اكرر هدفي فقط من هذه الخدمة أن نذكر بعضنا باننا نحتاج ان نستعد أي حياة اليقظة الروحية. والاستعداد ليس فقط قبل مجيء المسيح بل ايضا قبل الظلمة التي ستسبق مجيؤه ليكون عندنا زيت في مصابيحنا يكفي ان نعبر هذه الظلمة وتكون مصابيحنا مضيئة وقت مجيؤه او من منا سيسلم وديعته في أي وقت. بمعنى نحتاج من الان ان نستعد بقوة بأيمان عامل وبتنقية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحنا لان الظلمة والضيق اقتربت جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة لان وقتها تجميع زيت سيكون صعب جدا بل أستطيع ان أقول من مثل العذاري انه لن يكون هناك زيت الا ما جمعه سابقا.

أفضل ان اقول لنفسي ولكم استعدوا الان لأنه اقترب فنكون مستعدين سواء جاء او نحن ان سلمنا وديعتنا عن أنى لا اقول انه اقترب لكيلا يقال عني كاذب وانشر اشاعات او اخيف البعض

ولكنه يأتي بسرعة بغته. لا اعتقد اي أحد ندم لأنه كان مستعد ومنتظر مجيء المسيح ولم يأتي

المسيح في زمنه ولكنه انتقل وهو مستعد ولكن كثيرين جدا ندموا على عدم الاستعداد عندما

انتقلوا

المسيح قال بعض العلامات مثل

انجيل لوقا 21

21: 10 ثم قال لهم تقوم امة على امة ومملكة على مملكة

21: 11 وتكون زلازل عظيمة في اماكن ومجاعات واوبئة وتكون مخاوف وعلامات عظيمة من

السماء

21: 25 وتكون علامات في الشمس والقمر والنجوم وعلى الارض كرب امم بحيرة البحر والامواج

تضج

21: 26 والناس يغطى عليهم من خوف وانتظار ما يأتي على المسكونة لان قوات السماوات

تتزعزع

21: 27 وحينئذ يبصرون ابن الانسان اتيا في سحابة بقوة و مجد كثير

سفر اعمال الرسل 2

2: 19 واعطي عجائب في السماء من فوق وآيات على الارض من أسفل دما ونارا وبخار دخان

2: 20 تتحول الشمس الى ظلمة والقمر الى دم قبل ان يجيء يوم الرب العظيم الشهير

2: 21 ويكون كل من يدعو باسم الرب يخلص

لماذا قال المسيح بعض العلامات؟

أولا لكيلا نرتاع

انجيل متى 24

مت 24: 6 وسوف تسمعون بحروب واخبار حروب **لا ترتاعوا** لأنه لا بد ان تكون هذه

كلها ولكن ليس المنتهى بعد

ثانيا لنؤمن

إنجيل يوحنا 14: 29

وَقُلْتُ لَكُمْ الْآنَ قَبْلَ أَنْ يَكُونَ، حَتَّى مَتَى كَانَ تُؤْمِنُونَ.

ثالثا لنتنبه ونستعد

انجيل لوقا 21

28 وَمَتَى ابْتَدَأَتْ هَذِهِ تَكُونُ، فَانْتَصِبُوا وَارْفَعُوا رُؤُوسَكُمْ لِأَنَّ نَجَاتَكُمْ تَقْتَرِبُ.»

Residents of a Brazilian town were stunned by the appearance of a strange, menacing-looking cloud Thursday evening, leading some to wonder if it spelled the beginning of something far more sinister.

At first look the obscure cloud resembles a meteorite trail or tornado, frozen in time, seconds before the impending doom. At second glance, it looks more like a freaky cloud formation.

A massive asteroid estimated to be 2.7 miles wide is set to make a 'relatively close encounter' with Earth on September 1.

Dubbed 'Florence,' the huge space rock will pass just 4.4 million miles from our planet - or, about 18 times the distance between Earth and the moon.

According to NASA, this is the closest an asteroid of this size has come since they first began tracking near-Earth objects, giving scientists an unprecedented opportunity to study it up close through ground-based radar observations.

AS THE ECLIPSE NEARS, SOLAR ACTIVITY INCREASES: Only a few weeks ago, it seemed that the sun would be quiet and featureless when the Moon eclipsed it on Aug. 21st. Solar Minimum was in full swing. This weekend, however, the sun is welcoming the eclipse with a burst of renewed activity. "As the Moon approaches the sun, our nearest star is extending a friendly hand towards it," says Dave Eagle who sends this picture from Higham Ferrers, England:

"There is a huge prominence on the sun's eastern limb. If you are in the total eclipse path set your clock to greet this awesome spectacle on Monday," he says.

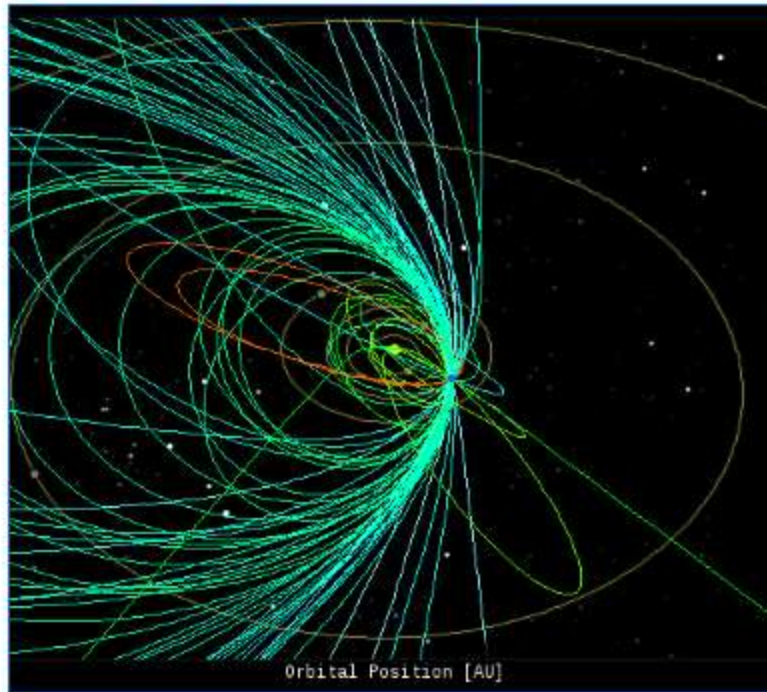

And that's just for starters. In addition, a remarkably-long sunspot group is sprawling across the solar disk. AR2671 stretches 140,000 miles from end to end, almost twice as wide as the planet Jupiter. Amateur astronomers watching the eclipse through [safe solar telescopes](#) will have no trouble seeing the rugged edge of the Moon cut across this impressive sunspot, eclipsing one dark core after another. If we're really lucky, the sunspot will explode. AR2671 has a 'beta-gamma' magnetic field that harbors energy for [M-class](#) solar flares. Free: [Solar Flare Alerts](#)

Historic ocean receding in parts of Brazil and Uruguay

Posted by [TW](#) on August 14, 2017 in categories [Editors' picks](#), [Ocean](#), [Weather](#) Follow [@TheWatchers_phenomena](#)

A historic ocean receding caused by strong northerly winds occurred in several coastal cities of Uruguay and Brazil on August 11 and 12, 2017.

In Punta del Este, Uruguay, the ocean receded more than 10 meters (32.8 feet) in about 15 minutes on August 11, leaving yachts, fishing boats and sea lions stranded. Meteorologists said the phenomenon was caused by strong winds coming from the north. However, due to its severity, many people thought it was a sign of a tsunami.

Earlier in the day, Uruguayan Meteorological Institute (INUMET) issued orange wind warnings for the departments of Montevideo, Canelones, Maldonado, Rocha and Lavalleja.

NORTH Korea has been rocked by two earthquakes, sparking fears of another missile test.

Expert warns North Korea 'WILL strike back'

The first earthquake struck not far from North Korea's capital of Pyongyang, where despot Kim Jong-un and his closest allies live.

Measuring 2.6 on the Richter scale, the quake could be an indication of yet another missile test - despite worldwide condemnation.

The epicentre was to the south-west of the capital - a location not known to contain any missile testing sites.

140 dolphins have died on the Romanian seaside since early summer

A sad report of an NGO that deals with the protection of dolphins in the Black Sea. Since the beginning of the summer, 140 mammals have died on the Romanian seaside due to wounds caused by fishing nets. Saving could come from using devices that emit the sounds that gush the dolphins. But fishermen do not trust them. So the Dolphin Day, celebrated each year on August 5, remains a mourning day.

Russia has unveiled its new fleet of 'invisible' supersonic fighter jets, boasting that they are already the envy of air forces around the world.

The £120million Sukhoi-57, which will have a top speed of 1,815 mph, is said to rival America's F-22 and China's Chengdu J-20.

Kremlin officials say the fifth-generation stealth jet has been 'christened like a baby after its birth' as Su-57 and will undergo another year of testing before it enters military service in 2019.

The al Qaeda terror group's chief bomb maker has published a blueprint for new attacks on U.S. transportation systems, including planes, trains, and boats, which the terror group views as "prime targets," according to a copy of a lengthy manifesto that provides a guide for would-be terrorists to launch attacks.

Ibrahim al-Asiri, a top al Qaeda leader known as the terror group's chief bomb maker, detailed the extremist organization's plans to target U.S. passenger and shipping transportation services, which the terror organization views as weak links ripe for attack.

A 23-year-old Oklahoma man faces federal charges after he attempted to detonate what he believe to be a 1,000-pound bomb in downtown Oklahoma City Friday night.

Jerry Drake Varnell of Sayer, Okla. was arrested early Saturday morning after he used a cell phone to detonate what he believed to be a bomb placed in a van he believed to have been stolen. But Varnell had been set up by an undercover FBI agent, according to a complaint filed in the U.S. District Court of Western Oklahoma.

Better-than-ever face-recognition tech means you will be able to forget your passwords—with more security

It was a memorable moment in Pixar's 2004 classic "The Incredibles," one that seemed wildly futuristic at the time: Mr. Incredible picks up a wafer-thin tablet computer, and it scans his face to verify his identity before divulging his secret mission.

Thirteen years later, many slim phones and tablets unlock with the press of a thumb—and just this sort of mobile facial scanning is on the way.

Embedded Chips Lend a Hand To Unattended Retail

By PYMNTS  

Posted on August 16, 2017

Some unattended retail solutions run skin deep — literally. Tech company Three Square Market recently kicked up a media firestorm by implanting tiny microchips in employee volunteers, enabling them to make break room purchases and unlock doors by waving a chipped hand. For August's Unattended Retail Tracker™, company president Patrick McMullan tells PYMNTS how the tech could disrupt retail and pave the way for a cashless society. Plus, the latest news, trends and 10 new additions to the provider directory, inside the Tracker.

A Siberian doctor has implanted six microchips under his skin to turn his body into a no-nonsense multi-functional gadget. This has opened quite a few doors for Aleksandr Volchek – including literally.

Some of the chips function as swipe cards, letting him into his home and office.

Volchek, a Novosibirsk-based obstetrician-gynecologist, calls himself a crypto anarchist. He opens doors and pays bills with a wave of his hand, and it works like magic. This is a time-saving convenience, the tech-savvy physician says.

Prophecy Fulfilled: City of David 'Shakes Off the Dust'

Jerusalem's Old City (CBN News)

When people visit Jerusalem's Old City, they may believe it's the same place King David set up as his capital more than 3,000 years ago. But that's not exactly the case. Archaeologists are uncovering the original city and telling others its amazing story.

Anarina Heymann serves as the outreach coordinator for the City of David.

"Welcome to the City of David," Heymann told CBN News. "It's the home to the ancient biblical Jerusalem and up until 150 years ago, everybody thought that the ancient biblical Jerusalem lies within the confines of the Old City right behind you in the wall—within the walls there. So the question is what happened 150 years ago and where is the ancient biblical Jerusalem?"

She then helped answer that question by explaining how the City of David lay hidden for nearly 2,000 years until a British archaeologist began a discovery that continues to this day.

"Chris, we're standing at a magical place right now," Heymann continued. "This is the place when

The Dow Falls 274 Points As 'Eclipse Fever' Hits The Financial Markets

By Michael Snyder, on August 17th, 2017

Have we now entered a time of major financial shaking? On Thursday, the Dow Jones Industrial Average was down 274 points. The was the largest decline for the Dow since May, and high yield bonds were down dramatically as well. Many are blaming the terror attack in Barcelona and "instability in the White House" for the downturn, but could "eclipse fever" also be a factor? The closer that we get to [the solar eclipse on August 21st](#), the weirder people seem to be getting. You will see what I am talking about below.

But first let's talk about the financial markets. I have been warning that stocks are massively overvalued [for quite a while now](#), and it turns out that the Federal Reserve [very much agrees with me](#)...

"Since the April assessment, vulnerabilities associated with asset valuation pressures had edged up from notable to elevated, as asset prices remained high or climbed further, risk spreads narrowed, and expected and actual volatility remained muted in a range of financial markets."

Even the Fed is warning that we are in a bubble, and it is just a matter of time until that bubble bursts.

Our God is a God of miracles. He is not selfish. He does not like to see us suffer or do without. The enemy would like to make you believe God is not a good God, but the book of Hebrews states what is tried and true: "He is a rewarder of those who diligently seek Him" (Heb. 11:6). I have found no truth more liberating than this, and I have seen people who lack this understanding suffer lifetimes of frustration, wondering about the character of God.

If someone ever embraces the idea that God's character is somehow flawed, then all sorts of troubling questions follow. If God is good, then how can there be suffering in the world? If God is unfair, then why should anyone trust Him? Such questions illustrate how the enemy infiltrates the minds of humankind. Even the insurance industry refers to a horrible natural disaster as an "act of God."

Have you ever wondered why no one asks the converse of the question? If God is a bad God, then why is there so much good in the world? How do you explain the good, the order of the universe

Three female suicide bombers have attacked a refugee camp in north-eastern Nigeria, killing at least 27 people.

Dozens more were injured after the women blew themselves up outside the camp near Maiduguri in Borno state.

The attack bore the hallmarks of Boko Haram in an area known to be a militant stronghold. The north-eastern city is at the heart of a fight between government and jihadist forces who have waged an eight year insurgency to create an Islamic state in northern Nigeria.

CLOVIS, N.M. — Officials with a public school in New Mexico quickly agreed to paint over a mural featuring a Scripture citation after receiving a letter from a prominent atheist-led church-state separation group last week.

The Wisconsin-based Freedom From Religion Foundation (FFRF) recently sent a letter to the Clovis Municipal School District after receiving a complaint from a parent who noticed the mural at Clovis Freshman Academy, which features a dove and anchor, and the phrase “Hope anchors the soul—Hebrews 6:19.”

NEW YORK (FOX5NY) - Smoking and vaping are banned in all New York schools. Now schools are testing technology that can smoke out offenders. The new technology inside a little box may play a big role in holding students who break the law accountable.

"If we get a spike above the line then we know if there's an incident occurring," Digital Fly CEO Derek Peterson said. "And we notify the officials."

New York Gov. Andrew Cuomo in July banned the use of e-cigarettes on all public and private school grounds.

"If someone is inside the bathroom and they vape, it will contaminate the air, our sensor will pick it up and it will alert somebody in real time, 'Hey, there's a problem here, your air is contaminated, somebody could be vaping, somebody could be smoking, send somebody to check it out,'" Digital Fly software developer Billy

Schweigert said.
