والعلامات حتى 13 أغسطس 2019

Holy_bible_1

اكرر هدفي فقط من هذه الخدمة أن نذكر بعضنا باننا نحتاج ان نستعد أي حياة اليقظة الروحية. والاستعداد ليس فقط قبل مجيء المسيح بل ايضا قبل الظلمة التي ستسبق مجيؤه لأننا نور العالم الذي أصبح مظلم وليكون عندنا زيت في مصابيحنا يكفي ان نعبر هذه الظلمة وتكون مصابيحنا مضيئة وقت مجيؤه او من منا سيسلم وديعته في أي وقت. بمعنى نحتاج من الان ان نستعد بقوة بأيمان عامل بالمحبة والتبشير وبتنقية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحنا لان الظلمة والضيقة اقتربت جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة لان وقتها تجميع زيت سيكون صعب جدا بل أستطيع ان أقول من مثل العذاري انه لن يكون هناك زيت الا ما جمعته سابقا.

أفضل ان اقول لنفسي ولكم استعدوا الان لأنه اقترب فنكون مستعدين سواء جاء او نحن ان
سلمنا وديعتنا عن أنى لا اقول انه اقترب لكيلا يقال عني كاذب وانشر اشاعات او اخيف البعض
ولكنه يأتي بسرعة بغته. لا اعتقد اي أحد ندم لأنه كان مستعد ومنتظر مجيء المسيح ولم يأتي
المسيح في زمنه ولكنه انتقل وهو مستعد ولكن كثيرين جدا ندموا على عدم الاستعداد عندما
انتقلوا

المسيح قال بعض العلامات مثل

انجيل لوقا 21

21: 10 ثم قال لهم تقوم امة على امة ومملكة على مملكة

21: 11 وتكون زلازل عظيمة في اماكن ومجاعات واوبئة وتكون مخاوف وعلامات عظيمة من

السماء

21: 25 وتكون علامات في الشمس والقمر والنجوم وعلى الارض كرب امم بحيرة البحر والامواج

تضج

21: 26 والناس يغطى عليهم من خوف وانتظار ما يأتي على المسكونة لان قوات السماوات

تتزعزع

21:27 وحينئذ يبصرون ابن الانسان اتيا في سحابة بقوة و مجد كثير

سفر اعمال الرسل 2

2: 19 واعطي عجائب في السماء من فوق وآيات على الارض من أسفل دما ونارا وبخار دخان

2: 20 تتحول الشمس الى ظلمة والقمر الى دم قبل ان يجيء يوم الرب العظيم الشهير

2: 21 ويكون كل من يدعو باسم الرب يخلص

لماذا قال المسيح بعض العلامات؟

أولا لكيلا نرتاع

انجيل متى 24

مت 24: 6 وسوف تسمعون بحروب واخبار حروب **لا ترتاعوا** لأنه لا بد ان تكون هذه

كلها ولكن ليس المنتهى بعد

ثانيا لنؤمن

إنجيل يوحنا 14: 29

وَقُلْتُ لَكُمْ الْآنَ قَبْلَ أَنْ يَكُونَ، حَتَّى مَتَى كَانَ تُؤْمِنُونَ.

ثالثا لنتنبه ونستعد

انجيل لوقا 21

28 وَمَتَى ابْتَدَأَتْ هَذِهِ تَكُونُ، فَاَنْتَصِبُوا وَاَرْفَعُوا رُؤُوسَكُمْ لِأَنَّ نَجَاتَكُمْ تَقْتَرِبُ.».

Typhoon Lekima to strengthen, threaten Taiwan to Japan later this week

By Eric Leister, AccuWeather senior meteorologist
August 07, 2019, 12:17:09 PM EDT

Share this article:

Typhoon Lekima is forecast to strengthen significantly this week and pose a threat to lives and property across eastern Asia.

Lekima organized into a tropical storm on Sunday after becoming a tropical depression in the Philippine Sea, east of Luzon, on Saturday. It became a typhoon on Wednesday morning, local time.

Currently, Lekima is a typhoon, with winds equivalent to a category three hurricane in the North Atlantic and Eastern Pacific tropical basins.

A general northwest track over the next several days will keep Lekima over the open waters of the Philippine Sea, limiting impacts to land but allowing it to gain size and strength.

50-year-old records fall as extreme heat bakes western US

Share this article: [f](#) [t](#) [e](#)

August 07, 2019; 8:31 AM

Dangerous heat gripped the western United States on Monday and Tuesday, toppling several longstanding high temperature records that were well into the triple digits. The heat in the West put residents on alert for a high fire danger since the scorching temperatures created the perfect environment for any spark to ignite and quickly spread into a wildfire.

Daily record highs were set on Monday at a number of locations over the interior West. Those records were shattered in places such as Palm Springs, California, as well as Phoenix and Tucson, Arizona.

Police: Woman says she lied in video about spreading HIV

yesterday

AMERICUS, Ga. (AP) — A Georgia woman told police she lied about being HIV-positive in a viral Facebook Live rant in which she claimed to have intentionally infected others.

Americus Police Maj. Herman Lamar told The Associated Press on Wednesday that Brandi Yakeima Lasiter met with detectives and showed them results of a September 2018 blood test indicating she did not have HIV. Lamar said she agreed to take an additional blood test.

Americus police began investigating after receiving links last week to the video that showed Lasiter naming men she claimed to have infected, along with their wives and girlfriends.

“She stated she was angry at the people named in the video when she posted it,” Lamar said.

He said that during her interview with investigators Tuesday, Lasiter also agreed to take a new blood test to prove her HIV status. Police are awaiting results of that test before deciding whether she should face charges, Lamar said.

It is a felony in Georgia to knowingly transmit HIV.

Americus police began investigating Friday after one of the men named in the video filed a complaint and forwarded police a link to the video, Lamar said.

End-Times Expert: U.S. Citizens Ignore Global War on the Horizon

10:30AM EDT 8/6/2019 | SHAWN A. AKERS

Global war is on the horizon, and many Americans are ignoring the signs. *(geralt/Pixabay.com)*

Global tensions are beginning to heat up, and end-times expert Michael Snyder says Americans need to wake up the fact that another world war may be on the horizon. Yet some, he says, are living without a care in the world despite the volatile situations between Israel and Iran and China and the U.S.

A global storm, Snyder says, is definitely headed our way.

"It's kind of quite right now, so a lot of people are using this time to enjoy life, to party and have a good time," Snyder told Dr. Steve Greene on a recent episode of "Greenelines" on the Charisma Podcast Network. "I really think that right now is a time for preparation. Not just physical preparation but spiritual preparation, getting your house in order and getting things you need to get done for whatever is coming.

Japan to Create Military Space Unit to Catch Up With Rivals - Reports

by Staff Writers
Tokyo, Japan (Sputnik) Aug 07, 2019

The Japanese government intends to create a military space unit of the country's Self-Defence Forces in 2020 in connection with the increased use of space for defense purposes by other countries, including the United States, Russia and China, the Yomiuri Shimbun newspaper reported on Monday.

According to the newspaper, it is expected that a new 70-strong unit will be stationed at an airbase in the city of Fuchu west of Tokyo. The plan for its creation was drafted in December 2018.

The Japanese government is currently working on a ground-based space tracking system comprising a highly sensitive radar and an optical telescope, its operation is expected from 2023, the publication said.

The main task of the unit will be to monitor space debris, threats of attacks or interference by other countries' satellites.

Launch day at Tanegashima, Japan.

Since the Japanese Self-Defence Forces did not have such experience, the unit's employees will be sent for training to the US Armed Forces and to Japanese aerospace agency JAXA.

KEY POINTS

- Bank of America sees a greater than 30% chance of a recession in the next year, based on recent data.
- Some economic indicators are “flashing yellow,” signaling a coming recession.
- Head of U.S. economics Michelle Meyer says the “bright spot” of the economy is that initial jobless claims remain at low levels.

A NEW SOURCE OF SPACE RADIATION: Astronauts are surrounded by danger: hard vacuum, solar flares, cosmic rays. Researchers from UCLA have just added a new item to the list. Earth itself.

"A [natural particle accelerator](#) only 40,000 miles above Earth's surface is producing 'killer electrons' moving close to the speed of light," says Terry Liu, a newly-minted PhD who studied the phenomenon as part of his thesis with UCLA Prof. Vassilis Angelopoulos.

This means that astronauts leaving Earth for Mars could be peppered by radiation coming at them from behind—from the direction of their own home planet.

NASA's THEMIS spacecraft ran across the particles in 2008 not far from the place where the solar wind slams into Earth's magnetic field. Researchers have long known that shock waves at that location could accelerate particles to high energies—but not *this* high. The particles coming out of the Earth-solar wind interface have energies up to 100,000 electron volts, ten times greater than previously expected.

How is this possible? Liu found the answer by combining THEMIS data with computer simulations of the sun-Earth interface. When the solar wind meets Earth, it forms a shock wave around Earth's magnetic field, shaped like the bow waves that form ahead of a boat moving through water. Within this "bow shock" immense stores of energy can be abruptly released akin to the sonic boom of an airplane.

Liu found that some electrons are shocked not just once, but twice or more, undergoing mirror-like reflections within the bow shock that build energy to unexpected levels. Most of the boosted particles shoot back into space away from Earth.

Chinese House Church Worships in a Bathhouse to Evade Shutdown

By Editor on August 6, 2019 - 1 Comment

(Bitter Winter) — Since the new Regulations on Religious Affairs came into effect in 2018, all places of worship that are not part of the official, CCP-run religious institutions face the risk of being eliminated altogether and forced to be put under the state's control. To continue adhering to their faith, many house church Christians have been forced to adopt a variety of measures to escape harassment by the government.

In April, a house church meeting venue in a city of Inner Mongolia was shut down by the local United Front Work Department and Religious Affairs Bureau on the grounds that it was holding "illegal gatherings." The person in charge was threatened with arrest if he continued holding congregation meetings.

In first for Arab world, openly gay candidate runs for Tunisia's presidency

France 24 09 August 2019

Baatour's candidacy marks "a first which will without doubt be a benchmark in history", his party said.

A lawyer at the Court of Cassation, Tunisia's highest court, the Liberal Party leader presents himself as a defender of [LGBT rights](#).

But ahead of his announcement, a petition signed by 18 groups who campaign for those rights warned his candidacy would represent a "danger" for their communities.

Baatour was jailed for three months in 2013 for "sodomy" with a 17-year-old student, an accusation he has always denied.

Having a criminal record does not automatically ban Tunisians from standing in elections.

'The fact that I'm gay doesn't change anything'

"The fact that I'm gay doesn't change anything. It's a candidacy like all the others," Baatour told AFP.

"I have an economic, social, cultural and educational programme for everything that affects Tunisians in their daily lives," he added.

Baatour is co-founder of the Shams association, through which he has for years campaigned against Tunisia's criminalisation of gay sex, which carries a sentence of up to three years.

Convictions for same-sex relations rose by 60% last year to 127 from 79 in 2017, according to Shams, which documents arrests and cases. It recorded more than 25 convictions in the first quarter of 2019.
