## والعلامات حتى 21 اغسطس 2018

Holy\_bible\_1

اكرر هدفي فقط من هذه الخدمة أن نذكر بعضنا باننا نحتاج ان نستعد أي حياة اليقظة الروحية. والاستعداد ليس فقط قبل مجيء المسيح بل ايضا قبل الظلمة التي ستسبق مجيؤه ليكون عندنا زيت في مصابيحنا يكفي ان نعبر هذه الظلمة وتكون مصابيحنا مضيئة وقت مجيؤه او من منا سيسلم وديعته في أي وقت. بمعنى نحتاج من الان ان نستعد بقوة بأيمان عامل وبتنقية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحنا لان الظلمة والضيق اقتربت جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة لان وقتها تجميع زيت سيكون صعب جدا بل أستطيع ان أقول من مثل العذاري انه لن يكون هناك زيت الا ما جمعه سابقا.

أفضل ان اقول لنفسي ولكم استعدوا الان لأنه اقترب فنكون مستعدين سواء جاء او نحن ان سلمنا وديعتنا عن أنى لا اقول انه اقترب لكيلا يقال عني كاذب وانشر اشاعات او اخيف البعض

ولكنه يأتي بسرعة بغته. لا اعتقد اي أحد ندم لأنه كان مستعد ومنتظر مجيء المسيح ولم يأتي

المسيح في زمنه ولكنه انتقل وهو مستعد ولكن كثيرين جدا ندموا على عدم الاستعداد عندما

انتقلوا

المسيح قال بعض العلامات مثل

انجيل لوقا 21

21: 10 ثم قال لهم تقوم امة على امة ومملكة على مملكة

21: 11 وتكون زلازل عظيمة في اماكن ومجاعات واوبئة وتكون مخاوف وعلامات عظيمة من

السماء

21: 25 وتكون علامات في الشمس والقمر والنجوم وعلى الارض كرب امم بحيرة البحر والامواج

تضج

21: 26 والناس يغطى عليهم من خوف وانتظار ما يأتي على المسكونة لان قوات السماوات

تتزعزع

21: 27 وحينئذ يبصرون ابن الانسان اتيا في سحابة بقوة و مجد كثير

سفر اعمال الرسل 2

2: 19 واعطي عجائب في السماء من فوق وآيات على الارض من أسفل دما ونارا وبخار دخان

2: 20 تتحول الشمس الى ظلمة والقمر الى دم قبل ان يجيء يوم الرب العظيم الشهير

2: 21 ويكون كل من يدعو باسم الرب يخلص

لماذا قال المسيح بعض العلامات؟

أولا لكيلا نرتاع

انجيل متى 24

مت 24: 6 وسوف تسمعون بحروب واخبار حروب **لا ترتاعوا** لأنه لا بد ان تكون هذه

كلها ولكن ليس المنتهى بعد

ثانيا لنؤمن

إنجيل يوحنا 14: 29

وَقُلْتُ لَكُمْ الْآنَ قَبْلَ أَنْ يَكُونَ، حَتَّى مَتَى كَانَ تُؤْمِنُونَ.

ثالثا لنتنبه ونستعد

انجيل لوقا 21

28 وَمَتَى ابْتَدَأَتْ هَذِهِ تَكُونُ، فَانْتَصِبُوا وَارْفَعُوا رُؤُوسَكُمْ لِأَنَّ نَجَاتَكُمْ تَقْتَرِبُ.»

**A COMET APPROACHES:** Comet 21P/Giacobini-Zinner is approaching Earth for a 0.39 AU flyby on Sept. 10, 2018. Already, astrophotographers are capturing dramatic images of the comet's approach. On Aug. 16th, Michael Jäger of Weißenkirchen, Austria, caught Giacobini-Zinner passing by the Heart and Soul Nebula in the constellation Cassiopeia:

In the weeks ahead, the comet will become an easy target for backyard telescopes as it brightens to 7th magnitude—just below the threshold for naked-eye visibility. Stay tuned for updates as the distance decreases.

Note: "AU" means "astronomical unit." 1 AU is the distance between Earth and the sun. The distance to Comet 21P/Giacobini-Zinner on Sept. 10th will be 0.39 AU or 58 million km. On the scale of things in the solar system, the comet will be close to Earth, but not scary-close.

**A MYSTERY IN THE MESOSPHERE:** This summer, something strange has been happening in the mesosphere. The mesosphere is a layer of the atmosphere so high that it almost touches space. In the rarefied air 83 km above Earth's surface, summertime wisps of water vapor wrap themselves around specks of meteor smoke. The resulting swarms of ice crystals form noctilucent clouds (NLCs), which can be seen glowing in the night sky at high latitudes.

And, no, that's not the strange thing.

Northern sky watchers have grown accustomed to seeing these clouds in recent years. They form in May, intensify in June, and ultimately fade in July and August. This year, however, something different happened. Instead of fading in late July, the clouds exploded with unusual luminosity. Kairo Kiitsak observed this outburst on July 26th from Simuna, Estonia:

"It was a mind-blowing display," says Kiitsak. "The clouds were visible for much of the night, rippling brightly for at least 3 hours."

Other observers saw similar displays in July and then, in August, the clouds persisted. During the first half of August 2018, reports of NLCs to Spaceweather.com have **tripled** compared to the same period in 2017. The clouds refuse to go away.

Researchers at the University of Colorado may have figured out why. "There has been an unexpected surge of water vapor in the mesosphere," says Lynn Harvey of Colorado's Laboratory for Atmospheric and Space Physics (LASP). This plot, which Harvey prepared using data from NASA's satellite-based Microwave Limb Sounder (MLS) instrument, shows that the days of late July and August 2018 have been the wettest in the mesosphere for the past 11 years:

British Columbia has declared a province-wide state of emergency on August 15, 2018, due to raging wildfires. Although 2018 is already the 4<sup>th</sup> worst season on record, it's still far behind record-breaking 2017. Previous declarations were in 1996, 2003 and 2017, which lasted 10 weeks.

As of early August 15, there were 566 wildfires burning in the province. There are 29 active evacuation orders impacting around 2 050 people and 48 evacuation centers affecting 18 720 people.

## 6.6 magnitude earthquake shakes Aleutian Islands

 Author: [Laurel Andrews](#)  Updated: 1 day ago  Published 1 day ago

A strong earthquake with a preliminary magnitude of 6.6 hit the Aleutian Islands Wednesday afternoon, according to the [Alaska Earthquake Center](#).

No tsunami is expected, according to the [Pacific Tsunami Warning Center](#).

The earthquake struck at 1:56 p.m., about 75 miles southwest of the community of Adak, the center said, at a depth of about 7 miles.

Beth Carroll, Adak city clerk, said she had just returned to her office after her lunch break when the earthquake struck.

"It was pretty intense for about 15 seconds," Carroll said. "It started out slow, and then it got heavier and heavier, and then it finally died down."

Carroll said she hadn't heard of any earthquake damage in Adak.

Gulls have been dropping from the sky at Turtle Lake, leading to an unsettling feeling for locals and campers coming across the dead young birds.

Suzy Fey Pilat has found dozens of the birds lying around the beaches of the lake, located about 240 kilometres northwest of Saskatoon. She's also watched as the birds have fallen from the sky.

## Millions of Sea Creatures 'in Real Peril' as Pacific Temp Rise to Dangerous New Records

Aug 17, 2018 | 0 🌐 | ★★★★★

(By **Michael Snyder**) Ocean temperatures continue to rise, and scientists are extremely alarmed as a mass die-off of sea creatures appears to be imminent. This week, environmental experts were stunned when ocean water off of the San Diego coast hit an all-time record high of 81.3 degrees Fahrenheit. Daily measurements began all the way back in 1916, and since that time a higher ocean temperature has never been recorded off of the California coast. Unfortunately, this is not an isolated incident. Studies have shown that ocean

## Mattis: US Needs Space Force to Counter Russia, China

# US 'concerned' with 'abnormal' Russian satellite

by Staff Writers  
Geneva, Switzerland (Sputnik) Aug 20, 2018

The US is raising hue and cry about a Russian satellite exhibiting what it considers "abnormal" behavior, heavily implying it is a weapon of some sort. However, the US has repeatedly rejected out of hand attempts to prevent a space arms race via an international treaty and is developing its own hypersonic weapons capable of reaching space.

"We are concerned with what appears to be very abnormal behavior by a declared 'space apparatus inspector,'" US Assistant Secretary of State for Arms Control, Verification and Compliance Yleem Poblete said Tuesday at a UN conference on disarmament in Geneva, Switzerland. "Its behavior on-orbit was inconsistent with anything seen before from on-orbit inspection or space situational awareness capabilities, including other Russian inspection satellite activities."

file illustration only

The only certainty we have is that this system has been "placed in orbit," the diplomat noted, lamenting, "We don't know for certain what it is, and there is no way to verify it."

What's bizarre is that the US, despite noting that "it is difficult to determine an object's true purpose simply by observing it on orbit" and that "we have no means of differentiating many objects' behaviors from that of a weapon," derives from this lack of information the conclusion that the satellite must be some kind of threat.

Of course, Russia and China have been trying to convince the US and other UN member states to agree to a binding treaty that would head off the imminent space arms race. In 2014, the US rejected the draft Treaty on Prevention of the Placement of Weapons in Outer Space and of the Threat or Use of Force Against Outer Space Objects (PPWT).

## DEVELOPING: Russian strategic bombers deploy near Alaska...

Aug 16, 2018 | 0 | \*\*\*\*\*

The Russian military says that two nuclear-capable strategic bombers have flown to the easternmost Chukotka Peninsula, near Alaska, as part of an air force exercise. The Russian Defense Ministry said that the Tu-160 bombers flew about 7,000 kilometers (4,350 Miles) from their home base near Saratov in southwestern Russia to Anadyr, on Chukotka, before returning to their home base. The ministry said the

mission was the first time the bombers had flown to Chukotka, which faces Alaska across the Bering Strait. The ministry said the air force exercise also involved the Tu-95 strategic bombers and tanker planes. The Russian military

# Britain's RAF intercepts six Russian bombers over Black Sea

by Staff Writers  
Bucharest (AFP) Aug 15, 2018

Britain's Royal Air Force said Wednesday it had intercepted six Russian bomber planes flying close to NATO air space over the Black Sea.

The Eurofighter Typhoons launched early Monday from their base in Romania after the Russian Su-24 Fencer planes were spotted, the RAF said in a statement.

It said there had been "significant Russian air activity through most of the night".

The Russian aircraft eventually turned towards Crimea, the RAF said.

The operation "was in accordance with the NATO Enhanced Air Policing (eAP) mission, whereby the RAF operates alongside its NATO ally to deter Russian aggression, reassure our friends in Romania and assure NATO allies of our commitment to collective defence," the statement said.

Romanian Defence Minister Mihai Fifor earlier said such "provocations" by Russia had become "frequent" in recent months.

Four RAF Typhoons have been deployed at the Mihail Kogalniceanu air base in southeast Romania where several hundred US troops are also stationed.

Turkish President Recep Tayyip Erdoğan (The Obama White House YouTube channel)

With Turkey's currency crashing, the government's response has been to blame outsiders and double down on bad economic policy that is only making it worse.

The Turkish lira had lost 44 percent of its value against the dollar this year before recovering slightly overnight. And there are already signs that it's dragging down markets in Asia.

The crisis accelerated last Friday after President Trump promised to double tariffs on Turkish exports because of Turkey's continued detention of American Pastor Andrew Brunson.

Turkish President Recep Tayyip Erdoğan said Monday his nation is under siege, accusing the U.S. of stabbing an ally in the back. Today he announced a boycott of US electronics.

Between 20,000 and 30,000 Islamic State (ISIS) fighters remain in Iraq and Syria despite the jihadist group's defeat and a halt in the flow of foreigners joining its ranks, a UN report released Monday says, according to AFP.

The report by UN sanctions monitors estimates that between 3,000 and 4,000 ISIS jihadists were based in Libya while some of the key operatives in the extremist group were being relocated to Afghanistan.

Member-states told the monitors that the total ISIS membership in Iraq and Syria was "between 20,000 and 30,000 individuals, roughly equally distributed between the two countries."

A CNN contributor who also writes for a Pakistani newspaper says that people who criticize Muslims and their political agenda in the West are participating in "domestic terrorism."

It is Islamists, who sometimes commit acts of terror, who are the real victims.

So suggested Rafia Zakaria in a CNN forum on the recent attack by social-media platforms on Alex Jones and his Infowars website.

In one a series of short commentaries on the issue, Zakaria said the censorship of pure speech, which would have been unconstitutional had the social media behemoths not been unregulated commercial enterprises, was important to recognizing "nativist, nationalist and white supremacist hate speech as a form of terrorism."

There already are laws to prohibit speech that involves threats against individuals or groups.

# US blacklists Russian, Chinese companies for breaking North Korea embargo

by Staff Writers  
Washington (AFP) Aug 16, 2018

The US Treasury announced sanctions on Russian and Chinese companies Wednesday for violating the economic embargo on North Korea as Washington seeks to maintain pressure on Pyongyang over its nuclear program.

The Treasury accused China-based Dalian Sun Moon Star International Logistics Trading Co and its Singapore-based affiliate, SINSMS Pte., of falsifying documents to facilitate shipments of alcohol and cigarettes to North Korea.

Those shipments helped fuel what the Treasury alleged was a huge "illicit" cigarette trade earning the Pyongyang regime \$1 billion a year.

It also blacklisted Russia-based Profinet Pte. for violating UN sanctions by providing loading and refueling services to sanctioned North Korean-flagged ships at three eastern Russia ports.

Also named was Profinet director general Vasili Aleksandrovich Kolchanov, whom the Treasury said "was personally involved" in deals with the North Koreans.

"Treasury reminds the shipping industry... of the significant risks posed by North Korea's shipping practices," the Treasury said in a statement.

Teens, especially girls, whose parents are religious may be less likely to die by suicide, no matter how they feel about religion themselves, new research suggests.

The lower suicide risk among those raised in a religious home is independent of other common risk factors, including whether parents suffered from depression, showed suicidal behavior or divorced, the Columbia University researchers said.

Baker Jack Phillips poses in his Masterpiece Cakeshop in Lakewood, Colorado, September 21, 2017.

Colorado baker Jack Phillips, who earlier this year won a United States Supreme Court case over his refusal on religious grounds to make a same-sex wedding cake, is back in court over his objection to making a transgender-themed cake.

In June, the Supreme Court ruled 7-2 in favor of Phillips, arguing that the Christian baker had been mistreated by Colorado's Civil Rights Commission due to his sincerely-held religious beliefs.

A protester holds a placard during a rally by hundreds of Christians against recent attacks on churches nationwide, in Mumbai, February 9, 2015. Five churches in the Indian capital New Delhi have reported incidents of arson, vandalism and burglary. The latest was reported last week when an individual stole ceremonial items.

An Indian pastor and his son were beaten with sticks and clubs by a group of about 30 Hindu radicals while walking home from a prayer meeting, a rights group has reported.

Hindus account for over 80 percent of Nepal's 26 million people. According to the census, there are 364,000 Christians.

A law criminalizing religious conversions and the "hurting of religious feelings" went into effect in Nepal this week, a year after the [bill was passed](#).

As World Watch Monitor reported last year, Nepal's Christian minority fears the new law will be abused by those seeking to settle scores — as has happened frequently in neighboring India.

After the bill was passed, Nepali MP Lokmani Dhakal [asked for the removal of the sections criminalizing conversions](#), saying: "It seems very clear to me that this country, when preparing the civil code, has forgotten it is a signatory to international treaties that protect the freedom of religion and human rights. ... Please don't let it be possible for the world to say of Nepal that we are the kind of nation that on the one hand signs international treaties, but when making internal laws, and in implementing them, does something else."

Germany's Cabinet on Wednesday approved a third gender option for official records that will allow people to be registered as "diverse," complying with a ruling from the country's highest court.

In November, the Federal Constitutional Court decided that people must be allowed to be entered in records as neither male nor female, ordering

authorities either to create a third identity or scrap gender entries altogether.

It ruled on a case in which a plaintiff sought unsuccessfully to have their entry in the birth register changed from "female" to "inter/diverse" or "diverse." Until now, the only other option was to leave the gender blank.

### Watch Now

During a three-year legal battle, the plaintiff provided a genetic analysis showing one X chromosome but no second sex chromosome. Women have two X chromosomes, while men have one X and one Y chromosome. The top court found that authorities could decide to do without any gender identity in civil registers or allow people in a similar situation to choose "another positive designation of their sex that is not male or female."
