والعلامات حتى 7 مارس 2017

Holy_bible_1

اكرر هدفي فقط من هذه الخدمة أن نذكر بعضنا باننا نحتاج ان نستعد. والاستعداد ليس فقط قبل مجيء المسيح بل ايضا قبل الظلمة التي ستسبق مجيؤه ليكون عندنا زيت في مصابيحنا يكفي ان نعبر هذه الظلمة وتكون مصابيحنا مضيئة وقت مجيؤه او من منا سيسلم وديعته في أي وقت. بمعنى نحتاج من الان ان نستعد بقوة بأيمان عامل وبتنقية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحنا لان الظلمة والضيقة اقتربت جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة لان وقتها تجميع زيت سيكون صعب جدا بل أستطيع ان أقول من مثل العذاري انه لن يكون هناك زيت الا ما جمعته سابقا.

أفضل ان اقول لنفسي ولكم استعدوا الان لأنه اقترب فنكون مستعدين سواء جاء او نحن ان سلمنا وديعتنا عن أنى لا اقول انه اقترب لكيلا يقال عني كاذب وانشر اشاعات او اخيف البعض

ولكنه يأتي بسرعة بغته. لا اعتقد اي أحد ندم لأنه كان مستعد ومنتظر مجيء المسيح ولم يأتي

المسيح في زمنه ولكنه انتقل وهو مستعد ولكن كثيرين جدا ندموا على عدم الاستعداد عندما

انتقلوا

المسيح قال بعض العلامات مثل

انجيل لوقا 21

21: 10 ثم قال لهم تقوم امة على امة ومملكة على مملكة

21: 11 وتكون زلازل عظيمة في اماكن ومجاعات واوبئة وتكون مخاوف وعلامات عظيمة من

السماء

21: 25 وتكون علامات في الشمس والقمر والنجوم وعلى الارض كرب امم بحيرة البحر والامواج

تضج

21: 26 والناس يغطى عليهم من خوف وانتظار ما يأتي على المسكونة لان قوات السماوات

تتزعزع

21: 27 وحينئذ يبصرون ابن الانسان اتيا في سحابة بقوة و مجد كثير

سفر اعمال الرسل 2

2: 19 واعطي عجائب في السماء من فوق وآيات على الارض من أسفل دما ونارا وبخار دخان

2: 20 تتحول الشمس الى ظلمة والقمر الى دم قبل ان يجيء يوم الرب العظيم الشهير

2: 21 ويكون كل من يدعو باسم الرب يخلص

لماذا قال المسيح بعض العلامات؟

أولا لكيلا نرتاع

انجيل متى 24

مت 24: 6 وسوف تسمعون بحروب واخبار حروب **لا ترتاعوا** لأنه لا بد ان تكون هذه

كلها ولكن ليس المنتهى بعد

ثانيا لنؤمن

إنجيل يوحنا 14: 29

وَقُلْتُ لَكُمْ الْآنَ قَبْلَ أَنْ يَكُونَ، حَتَّى مَتَى كَانَ تُؤْمِنُونَ.

ثالثا لنتنبه ونستعد

انجيل لوقا 21

28 وَمَتَى ابْتَدَأَتْ هَذِهِ تَكُونُ، فَانْتَصِبُوا وَارْفَعُوا رُؤُوسَكُمْ لِأَنَّ نَجَاتَكُمْ تَقْتَرِبُ.»

HOLIDAY ON THE SUN Nasa to launch Solar Probe Plus mission to the surface of the SUN to protect Earth from 'huge solar event'

Massive solar flares have the potential to shut down power grids on Earth and wreak havoc on navigation systems

BY MARGI MURPHY | 27th February 2017, 12:10 pm

 26 COMMENTS

NASA is gearing up to send a robot to the Sun to help prepare for a "huge solar event" that could wreak havoc on Earth.

The Solar Plus Probe will come within four million miles of the sun's surface, facing heat and radiation like no spacecraft has endured before.

Residents Report Fireball Exploding Over Texas

FEBRUARY 28, 2017

Reports indicate that a bright fireball was seen flying over an area between Abilene to Snyder, Texas on February 26, 2017 at around 9 p.m. And the meteor suddenly disintegrated in a loud boom! Did you also see the bright fireball exploding in a loud boom? People around Snyder, Texas reported hearing a boom like that of a transformer failing or a sonic boom that a

THE SOLAR WIND CONTINUES TO BLOW: Solar wind speeds are topping 700 km/s on March 3rd as Earth continues its 3-day journey through a stream of gaseous material flowing from [a hole in the sun's atmosphere](#). This is sparking geomagnetic storms and beautiful auroras around the Arctic Circle. Rayann Elzein took this picture last night from Inari, Finland:

"The solar wind continues!" says Elzein, "Auroras were visible on the evening of March 2nd as soon as the sky became dark. Very strong auroras filled the sky. I quickly lost count of all the bright bands and fast coronas that appeared above us."

The display Elzein witnessed took place during a relatively minor G1-class magnetic storm. One night earlier, March 1st, an even stronger G2-class storm occurred, "and the auroras were epic," reports M-P Markkanen, who photographed the lights spilling over a 1356m high mountain called Otertinden in Storjford, Norway:

SOLAR EXPLOSION MISSES EARTH: A coronal mass ejection (CME) billowed away from the eastern limb of the sun during the late hours of **March 5th**. Because the explosion was so so far off the sun-Earth line, it is unlikely to affect our planet. [Watch the movie](#), and [note Mercury](#) gliding past the sun.

INTENSE PINK AURORAS: Yesterday, the solar wind was supposed to slacken, prompting auroras around the Arctic Circle to fade. Instead, the wind quickened and there was an explosion of pink. "The display on March 5th was so intense, even the fjords changed color," reports Markus Varik, who sends this picture from Tromsø, Norway:

"The auroras were amazingly colorful, and I was able to catch their reflections in the nearly still waters of the fjord," Varik explains.

Is Something Strange Happening Inside The Earth?

By Michael Snyder, on February 28th, 2017

Why are "giant fountains of lava" suddenly pouring out of some of the most dangerous volcanoes on the entire planet, and why are so many long dormant volcanoes suddenly roaring back to life? The spectacular eruption of Mt. Etna in Italy is making headlines all over the world, but it is far from alone. According to [Volcano Discovery](#), 35 major volcanoes either are erupting right now or have just recently erupted, and dozens of other are stirring. So what is causing this upsurge in volcanic activity? Is something strange happening inside the Earth?

According to the [USGS](#), magma is "molten rock underground", and lava is molten rock "that breaks through the Earth's surface". Right now, something is pushing magma up through the crust of the Earth at a number of key spots around the planet. On the island of Sicily, the "giant fountains of lava" that are coming out of Mt. Etna can be seen 30 kilometers away...

deepfatsolution.com

An earthquake swarm started under Bardarbunga volcano, Iceland during the early morning hours of Wednesday, March 1, 2017. The swarm started at 08:57 with M4.1 (the strongest) and ended at 10:24 UTC. There were no additional earthquakes registered over the next 24 hours.

Bryndís Ýr Gísladóttir, a specialist in natural hazards with the Icelandic Met Office told media that five powerful earthquakes were detected in the caldera of Bardarbunga volcano on March 1, 2017.

The sequence started with M4.1 at 08:57 UTC at a very shallow depth of 0.1 km (0.06 miles) and continued with M2.3 at a depth of 2.3 km (1.5 miles) within the first minute. In total, there were 5 earthquakes with magnitude above 3.0.

N. Korea has large chemical weapons stockpile: Seoul

by Staff Writers
Seoul (AFP) Feb 24, 2017

North Korea has up to 5,000 tonnes of chemical weapons, South Korean experts said Friday, including the toxin used to assassinate its leader's half-brother.

Traces of VX -- a nerve agent listed as a weapon of mass destruction by the United Nations -- were detected on swabs from the face and eyes of Kim Jong-Nam, who was poisoned at Kuala Lumpur's international airport last week, Malaysian police said Friday.

Malaysian detectives are holding three people -- women from Indonesia and Vietnam, and a North Korean man -- but want to speak to seven others, four of whom are believed to have fled to Pyongyang.

South Korea's defence ministry said in its 2014 Defence White Paper that the North began producing chemical weapons in the 1980s and estimated that it has about 2,500 to 5,000 tonnes in stock.

North Korea has chemical weapons production facilities in eight locations including the northeastern port of Chongjin and the northwestern city of Sinuiju, it said in the 2012 edition of the document.

"North Korea is believed to have a large stockpile of VX, which can easily be manufactured at low cost," defence analyst Lee Il-Woo at the private Korea Defence Network told AFP.

Developed some 100 years ago, VX can be produced at small laboratories or facilities producing pesticides, he said.

Washington (AFP) Feb 27, 2017

Senior US, South Korean and Japanese officials met on Monday to discuss how better to enforce international sanctions against North Korea's nuclear weapon and ballistic missile programs.

The Washington talks came shortly after United Nations experts warned that Pyongyang has been flouting existing sanctions, and just as China's top diplomat held talks at the White House.

US special representative for North Korea policy Joseph Yun met senior Japanese diplomat Kenji Kanasugi and South Korea's special representative Kim Hong-kyun at the State Department.

In a statement, they condemned the North's "flagrant disregard for multiple United Nations Security Council resolutions prohibiting its ballistic missile and nuclear programs."

This, they argued, "requires strong international pressure on the regime" and they called on other countries to "fully and effectively implement their obligations" under UN resolutions.

This was a tacit appeal to China, overwhelmingly North Korea's main trading partner, after a UN experts report last week

EU expands North Korea sanctions

Brussels (AFP) Feb 27, 2017 - The European Union imposed additional sanctions on North Korea on Monday over nuclear and ballistic missile tests carried out in defiance of the UN Security Council.

The decision, implementing a November UN resolution, comes with North Korea in the international spotlight after the assassination in Kuala Lumpur airport of Kim Jong-Nam, the estranged half-brother of leader Kim Jong-Un.

The European Council, comprising the EU's 28 member states, said the new measures include restrictions on trade in coal, iron and iron ore, plus a ban on imports of copper, nickel, silver and zinc from North Korea.

The sale of new helicopters and vessels to North Korea was banned, while tighter controls were introduced on the transport, finance and goods sectors.

Russia and China have vetoed a UN Security Council proposal that would have banned the supply of helicopters to the Syrian government, and blacklisted eleven Syrian military commanders over allegations of toxic gas attacks.

The proposed resolution, put forward by Britain, France and the United States, was put to the vote of the international body on Tuesday despite an earlier pledge by Russia to use its power to quash the proposal, the seventh time it has done so since the conflict first erupted in Syria since 2011.

U.S. Navy ship changes course after Iran vessel interaction: U.S. official

by Reuters

Monday, 6 March 2017 16:00 GMT

WASHINGTON, March 6 (Reuters) - Multiple fast-attack vessels from the Iranian Revolutionary Guard Corps came close to a U.S. Navy ship in the Strait of Hormuz on Saturday, forcing it to change direction, a U.S. official told Reuters on Monday.

The official, speaking on the condition of anonymity, said the IRGCN boats came within 600 yards of the USNS Invincible, a tracking ship, and stopped. The Invincible was being accompanied by three ships from British Royal Navy and forced the formation to change course.

The official said attempts were made to communicate over radio, but there was no response and the interaction was "unsafe and unprofessional." (Reporting by Idrees Ali)

Israeli airstrikes wound 4 in Gaza after rocket attack

AP

FARES AKRAM
Associated Press February 27, 2017

RAFAH, Gaza Strip (AP) — Israel carried out a series of airstrikes on militant sites across the Gaza Strip on Monday, wounding at least four people, officials said, following a rocket attack on southern Israel that caused no casualties.

Explosions could be heard and smoke rose into the air in the southern town of Rafah, on the Gaza-Egypt border.

"The Israeli entity bears full responsibility for the continuation of this dangerous escalation against Gaza. Continuing the targeting of the resistance sites and other properties and structures to deliberately blow up the situation is unacceptable," said Fawzi Barhoum, spokesman for the ruling Hamas militant group.

The Israeli military said it had targeted five Hamas positions throughout Gaza in response to the earlier rocket strike.

The Israeli military "holds Hamas accountable for any attacks from the Gaza Strip that jeopardize the safety of Israelis and breach Israel's sovereignty," said Lt. Col. Peter Lerner, a military spokesman.

Hamas security forces blocked journalists from approaching one of the targets in Rafah, suggesting a sensitive installation had been hit. The local Health Ministry said four people

Hizballah's latest round of threats against Israel reached a new peak Thursday, March 2, with the release of a videotape claiming to expose nine locations allegedly tied to the production and assembly of Israel's nuclear weapons, **DEBKAfile** reports. The Lebanese Shiite terror organization said it possessed precise missiles for wiping out Israel's nuclear infrastructure and attached addresses to all its targets. Five locations topped the list, starting with the nuclear reactors at Dimona in southern Israel and Nahal Soreq on the Mediterranean coast. "Revealed" next are three secret locations for the production, assembly and storage of nuclear missiles and warheads. Kfar Zacharia near Beit Shemesh in the Jerusalem Hills, defined as the main depot for the Jericho Series I, II and III, of three-stage ballistic missiles, which can reach ranges of up to 6,000km. Two others were a factory in Beer Yaakov near the central Israeli town of Ramleh, the alleged production site for nuclear warheads; and the "Galilee Wing-20" plant at the Tefen Industrial Park, 17km from the town of Carmiel, a facility where the Rafael Advanced Defense System Authority was said to mount nuclear warheads on ballistic missiles and prepare them for launching. The video stresses that Hizballah now possesses precise missiles able to pinpoint and

(NaturalNews) A recent archaeological discovery that throws a wrench into the conventional theory of evolution has reportedly cost a California professor his job. Mark Armitage, a former scientist at California State University, Northridge (CSUN), was reportedly fired after claiming to have unearthed a dinosaur fossil that still contains soft, flexible tissue, suggesting that it can't be millions of years old.

A 30-year veteran in his field, Armitage has published many studies over the years in peer-reviewed journals. One of his most recent was published last July, pertaining to

Artificial human life could soon be grown in lab after embryo breakthrough

Artificial mouse embryos grow in the lab CREDIT: CAMBRIDGE UNIVERSITY

By **Sarah Knapton**, SCIENCE EDITOR

2 MARCH 2017 - 7:00PM

Artificial human life could soon be grown from scratch in the lab, after scientists successfully created a mammal embryo using only stem cells.

Cambridge University mixed two kinds of mouse stem cells and placed them on a 3D scaffold. After four days of growth in a tank of chemicals designed to mimic conditions inside the womb, the cells formed the structure of a living mouse embryo.

The breakthrough has been described as a 'masterpiece' in bioengineering, which could eventually allow scientists to grow artificial human embryos in the lab without the need for a sperm or an egg.

Growing embryos would help researchers to study the very early stages of human life so they could understand why so many pregnancies fail, but is likely to prove controversial and raise ethical questions about what constitutes human life.

Starbucks' brand-perception has dropped since their anti-Trump announcements. (REUTERS/Mohammad Khursheed)

Starbucks brand and image plummeted after the CEO announced the company would hire 1000 Muslim refugees to protest President Donald Trump's immigration freeze, according to reports.

The coffee giant's consumer-perception levels have fallen by two-thirds since late January, Yahoo! Finance reports. The perception-tracker measures if respondents have "heard anything about the brand in the last two weeks, through advertising, news or word of mouth, was it positive or negative." In Starbucks' case, perception is still overall positive, but significantly lower than it was prior to CEO Howard Schultz published a public letter outlining the company's plans to give refugees jobs.

March 2017: The End Of A 100 Year Global Debt Super Cycle Is Way Overdue

By Michael Snyder, on February 27th, 2017

For more than 100 years global debt levels have been rising, and now we are potentially facing the greatest debt crisis in all of human history. Never before have we seen such a level of debt saturation all over the planet, and pretty much everyone understands that this is going to end very, very badly at some point. The only real question is when it will happen. Many believe that the current global debt super cycle began when the Federal Reserve was established in 1913. Central banks are designed to create debt, and since 1913 the U.S. national debt has gotten more than 6800 times larger. But of course it is not just the United States that is in this sort of predicament. At this point more than 99 percent of the population of the entire planet lives in a nation that has a debt-creating central bank, and as a result the whole world is drowning in debt.

When people tell me that things are going to "get better" in 2017 and beyond, I find it

Bitcoin value tops gold for first time

3 March 2017BusinessShare

REUTERS

A unit of the digital cryptocurrency Bitcoin has exceeded the value of an ounce of gold for the first time.

It closed at \$1,268 on Thursday while a troy ounce of gold stood at \$1,233.

The current high is being attributed to surging demand in China, where authorities warn it is used to channel money out of the country.

Will we maintain our religious liberty? (Public Domain)

Christians are under fierce attack across the fruited plain, and some of the nation's most prominent conservative leaders are urging President Trump to take immediate action.

More than 150 members of the Council for National Policy are calling on the president to issue an executive order "protecting the practical exercise of religious freedom."

"For the last eight years, Americans of all backgrounds have suffered the loss of their religious freedoms because of destructive Obama-era policies," the CNP wrote in a letter to the president.

UK Prosecutor During Trial That Found Preachers Guilty: 'Jesus Is Only Way to God Cannot Be Truth'

By Heather Clark on February 28, 2017 · 20 Comments

Like 856 Share 3206 Tweet 4 Share 3 Email 0

BRISTOL, UK — The U.K. prosecutor who presented the government's case last week against two preachers who were found guilty today of "intentionally alarming" the public with their open-air preaching had argued before the court that the men's speech declaring Jesus as the only way "cannot be a truth."

"To say to someone that Jesus is the only God is not a matter of truth. To the extent that they are saying that the only way to God is through Jesus, that cannot be a truth," prosecutor Ian Jackson declared, according to a

The Bible Is 'Criminal': British Court Convicts Preachers

03-02-2017

In what their lawyer calls a "modern-day heresy trial," a British court has convicted two street preachers of a public order offense for preaching the Bible in public.

The public prosecutor in the case claimed that publicly quoting parts of the King James Bible in modern Britain should "be considered to be abusive and is a criminal matter."
