والعلامات حتى 14 مايو 2019

Holy_bible_1

اكرر هدفي فقط من هذه الخدمة أن نذكر بعضنا باننا نحتاج ان نستعد أي حياة اليقظة الروحية. والاستعداد ليس فقط قبل مجيء المسيح بل ايضا قبل الظلمة التي ستسبق مجيؤه ليكون عندنا زيت في مصابيحنا يكفي ان نعبر هذه الظلمة وتكون مصابيحنا مضيئة وقت مجيؤه او من منا سيسلم وديعته في أي وقت . بمعنى نحتاج من الان ان نستعد بقوة بأيمان عامل وبتنقية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحنا لان الظلمة والضيق اقتربت جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة لان وقتها تجميع زيت سيكون صعب جدا بل أستطيع ان أقول من مثل العذاري انه لن يكون هناك زيت الا ما جمعه سابقا .

أفضل ان اقول لنفسي ولكم استعدوا الان لأنه اقترب فنكون مستعدين سواء جاء او نحن ان سلمنا وديعتنا عن أنى لا اقول انه اقترب لكيلا يقال عني كاذب وانشر اشاعات او اخيف البعض

ولكنه يأتي بسرعة بغته. لا اعتقد اي أحد ندم لأنه كان مستعد ومنتظر مجيء المسيح ولم يأتي

المسيح في زمنه ولكنه انتقل وهو مستعد ولكن كثيرين جدا ندموا على عدم الاستعداد عندما

انتقلوا

المسيح قال بعض العلامات مثل

انجيل لوقا 21

21: 10 ثم قال لهم تقوم امة على امة ومملكة على مملكة

21: 11 وتكون زلازل عظيمة في اماكن ومجاعات واوبئة وتكون مخاوف وعلامات عظيمة من

السماء

21: 25 وتكون علامات في الشمس والقمر والنجوم وعلى الارض كرب امم بحيرة البحر والامواج

تضج

21: 26 والناس يغطى عليهم من خوف وانتظار ما يأتي على المسكونة لان قوات السماوات

تتزعزع

21: 27 وحينئذ يبصرون ابن الانسان اتيا في سحابة بقوة و مجد كثير

سفر اعمال الرسل 2

2: 19 واعطي عجائب في السماء من فوق وآيات على الارض من أسفل دما ونارا وبخار دخان

2: 20 تتحول الشمس الى ظلمة والقمر الى دم قبل ان يجيء يوم الرب العظيم الشهير

2: 21 ويكون كل من يدعو باسم الرب يخلص

لماذا قال المسيح بعض العلامات؟

أولا لكيلا نرتاع

انجيل متى 24

مت 24: 6 وسوف تسمعون بحروب واخبار حروب **لا ترتاعوا** لأنه لا بد ان تكون هذه

كلها ولكن ليس المنتهى بعد

ثانيا لنؤمن

إنجيل يوحنا 14: 29

وَقُلْتُ لَكُمْ الْآنَ قَبْلَ أَنْ يَكُونَ، حَتَّى مَتَى كَانَ تُؤْمِنُونَ.

ثالثا لننتبه ونستعد

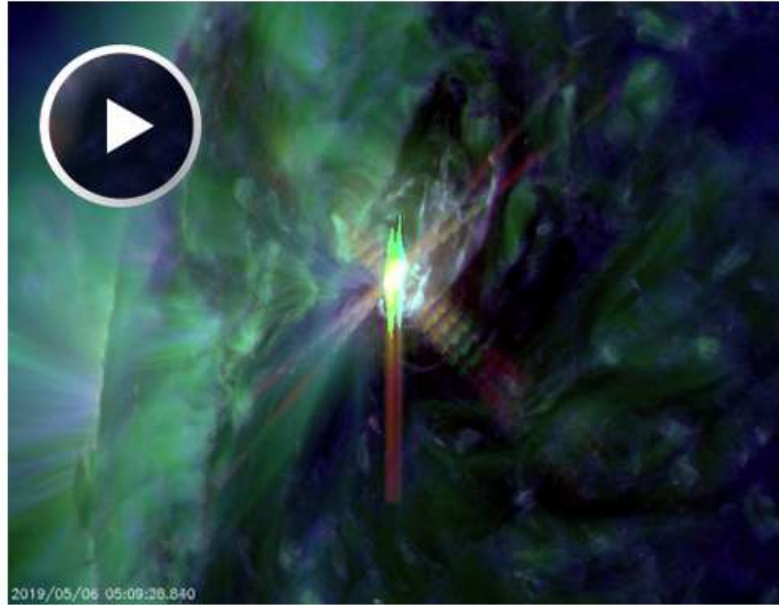

انجيل لوقا 21

28 وَمَتَى ابْتَدَأَتْ هَذِهِ تَكُونُ، فَانْتَصِبُوا وَارْفَعُوا رُؤُوسَكُمْ لِأَنَّ نَجَاتَكُمْ تَقْتَرِبُ.»

SOLAR FLARE MOVIE: Yesterday, active sunspot AR2740 produced the strongest solar flare in more than a year—an [M1-class](#) eruption. Extreme ultraviolet telescopes onboard NASA's Solar Dynamics Observatory recorded a must-see movie of the blast:

The bright flash of UV radiation from this flare ionized the top of Earth's atmosphere, producing a brownout of shortwave radio signals over Asia and the Indian Ocean: [map](#). Frequencies affected were mainly below 20 MHz. Ships at sea and ham radio operators may have noticed the disturbance on Monday, May 6th, around 05:10 UT.

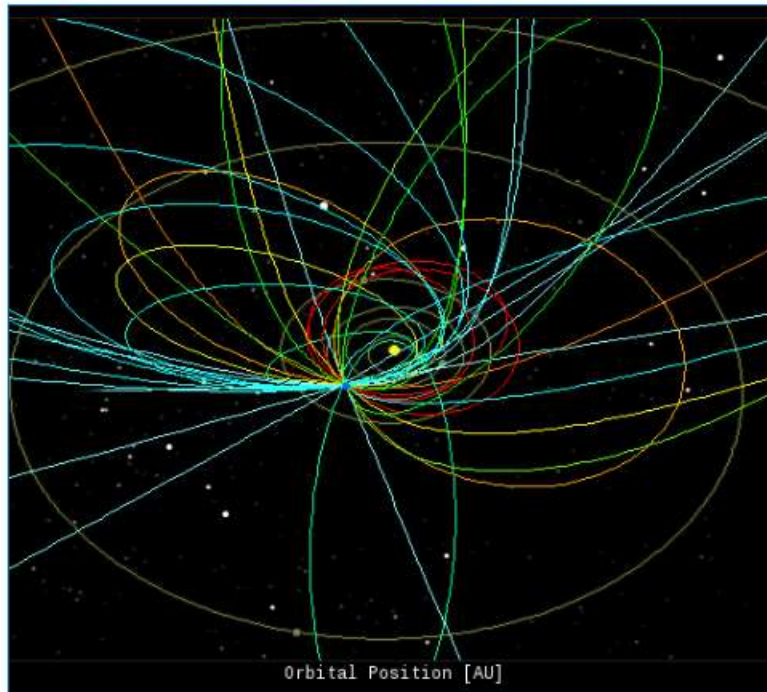

The movie also shows a filament of matter racing away from the explosion. This formed the core of a coronal mass ejection (CME) which, according to NOAA analysts, will not hit Earth.

While the calendar shows it's more than six weeks into spring, Mother Nature dealt a wintry blow to Minnesota with a winter-like storm that unleashed historic snow amounts in some locations on Wednesday into Thursday.

The same storm system that brought an **outbreak of severe weather to the South-Central states** through the first portion of this week created enough cold air to produce a zone of heavy accumulating snow on its northwestern side.

Scientists Solve Mystery Of Strange 'Sea' Appearing In Antarctica

1 May 2019, 10:47 am EDT By Diane Samson Tech Times

Close

Satellite image of the Maud Rise Polynya in the Lazarev Sea. Researchers revealed that the massive Maud Rise Polynya that appeared in Antarctica in 2017 was caused by a cyclone. They warned that more polynyas will appear as the frozen continent is exposed to intense cyclones caused by climate change. (NASA Worldview)

A massive hole appeared in the middle of Antarctica's sea ice in 2017, perplexing scientists because the phenomenon was known to occur in the 70s.

The hole, called a polynya, was spotted through satellite images of Antarctica. It appeared on the Lazarev Sea and was said to span hundreds of thousands square kilometers across.

Now, a team of researchers believes that they know what caused the mystery hole.

Antarctica Has A Hole

Around mid-September 2017, scientists spotted a 9,500-square-kilometer [hole at the center of an ice pack](#) over the Lazarev Sea. They named it Maud Rise Polynya because it was located on the ocean plateau Maud Rise. By October, the mysterious hole has grown to 800,000 square kilometers.

Scientists were surprised to see the polynya because the [sea ice in Antarctica](#) is at its thickest during the winter. The phenomenon was also known to occur in the 70s back when satellite observations of the frozen continent were just becoming more common.

State officials are warning the public about a disease in dogs that can be passed to humans.

State Veterinarian Dr. Jeff Kaisand has confirmed several cases of "canine Brucellosis" coming from a commercial small-dog breeding facility in Marion County. The sickness is known to only affect dogs and humans, according to the Iowa Department of Public Health.

"We are in the process of notifying the individuals who have custody of the exposed dogs," a Friday news release from the Iowa Department of Agriculture and Land Stewardship states. "Both the animals and the facilities are quarantined while the dogs

US Air Force completes successful shoot down of air-launched missiles

by Staff Writers

The Air Force Research Laboratory (AFRL) Self-Protect High Energy Laser Demonstrator (SHIELD) Advanced Technology Demonstration (ATD) Program successfully completed a major program milestone April 23, 2019 with the successful surrogate laser weapon system shoot down of multiple air launched missiles in flight.

The SHIELD program is developing a directed energy laser system on an aircraft pod that will serve to demonstrate self-defense of aircraft against surface-to-air (SAM) and air-to-air (AAM) missiles.

"This critical demonstration shows that our directed energy systems are on track to be a game changer for our warfighters," said Dr. Kelly Hammett, director of AFRL's Directed Energy Directorate.

File image of the Self-Protect High Energy Laser Demonstrator

During the series of tests at the High Energy Laser System Test Facility at White Sands Missile Range, the Demonstrator Laser Weapon System (DLWS) (Figure 1), acting as a ground-based test surrogate for the SHIELD system, was able to engage and shoot down several air launched missiles in flight. The demonstration is an important step of the SHIELD system development, by validating laser effectiveness against the target missiles. The final SHIELD system, however, will be much smaller and lighter, as well as ruggedized for an airborne environment.

Beijing slams US warship sail-by in South China Sea

by Staff Writers
Beijing (AFP) May 6, 2019

China said two US warships sailed near disputed islands in the South China Sea without permission on Monday in the latest US challenge to Beijing's territorial claims in the region.

The Chinese navy asked the US vessels to leave after they entered waters adjacent to Gaven and Chigua reefs in the Spratly Islands, which Beijing calls Nansha, the foreign ministry said.

The move comes on top of trade tensions as President Donald Trump said Sunday he would raise tariffs on \$200 billion in Chinese goods on Friday because talks were moving "too slowly".

"The relevant actions of the US warships violated China's sovereignty and undermined peace, security and good order in the relevant sea areas," ministry spokesman Geng Shuang said at a press briefing.

"The Chinese side expresses strong dissatisfaction and resolute opposition" to the operation, Geng added, noting that the ships had entered "without permission".

The US Navy regularly conducts "freedom of navigation operations" to challenge Beijing's vast claims in the sea.

The People's Liberation Army identified the two US ships as the USS Preble and the USS Chung-Hoon, both guided-missile destroyers.

SEOUL, South Korea (AP) – North Korea on Thursday fired two suspected short-range missiles from the country's western area, South Korea's military said, the North's second weapons launch in the last five days and a possible warning that nuclear disarmament talks with Washington could be in danger.

The South's Joint Chiefs of Staff said that the weapons fired flew 420 kilometers (260 miles) and 270 kilometers (167 miles), respectively. It said it's working with the United States to find out more details, such as the type of weapons the North fired.

Maduro providing a 'safe haven' for Iranian terrorists in the West, Pence says

by Joel Gehrke | May 07, 2019 07:49 PM

Venezuelan strongman Nicolás Maduro is partnering with Iran to establish a beachhead for terrorist groups in the Western Hemisphere, Vice President Mike Pence warned Tuesday.

"The Iranian regime has been working with Venezuela's corrupt dictatorship to establish a safe haven for its terrorist proxies," Pence said in an address before the Council of the Americas.

Maduro loyalists deny that Hezbollah, the preeminent terrorist subsidiary of Iran, has a presence in Venezuela, even though the regime's top diplomat traveled to Beirut to meet with a Hezbollah leader last month. U.S. officials have contradicted those denials for years, but Pence's State Department speech intensified the allegations just days after the dictator withstood an opposition-led call for a military uprising to overthrow the regime.

"Venezuela is a failed state," Pence said. "And as history teaches,

Syrian militants fired 36 rockets at Russia's Khmeimim airbase in two attacks on Monday, but both were repelled by the air defenses with no damage dealt, the Russian military said, adding that jets launched strikes in response.

The shelling came from the Idlib de-escalation zone, controlled by the Hayat Tahrir al-Sham terrorist group (formerly known as Al-Nusra Front), the head of the Russian Center for Reconciliation in Syria, Maj. Gen. Viktor Kupchishin, said.

The militants used a drone to direct the fire from multiple launch rocket systems, but the

Britain edges towards cashless future, Sweden urges citizens to stockpile change in case of power cuts, cyber-attack or war

May 6, 2019 | 0 | ★★★★★

(The Times) – Everyone in Sweden has been urged to stockpile coins and banknotes in case the country's move towards a cashless society leaves them without money in a cyber-crisis. In a move that will sound alarm bells in the UK, Sweden — one of the most advanced nations for digital payments — has warned that its people could be unable to buy anything if its computer networks were put out of action.

We can protect LGBTQ people and religious freedom. Pete Buttigieg and Utah show the way.

Advancing civil rights has always required a broad consensus, and that's no different for LGBTQ people. We need church leaders to be part of our fight.

JEFF GRAHAM | OPINION CONTRIBUTOR | 9:43 am EDT May 6, 2019

Democratic presidential candidate Pete Buttigieg is drawing intrigue for his identity as a gay Episcopalian, a combination that may not fit stereotypes of religion and politics but really isn't unique at all.

Ad

Polling shows a majority of gay Americans identify as religious, close to half as Christian. Yet our political discourse more often tries to pit religious believers against the LGBTQ community in a false narrative. With the Supreme Court's announcement that they will hear arguments on three cases on discrimination protections for gender identity and sexual orientation this fall, this perception will only grow more extreme. But the debate over gay rights is not a zero-sum game; we can have public policy that reflects respect both for LGBTQ rights and religious freedom.

Unclear if schools, parents would be notified of visit

A college textbook that explores human sexuality suggests that instructors take their students on "field trips" to local preschools and elementary schools to observe possible "sexual interactions" between students there.

The textbook is part of a course titled "Psychology and Sexual Behavior" offered at the University of North Texas. That course made headlines last week when the news website *Big League Politics* **reported on it**, specifically what appeared to be a presentation in the course exploring "sexual pleasure and response in infants."
