Bureau of Animal and Plant Health Inspection and Quarantine said.

"We are very concerned with H5N6, not of the bird-to-human transmission, but that it will become like South Korea where they had to cull around 33 million birds within three months resulting in significant damage to their industry," Huang Tze-chung, the bureau's director general, told a news briefing.

Taiwan can meet about 80 percent of its poultry needs on its own. It imports poultry meat mainly from the United States and exports very little poultry.

According to the bureau, most of the birds culled this year so far were afflicted with the H5N2 and H5N8 strains of the bird flu. A total of 13 poultry farms have been affected this year so far, it said.

But in recent days, confirmed cases of H5N6 bird flu were found on poultry farms in

Bacterial infection linked to rat urine in NYC

UPDATED: FEB 15 2017 10:25PM EST

NEW YORK (FOX5NY) - A cluster of cases of a rare bacterial infection that is spread by contact with rat urine has killed one person and sickened two others in the Bronx. The infection can develop into an illness that affects the victim's kidneys and liver.

The New York City Health Department says all of the cases are linked to one block in the Concourse area of the borough. While one person has died, the other two have recovered and are doing well, according to health officials.

Leptospirosis is a bacterial infection that is most commonly spread by contact with rat urine and is very rarely spread from person to person.

The illness can be serious but is treatable with readily available antibiotics. Two patients in the outbreak were diagnosed in December and one in February.

This is the first cluster ever identified in New York City. The block is home to four schools, two elementary schools, one middle school, and one high school. City officials say they have passed inspections and there is no signs of rodents inside the schools.

US President Donald Trump has been tough on Russia and expects Moscow to "return" the Crimea peninsula to Ukraine, the White House spokesman told reporters.

Addressing the resignation of National Security Adviser Michael Flynn – hounded by the media over his contacts with Russian diplomats prior to Trump's inauguration – Spicer pointed out that Russia "seized" Crimea under the Obama administration and that the Trump-appointed ambassador to the UN Nikki Haley has "strongly denounced the Russian occupation."

China Practices For War With US – Tests Preemptive Missile Strike Against US

14 FEBRUARY, 2017

The increasing tension between the United States and China has been no secret in recent years, but now satellite evidence appears to indicate that China is preparing for a crippling, pre-emptive missile strike in the Pacific. The evidence gleaned from Chinese rocket battery training grounds is easy to miss at first, until the pattern emerges from the targets.

China's Foreign Ministry on Wednesday warned Washington against challenging its sovereignty, responding to reports the United States was planning fresh naval patrols in the disputed South China Sea.

On Sunday, the Navy Times reported that U.S. Navy and Pacific Command leaders were considering freedom of navigation patrols in the busy waterway by the San Diego-based Carl Vinson carrier strike group, citing unnamed defense officials.

JAKARTA, Indonesia — The United States deployed aircraft carrier USS Carl Vinson to patrol the increasingly contentious South China Sea, despite Beijing's warnings not to challenge its sovereignty in the resource-rich sea.

The Navy described Saturday's launch as the beginning of "routine operations" in the South China Sea, China claims most of the sea as its own, despite overlapping territorial and jurisdictional claims from the Philippines, Vietnam, Malaysia, Taiwan and Brunei.

Last week at a news conference, China's Foreign Ministry spokesman, Geng Shuang, denounced advance news of the deployment.

"China has indisputable sovereignty over the South China Sea islands and their adjacent waters," he said. "China respects and upholds the freedom of navigation and overflight in the South China Sea which countries enjoy under international law, but firmly opposes any country's attempt to undermine China's sovereignty and security in the name of the freedom of navigation and overflight."

He added that China urged the U.S. to "refrain from challenging China's sovereignty and security" in the sea.

About 30% of global maritime trade passes through the South China Sea each year, worth \$5.3 trillion, according to the U.S. Defense Department in a 2015 report. The waters are also key fishing resources and are rich in oil and natural gas reserves.

In July, an international tribunal at The Hague, Netherlands, issued a sweeping condemnation of China's claims and conduct in the disputed waters. China said it did

The oldest half-brother of North Korean dictator Kim Jong Un was murdered in Malaysia on Monday, according to a South Korean government official.

Kim Jong Nam, the eldest son of former leader Kim Jong Il, had lived outside the country for years. The official, who asked not to be identified due to government policy, said poison was involved in his death, but provided no other details.

Two unidentified women killed Kim Jong Nam at Kuala Lumpur's airport with a poison needle before fleeing in a taxi, YTN television station reported, citing a government source.

US pledges nuclear defence for Japan, S.Korea after N.Korea missile launch

by Staff Writers
Bonn (AFP) Feb 16, 2017

US Secretary of State Rex Tillerson on Thursday pledged that Washington would use the full range of its arsenal, including nuclear weapons, to defend allies Japan and South Korea against North Korea if needed.

"The United States remains steadfast in its defence commitments to its allies, the Republic of Korea and Japan, including the commitment to provide extended deterrence, backed by the full range of its nuclear and conventional defence capabilities," Tillerson said in a joint statement after meeting the foreign ministers in Bonn.

North Korea has carried out repeated missile launches despite UN sanctions and last year conducted two nuclear tests in a bid to develop a weapons system capable of hitting the US mainland.

Pyongyang said the latest missile tested on Sunday could carry a nuclear warhead.

Seoul said the rocket travelled some 500 kilometres (300 miles) before it came down in the Sea of Japan (East Sea).

The joint statement said Tillerson, South Korea's Yun Byung-Se and Japan's Fumio Kishida "condemned in the strongest terms" the test which was carried out in "flagrant disregard" for multiple UN Security Council

Iran says Israel 'biggest threat' to world peace

Tehran (AFP) Feb 16, 2017 - Iran said Thursday that Israel's atomic arsenal is the biggest danger to world peace, a day after US President Donald Trump vowed to prevent Iran developing a nuclear weapon.

Israel is the "biggest threat to the peace and security in the region and the world," Foreign Ministry spokesman Bahram Ghasemi said, quoted by state news agency IRNA.

Trump had warned Wednesday after meeting Prime Minister Benjamin Netanyahu in Washington that the "threat of Iran's nuclear ambitions" was one of the major security challenges facing Israel.

The US president told reporters that he would do "more to prevent Iran from ever developing - I mean ever - a nuclear weapon".

But Ghasemi dismissed the comments by Trump

Voice of America News reports: "Islamic State propagandists have launched a coordinated online campaign accusing prominent Muslim clerics in the Arab world and the West of betrayal in an apparent bid to delegitimize them, especially in the eyes of younger Muslims.

The terror group says the clerics are collaborating with Arab regimes and the international coalition opposed to IS and are urging supporters as a top priority to kill 'the evil scholars.'

Some analysts suspect the terror group is casting around looking for traitors to explain the collapse of IS's battlefield fortunes and to shape perceptions about the reasons for the fall of the terror group's self-styled caliphate.

Others see the new campaign as linked more immediately to the propaganda struggle being waged between IS and the Iraqi government over the unfolding battle for Mosul in which both sides are questioning the religious and historical legitimacy of the other.

The campaign, titled '*Fight the Imams of Unbelief*' targets prominent clerics by name, including Salafi theologians such

The Era Of Human-Animal Hybrid Chimeras Has Begun

15 FEBRUARY, 2017

(Reported By **Michael Snyder**) Human-animal mutant creatures make for great material for science fiction writers, but we aren't supposed to be creating them in the real world. In so many ways, the technological advancements that we have made as a society are outpacing our ability to handle those advancements, and this field is certainly a glaring example of that reality. Just because we can create human-animal hybrid chimeras does not mean that we should. Genetic modification is a particularly dangerous science, because we are literally tinkering with the future of our planet.

CARSON CITY — State Sen. Becky Harris said a bill to prohibit forced microchipping of people is not as far-fetched as it might seem, because it happens in some places around the world.

Senate Bill 109 would make it a Class C felony to require someone to be implanted with a radio frequency identifier, such as microchips placed in pets.

The idea for the bill came from a constituent, the Las Vegas Republican said.

"As I began to look into the issue, I was surprised with the merit that I believe the issue warrants," Harris told the Senate Judiciary Committee on Monday.

Bees pollinate more than \$15 billion worth of crops in the US each year, but with the population dwindling, experts are searching for new ways to help perform the task.

Now, a student has unveiled a personal robotic bee that mimics how the insects pollinate plants.

Called 'Plan Bee', the drone is a hand-sized yellow-and-black device that stores pollen in its body cavity and releases it later for cross-pollination.

Venezuela's media watchdog has ordered CNN's Spanish-language channel off the air across the country, accusing it of engaging in a propaganda war. Nicolas Maduro said earlier the channel is "sticking its nose" in the country's internal affairs and "manipulating" information.

The Venezuelan National Telecommunications Commission (Conatel) has opened an "administrative sanctioning proceeding" against the CNN Español news channel for allegedly attempting to violate the "peace and democratic stability" of the country.

The sanctions were imposed "due to the content" that has been disseminated by the international news outlet in a "systematic and repeated way" in the channel's daily programming, said a statement released by Conatel.

It Is About Time That We Had A President That Was Willing To Go To War With The Mainstream Media

17 FEBRUARY, 2017

(By **Micahel Snyder**) Thursday afternoon's press conference was perhaps the most memorable moment of Donald Trump's presidency so far. Trump's blistering attack on the media was quite a spectacle, but the truth is that it was desperately needed. For decades, the mainstream media has dominated political discourse in this country no matter who has been in control of the White House or Congress. They have become masters of guiding and shaping public opinion, and in recent years they have

The Trump administration is considering mobilizing as many as 100,000 National Guard troops to round up illegal immigrants, according to a draft memo obtained by AP. The White House said the agency's report is "false," however.

What the AP called "*unprecedented militarization of immigration enforcement*" would affect locations as far north as Portland, Oregon and as far east as New Orleans, Louisiana, according to the 11-page document, purportedly written by Homeland Security Secretary John Kelly.

The proposal would four states bordering on Mexico – Arizona, California, New Mexico and Texas – as well as the seven neighboring states of Arkansas, Colorado,

(INSIDE EDITION) -- Five middle school students are facing charges after allegedly throwing a wooden block at President Donald Trump's motorcade in Florida, police said.

As the president and his motorcade drove from Palm Beach International Airport to Mar-a-Lago, one of the vehicles was with hit with a hard object, according to reports.

The Palm Beach County Sheriff's Office said after the motorcade was finished passing police went back to canvas the area and search for witnesses as well as the object that was thrown.

"The investigation determined that a juvenile from a local middle school confessed to throwing the 2 x 4 at the motorcade," police said in a statement.

The child also told police about four other friends that were involved, according to their report.

Charges will be filed with the Palm Beach County States Attorney's Office, police said.

The Globalists Strike Back With A Major Push Toward A Cashless Society

By Michael Snyder, on February 14th, 2017

Their agenda may be on the rocks in the United States at the moment, but that doesn't mean that the globalists are giving up. In fact, a major push toward a cashless society is being made in the European Union right now. Last May we learned that the 500 euro note is being completely eliminated, and just a few weeks ago the European Commission released a new "Action Plan" which instructs member states to explore "potential upper limits to cash payments". In the name of "fighting terrorism", this "Action Plan" discusses the benefits of "prohibitions for cash payments above a specific threshold" and it says that those prohibitions should include "virtual currencies (such as BitCoin) and prepaid instruments (such as pre-paid credit cards) when they are used anonymously."

This new document does not mention what an appropriate threshold would be for member states, but we do know that Spain already bans certain cash transactions above 2,500 euros, and Italy and France already ban cash transactions above 1,000 euros.

In fact, these days it seems like we can't get through a major awards show or a Super Bowl halftime celebration without being forced to see things that would have been absolutely unthinkable in this country just 50 years ago. Hollywood and Corporate Media are Crusading to Normalize Pedophilia

“The conscious and intelligent manipulation of the organized habits and opinions of the masses is an important element in democratic society. Those who manipulate this unseen mechanism of society constitute an invisible government which is the true ruling power of our country.”

-- Edward Bernays, *Propaganda* (1928)

Political philosopher Noam Chomsky once referred to the mainstream media in the US as the largest and most sophisticated propaganda operation in human history.

The mainstream media, which is owned by just six corporations, does more than just advertise for the pharmaceutical industry: it attempts to shape our values and perceptions.

And now this propaganda machine and its surrogates are attempting to engineer a society where the desire to rape or exploit children — euphemistically called “pedophilia” — is normalized.

The reason this is happening, as we shall see below, is that many of the most powerful media moguls
