اكرر هدفي فقط من هذه الخدمة أن نذكر بعضنا باننا نحتاج ان نستعد أي حياة اليقظة الروحية. والاستعداد ليس فقط قبل مجيء المسيح بل ايضا قبل الظلمة التي ستسبق مجيؤه ليكون عندنا زيت في مصابيحنا يكفي ان نعبر هذه الظلمة وتكون مصابيحنا مضيئة وقت مجيؤه او من منا سيسلم وديعته في أي وقت. بمعنى نحتاج من الان ان نستعد بقوة بأيمان عامل وبتقوية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحنا لان الظلمة والضيقة اقتربت جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة لان وقتها تجميع زيت سيكون صعب جدا بل أستطيع ان أقول من مثل العذارى انه لن يكون هناك زيت الا ما جمعته سابقا.

أفضل ان اقول لنفسي ولكم استعدوا الان لأنه اقتربت فنكون مستعدين سواء جاء او نحن ان سلمنا وديعتنا عن أنى لا اقول انه اقترب لكيلا يقال عني كاذب وانشر اشاعات او اخيف البعض ولكنه يأتي بسرعة بغته. لا اعتقد اي أحد ندم لأنه كان مستعد ومنتظر مجيء المسيح ولم يأتي المسيح في زمنه ولكنه انتقل وهو مستعد ولكن كثيرين جدا ندموا على عدم الاستعداد عندما انتقلوا

المسيح قال بعض العلامات مثل

انجيل لوقا 21

10: 21 ثم قال لهم تقوم امة على امة ومملكة على مملكة

11: 21 وتكون زلازل عظيمة في اماكن ومجاعات واوبئة وتكون مخاوف وعلامات عظيمة من السماء

25: 21 وتكون علامات في الشمس والقمر والنجوم وعلى الارض كرب امم بحيرة البحر والامواج تضج

26: 21 والناس يغشى عليهم من خوف وانتظار ما يأتي على المسكونة لان قوات السماوات تتزعزع

21:27 وحينئذ يبصرون ابن الانسان اتيا في سحابة بقوة و مجد كثير

سفر اعمال الرسل 2

2: 19 واعطي عجائب في السماء من فوق وآيات على الارض من أسفل دما ونارا وبخار دخان

2: 20 تتحول الشمس الى ظلمة والقمر الى دم قبل ان يجيء يوم الرب العظيم الشهير

2: 21 ويكون كل من يدعو باسم الرب يخلص

**لماذا قال المسيح بعض العلامات؟**

**أولا لكيلا ترتاع**

انجيل متى 24

مت 24: 6 وسوف تسمعون بحروب واخبار حروب **لا ترتاعوا** لأنه لا بد ان تكون هذه كلها ولكن ليس المنتهى بعد

**ثانيا لنؤمن**

انجيل يوحنا 14: 29

وَقَلْتُ لَكُمْ الْآنَ قَبْلَ أَنْ يَكُونَ، حَتَّى مَتَى كَانَ تُؤْمِنُونَ.

ثالثا لنتنبه ونستعد

انجيل لوقا 21

28 وَمَتَى ابْتَدَأَتْ هَذِهِ تَكُونُ، فَاَنْتَصِبُوا وَارْفَعُوا رُؤُوسَكُمْ لِأَنَّ نَجَاتَكُمْ تَقْتَرِبُ.».

A massive explosion spotted 200 million light years from Earth has baffled astronomers.

The strange spot, nicknamed 'the cow', is up to 100 times brighter than a supernova and is growing at an incredible rate.

Scientists say the flash is a 9,000°C (16,000°F) cloud of high-energy particles bursting outwards at 12,000 miles (20,000km) per second, but are still unsure what triggered the brilliant blast.

One researcher said 'there hasn't really been another object like this.'

# BLOOD MOON: Next red moon will be biggest of the 21st century

NEXT month's "blood moon" eclipse will be the biggest the world has witnessed so far this century, with large swathes of Europe in line for a spectacular visual display on the night of July 27.

By CIARAN MCGRATH

PUBLISHED: 20:33, Thu, Jun 21, 2018 | UPDATED: 20:50, Thu, Jun 21, 2018

And if that isn't enough to whet the appetites of amateur stargazers, Mars will be the closest to Earth it has been since 2003.

During a total lunar eclipse, the sunlight which reaches the Moon is refracted by Earth's atmosphere, which filters out the Sun's blue light – making the moon look red.

**MYSTERIOUS TWINNED RAINBOW:** Scientists have been studying rainbows for hundreds of years, since the 17th century when Isaac Newton first explained the colorful arcs. Yet after all these years, there is one rainbow scientists do not fully understand—the "[twinned bow](#)." Jan Curtis photographed this specimen on June 21st from Cheyenne, Wyoming:

"This rare 'twinned rainbow' was perhaps the brightest rainbow I've ever seen," says Curtis. "It followed on the tails of a extremely severe thunderstorm that fortunately passed just a few miles to my north."

"Several twinned bows have been imaged, mostly during heavy showers, but currently there is no agreed explanation for them," says atmospheric optics expert Les Cowley. "They might form from a mixture of water drops and ice spheres." Indeed, Curtis reports intense hail around the time of his sighting.

Lava from the Kilauea volcano in Hawaii has been spewing for over a month, but the thick, slow-moving lava has taken a new shape, transforming into a wide, hot, flowing river of lava traveling long distances.

The 2100-degree lava is flowing together into a molten red river running 9 miles from the fissure into the ocean at Kapoho. The transition into fast-paced lava moving about 200 yards per hour seen Monday is due the location of the fissure.

The fissure, the 8th of 24 fissures, is located in the lower east rift zone near Leilani Estates. The magma under the surface in this area is hotter, more fluid and less crystallized.

In the latest update from the US Geological Survey (USGS), the organisation which has been monitoring the beast since its very first explosion on May 3, warned blistering lava has been seen shooting out of the volcano reaching heights of 180ft as Big Island remains on red alert.

The eruption shows no sign of stopping with USGS warning: "The eruption in the lower East Rift Zone continues with little change."

Lava is currently spilling out of Kilauea's Fissure 8 and pooling towards the ocean where the combination of blistering heat from the lava and the cool water creates laze, a toxic phenomenon containing hydrochloric acid that when it comes into contact with skin causes

A moderately strong explosion took place at Nicaraguan Telica volcano at 13:08 UTC (07:08 local time) on June 21, 2018. The last eruptive phase of this volcano started on September 23, 2015, and ended May 11, 2016. It had Volcanic Explosivity Index of 2.

The volcano ejected a plume of gas and ash, sand and some rock up to 500 m (1 640 feet) from the crater. The column drifted to the east, south and southwest.

INETER said fragments of ejected rock fell near the crater while the

## Algae bloom hits Grieg Seafood farms in British Columbia, killing 250,000 salmon

By Cliff White  
June 8, 2018

SHARE [f](#) [t](#) [in](#) [e](#)

An algae bloom in the Jervis Inlet in British Columbia, Canada, has killed an estimated 250,000 fish at two Grieg Seafood's salmon farms in the area.

The Bergen, Norway-headquartered company, which operates several salmon farms and a hatchery in British Columbia, said an outbreak of heterosigma, a species of microscopic algae, spread in high concentration

through the entire water column in the inlet.

"Grieg Seafood continuously works to improve biosecurity and all of Grieg Seafood's sites perform algal monitoring by taking daily samples which are analyzed using advanced image analysis techniques. This allows for the identification of the species, prevalence and depth distribution of any algae present," the company said in a press release.

However, due to the abundance of the algae, the company said use of aeration treatments or other measures to protect its fish "could not prevent the incident."

The bloom killed an estimated 50 percent of the fish at the two sites, a total loss estimated at 1,000 tons. The fish were scheduled to be harvested in the second half of 2018, the company said.

In its release, Grieg Seafood said it carried insurance, and that the estimated cost of the die-off, including individual share of insurance, will total around NOK 25 million (USD 3.1 million, EUR 2.6 million). That cost will be realized on the company's second-quarter financial statement, Grieg said.

# North Korea's Kim hails 'unity' with China in new visit

By Becky Davis  
Beijing (AFP) June 20, 2018

Kim Jong Un concluded a two-day whirlwind visit to China Wednesday, where he declared North Korea's unstinting "friendship" with Beijing in a show of loyalty to his main ally following a landmark summit with US President Donald Trump.

It was Kim's third official visit to China, designed to reassure Beijing that Pyongyang will not neglect its interests as Trump and the young autocrat move into uncharted diplomatic terrain.

The performance is part of a delicate balancing act for Kim, who analysts say is seeking to play US and Chinese interests off each other while maintaining good relations with Beijing, his economic patron and diplomatic protector.

China and the US both hope to see the Korean peninsula free of nuclear weapons. But Beijing is concerned Washington and Pyongyang might move closer at its expense, a possibility that China sees as threatening to its economic and security interests in the region.

While China was not present at the June 12 summit in Singapore, it lent Kim a plane to travel to the city-state, a clear sign that it remains an influential force in the diplomatic shuffle.

The Cold War-era allies, which fought side-by-side against US-led UN forces and South Korea in the 1950-1953 Korean War, have sought to repair ties strained by Pyongyang's nuclear tests and Beijing's support of subsequent UN sanctions.

Kim chose Beijing for his first official foreign trip in March and met Xi again in May in the northeastern port city of Dalian.

# Russia warns against Trump's 'alarming' plans for US space domination

by Staff Writers  
Moscow (AFP) June 20, 2018

Russia on Wednesday expressed alarm over US President Donald Trump's call for the United States to dominate space exploration and his plan to create a separate branch of the military called a Space Force.

Russian foreign ministry Maria Zakharova said at a briefing that Russia "noted the US president's instructions... to separate space forces from the air force," saying "the most alarming thing about this news is the aim of his instructions, namely to ensure (US) domination in space."

Trump on Monday said at a speech in the White House that "America will always be the first in space" and "we don't want China and Russia and other countries leading us."

He also called for the Pentagon to create a new "Space Force" that would become the sixth branch of the American military, although this requires Congressional approval to take effect.

Zakharova warned that the US is "nurturing plans to bring out weapons into space with the aim of possibly staging military action there."

"This is not based on guesswork, this is understanding the realities," she insisted.

US military build-up in space "especially after the appearance of weapons there, would have a destabilising effect on strategic stability and international security," Zakharova warned.

# Israel mum on US claims it hit Iraq militia in Syria

by Staff Writers  
Jerusalem (AFP) June 19, 2018

Israel declined to comment on Tuesday on a weekend air strike against an Iraqi paramilitary base in eastern Syria after its US ally implicated it in the attack.

The Sunday evening strike against the Al-Hari base on the Syrian side of the border with Iraq came less than 24 hours after Prime Minister Benjamin Netanyahu said Israel would strike Iran's "proxies" anywhere in Syria.

Fighters of Iraq's Hashed al-Shaabi paramilitary force, mainly composed of Iran-trained Shiite militia, have played a major role in the war against the Sunni extremists of the Islamic State group in Syria as well as Iraq.

But their presence has sparked confrontations with both Washington, which has been supporting a Kurdish-led alliance that controls other parts of eastern Syria, and Israel, which fears Iranian-inspired attacks on its forces in the occupied Golan Heights.

Syrian authorities and the Iraqi paramilitaries both blamed Washington for the strike, which killed at least 52 fighters, according to the Syrian Observatory for Human Rights.

But US officials denied any involvement and instead pointed the finger at Israel.

Israeli forces carried out strikes in the Egyptian-ruled Sinai Peninsula recently, targeting terrorist positions in northern Sinai, witnesses claimed.

According to a report carried by the London-based *Al-Araby Al-Jadeed* media outlet Monday morning, Israeli aircraft hit terrorist targets inside Egyptian territory in the northern Sinai Peninsula, not far from the border with the Gaza Strip. The targets were located just outside of the cities of Rafah and Sheikh Zuweid.

by Staff Writers  
Jerusalem (AFP) June 18, 2018

Israeli warplanes on Monday conducted strikes against nine Hamas "military targets" in the northern Gaza Strip in response to incendiary kites being sent into Israeli territory, the army said.

The attacks targeted two Hamas military sites and a munitions manufacturing site, the military said in a statement, without specifying whether the raids had resulted in casualties.

"Fire balloons" and kites carrying flammable material have become symbols of the Palestinian border protests in recent months.

The Israeli army on Saturday wounded two Palestinians in the Gaza Strip attempting to launch incendiary balloons across the border into Israel, officials said.

Since major border protests broke out at the end of March, more than 300 fires have devastated several thousand hectares of fields and shrubland, the Israeli fire service has said.

According to Israel's Defence Minister Avigdor Lieberman, 400 kites have been intercepted from some 600 launched since the start of the recent protests.

At least 130 Palestinians have been killed by Israeli gunfire in the same time span. No Israelis have been killed.

DUBAI/RIYADH, June 24 (Reuters) - Saudi Arabia's air defence forces intercepted a ballistic missile launched by Yemen's Houthi militia over Riyadh on Sunday, state-run al-Ikhbariya television said on Sunday.

The Houthis' al-Masira television said later that rockets were aimed at Saudi defence ministry and other targets in the Saudi capital.

Reuters could not verify the report independently.

At least six loud blasts were heard and bright flashes were seen in the sky over Riyadh, and puffs of smoke were later visible above the city, a Reuters witness said. No casualties were reported immediately.

There was no immediate comment from the Saudi authorities or from the Saudi-led coalition fighting in Yemen against the Houthi movement, which has targeted Riyadh with ballistic missiles several times in recent months.

BEIJING (Reuters) - China must lead the way in reforming global governance, the foreign ministry on Saturday cited President Xi Jinping as saying, as Beijing looks to increase its world influence.

China has sought a greater say in global organizations such as the World Bank, the International Monetary Fund and United Nations, in line with its growing economic and diplomatic clout.

Since taking office in late 2012, Xi has taken a more muscular approach, setting up China's own global bodies like the Asian Infrastructure Investment Bank and launching his landmark Belt and Road project to build a new Silk Road.

Wrapped in jackets and blankets, thousands of people gathered at Britain's Stonehenge for summer solstice, watching the sun rise over the Neolithic monument and welcoming the longest day of the year.

Revelers of all ages, including druids and pagans performing rituals, clapped and cheered as the sun rose at 0352 GMT on Thursday over the prehistoric site made up of huge standing stones in the southwest county of Wiltshire.

Some sang or beat drums while others performed yoga.

Each year, thousands of people arrive at the Stonehenge for the occasion, and this year, around 9,500 people were present, according to Wiltshire police.

## Dow tumbles about 300 points, wipes out gains for year, as Trump directs more tariffs at China

- The Dow also erased all of its gains for the year and posted a six-day losing streak, its longest since March 2017.
- "With investor optimism as high as it is, there might not be much margin for error, and there is a real risk that this starts to erode consumer and business confidence," notes one strategist.

**ANCHORAGE, Alaska** — A legislative librarian for the State of Alaska who was born male but identifies as female has sued the State after being informed that “AlaskaCare does not cover gender reassignment surgery.”

The 36-year-old librarian, who goes by the name Jennifer Fletcher, obtained the desired operations last year, but ended up paying out of pocket.

“This diverted financial resources that ... Fletcher would have been able to use to pay off ... student loans and other debt,” the legal challenge, filed by the homosexual and transgender advocacy group Lambda Legal, reads.
