اكرر هدفي فقط من هذه الخدمة أن نذكر بعضنا باننا نحتاج ان نستعد أي حياة اليقظة الروحية.
والاستعداد ليس فقط قبل مجيء المسيح بل ايضا قبل الظلمة التي ستسبق مجيؤه لأننا نور العالم
الذي أصبح مظلّم وليكون عندنا زيت في مصابيحنا يكفي ان نعبر هذه الظلمة وتكون مصابيحنا
مضيئة وقت مجيؤه او من منا سيسلم وديعته في أي وقت. بمعنى نحتاج من الان ان نستعد بقوة
بأيمان عامل بالمحبة والتبشير وبتنقية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحنا لان
الظلمة والضيقة اقتربت جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة لان
وقتها تجميع زيت سيكون صعب جدا بل أستطيع ان أقول من مثل العذاري انه لن يكون هناك
زيت الا ما جمعته سابقا.

أفضل ان اقول لنفسي ولكم استعدوا الان لأنه اقترب فنكون مستعدين سواء جاء او نحن ان
سلمنا وديعتنا عن أنى لا اقول انه اقترب لكيلا يقال عني كاذب وانشرا اشاعات او اخيف البعض
ولكنه يأتي بسرعة بغته. لا اعتقد اي أحد ندم لأنه كان مستعد ومنتظر مجيء المسيح ولم يأتي
المسيح في زمنه ولكنه انتقل وهو مستعد ولكن كثيرين جدا ندموا على عدم الاستعداد عندما
انتقلوا

المسيح قال بعض العلامات مثل

انجيل لوقا 21

21: 10 ثم قال لهم تقوم امة على امة ومملكة على مملكة

21: 11 وتكون زلازل عظيمة في اماكن ومجاعات واوبئة وتكون مخاوف وعلامات عظيمة من

السماء

21: 25 وتكون علامات في الشمس والقمر والنجوم وعلى الارض كرب امم بحيرة البحر والامواج

تضج

21: 26 والناس يغطى عليهم من خوف وانتظار ما يأتي على المسكونة لان قوات السماوات

تتزعزع

21: 27 وحينئذ يبصرون ابن الانسان اتيا في سحابة بقوة و مجد كثير

سفر اعمال الرسل 2

2: 19 واعطي عجائب في السماء من فوق وآيات على الارض من أسفل دما ونارا وبخار دخان

2: 20 تتحول الشمس الى ظلمة والقمر الى دم قبل ان يجيء يوم الرب العظيم الشهير

2: 21 ويكون كل من يدعو باسم الرب يخلص

لماذا قال المسيح بعض العلامات؟

أولا لكيلا نرتاع

انجيل متى 24

مت 24: 6 وسوف تسمعون بحروب واخبار حروب **لا ترتاعوا** لأنه لا بد ان تكون هذه

كلها ولكن ليس المنتهى بعد

ثانيا لنؤمن

إنجيل يوحنا 14: 29

وَقُلْتُ لَكُمْ الْآنَ قَبْلَ أَنْ يَكُونَ، حَتَّى مَتَى كَانَ تُمْنُونَ.

ثالثا لنتنبه ونستعد

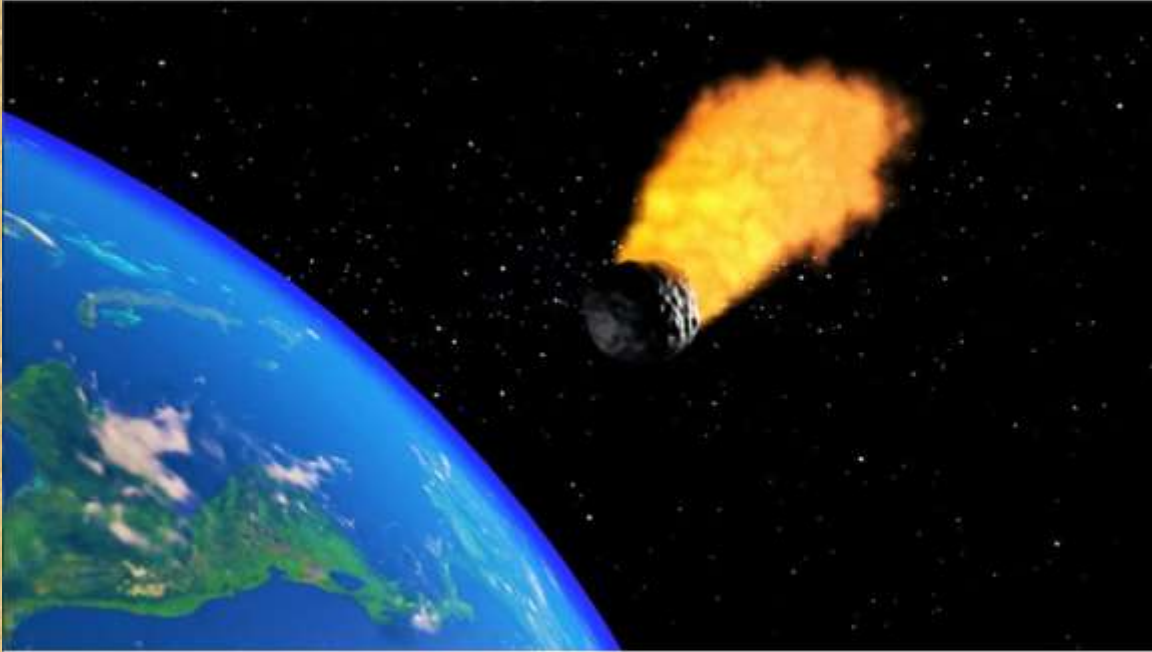

28 وَمَتَى ابْتَدَأَتْ هَذِهِ تَكُونُ، فَأَنْتَصِبُوا وَارْفَعُوا رُؤُوسَكُمْ لِأَنَّ نَجَاتَكُمْ تَقْتَرِبُ.».

NASA monitoring 5 asteroids headed toward earth over the next few days

Jun 3, 2020 | 0 | ★★★★★

(ETH) – As if 2020 hasn't seen enough, NASA is reportedly keeping a watch on five asteroids that are reportedly heading toward Earth over the next few days, with one the asteroids being the size of a stadium according to [WMBF News](#).

This comes as the official report from the agency's [asteroid watch](#) stated that the largest of the five asteroids currently being tracked is over 1,100 feet wide, which roughly the size of a stadium.

MYRTLE BEACH, S.C. (WMBF) – NASA is keeping tabs on five asteroids heading toward Earth over the next few days, with one the size of a stadium.

According to the agency's [asteroid watch](#), the largest of the five currently being tracked is 1,100 feet wide, roughly the size of a stadium.

It's expected to be nearest to the Earth on June 6. However, it's not supposed to be a threat, as the closest it's projected to get is 3.16 million miles away.

B-CLASS SOLAR FLARE: New-cycle sunspot AR2765 just produced a [B6.4-class](#) solar flare. NASA's Solar Dynamics Observatory captured the explosion on June 7th at 21:48 UT:

B-class solar flares are considered to be relatively minor. But consider this: A typical B-class solar flare releases as much energy as 100 million WWII atomic bombs. Only on the sun, which is itself a 10^{27} ton self-contained nuclear explosion, would such a blast be considered "minor."

In fact, B-flares *can* hurl CMEs toward Earth and spark auroras. Probably not this time, though. Initial movies of the explosion suggest that no debris is heading our way.

Boulder: A dazzling fireball meteor captured in northern Colorado

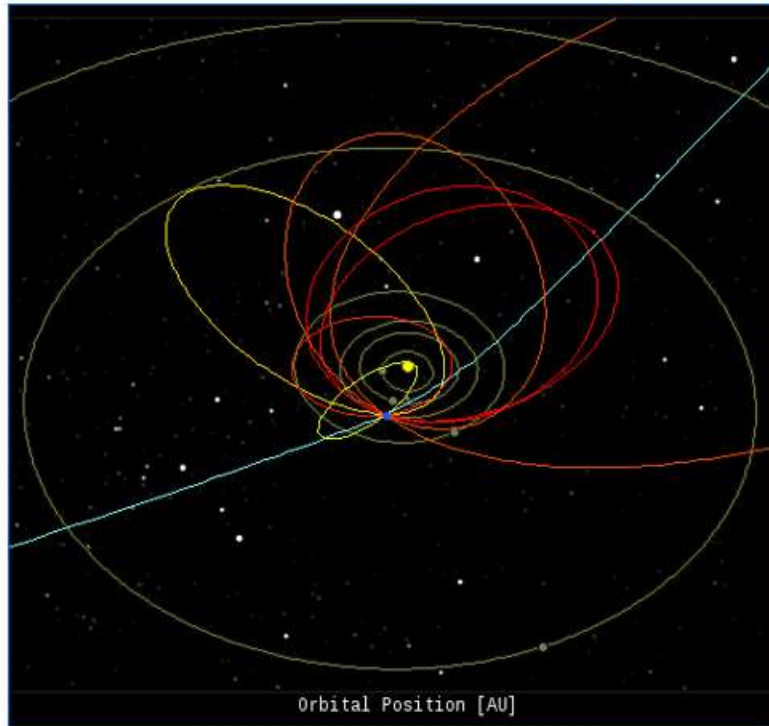

The International Meteor Organisation (IMO) received more than 50 reports from people who spotted the shooting star. Many witnesses were looking out for the launch of SpaceX's Crew Dragon on Saturday when they spotted the fireball streaking across the sky.

First COVID-19, Now This: NOAA Predicts Above-Average 2020 Hurricane Season

06-01-2020 - CBN News

Just as Americans begin to slowly emerge from COVID-19 stay-at-home orders, another potential threat to normal life is on the horizon – the 2020 Atlantic hurricane season, which officially begins on June 1.

This year the National Oceanic and Atmospheric Administration (NOAA) is forecasting between 13 and 19 named storms, six to 10 of which could become hurricanes.

As many as six of those hurricanes could develop into major storms of Category 3, 4, or 5 with winds of 111 miles per hour or higher.

5.5 magnitude quake near Ridgecrest rattles Southern California

A magnitude 5.5 earthquake struck near Ridgecrest Wednesday evening and was felt across Southern California, according to the U.S. Geological Survey.

The temblor hit at about 6:32 p.m. about 14 miles east of Ridgecrest, which has seen thousands of quakes since two large ones around July 4 last year, USGS said.

Wednesday's quake had a preliminary magnitude of 5.1 but was upgraded to 5.5.

The incident triggered a ShakeAlert as far as Los Angeles, warning people to drop and seek safety.

A map provided by the U.S. Geological Survey shows a 5.5 magnitude quake that hit near Ridgecrest on June 3, 2020.

JAKARTA, June 3 (Xinhua) -- An earthquake with a magnitude of 5.7 struck off Indonesia's Bali Island in the central part of Indonesia Wednesday night, the meteorology and geophysics agency said here.

The agency earlier reported the quake with a magnitude of 6.0, said an official in charge of the agency.

"The quake did not potentially trigger a tsunami, because its center is very deep," the official told Xinhua via phone.

The quake rocked at 22: 54 p.m. Jakarta time, the official said.

Indonesia has been frequently hit by earthquakes as it lies on a vulnerable quake-impacted zone called "the Pacific Ring of Fire." Enditem

Earthquake fault near Tonopah still active with 6,500 aftershocks

RENO — The magnitude 6.5 Monte Cristo Earthquake near Tonopah is still rolling. Two weeks after it woke Nevadans, the Nevada Seismological Lab has tracked a phenomenal 6,500 aftershocks — four at magnitude 5.0 and greater, from the earthquake sequence.

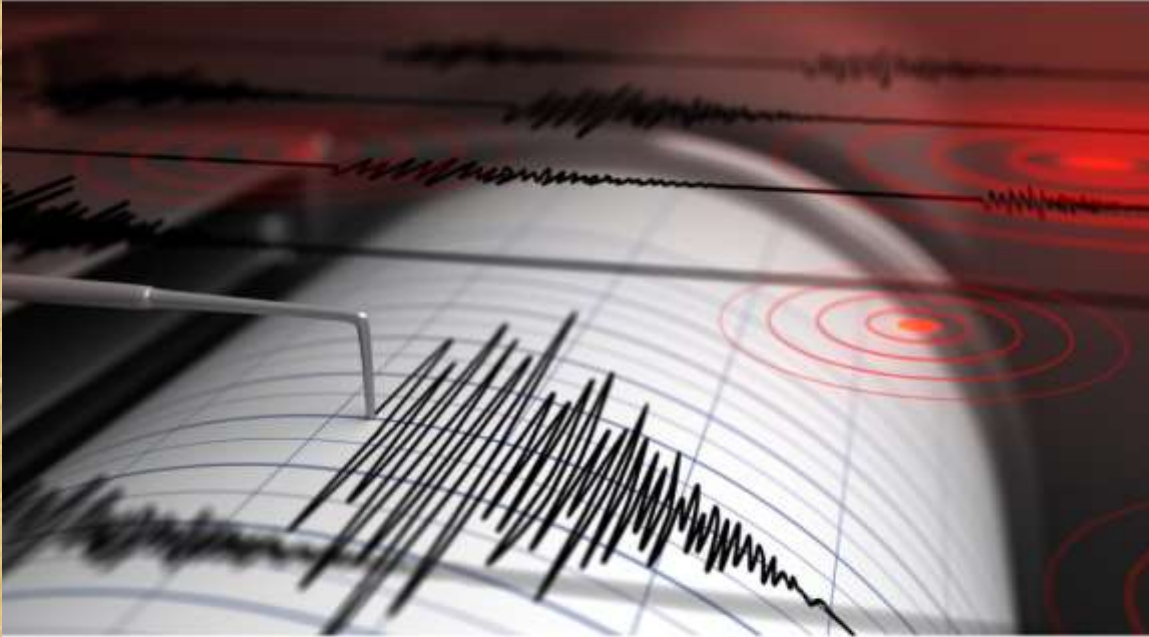

"The aftershocks could continue for years, a decade," Ken Smith, seismic network manager and associate director of the Nevada Seismological Lab in the University's College of Science, said. "The large 1954 earthquakes in December of that year were preceded by a series of large magnitude earthquakes and aftershock sequences that began in July. So this may be an indication that this is not over. Fortunately today we have real-time data to observe the progress of activity that may suggest another larger event. Keep in mind, though, each one of these energetic aftershock sequences following large Nevada earthquakes evolve in their own unique ways."

The USGS, who is partnering with the Nevada Seismological Lab to monitor the earthquake sequence, estimates that for the week through June 6, there is a 99 percent chance of a magnitude 3 or higher earthquake with as many as 22-49 such events, the chance of magnitude 5

(OPINION) Michael Snyder – Billions upon billions of voracious desert locusts are ravenously devouring crops over a vast portion of the globe that stretches from eastern Africa all the way to India. This unprecedented plague was supposed to be subsiding by now, but instead, a fourth generation of locusts has emerged that is producing swarms that are “up to 8,000 times larger” than what we witnessed earlier this year.

Some of these swarms are the size of major cities, they can travel up to 150 kilometers a day, and when they descend upon a farm they can literally eat everything there **in as little as 30 seconds**. Because these swarms are not affecting the United States, most Americans don't understand the immense devastation that is happening on

(ETH) – Tens of millions are on the verge of facing massive food shortages on the continent of Asia after a new plague of locusts has ravaged a path of destruction across India and Pakistan according to a report from [the Express](#).

According to the report, In Pakistan, a national emergency has just been declared after an outbreak of locusts, of "Biblical Proportions" has reportedly wreaked havoc across farmland in Eastern Punjab, southern Sindh, and southwestern Baluchistan provinces. Meanwhile, In western and central India up to 125,000 acres of crops have been completely destroyed during the worst outbreak the country has faced in decades.

According to the Bhagirath Choudhary, director of the New Delhi-based South Asia Biotechnology Centre, an agriculture think-tank said: "We have never, ever seen what we have in the last six months in India – never in the history." Authors Retract Studies That Found Risks of Antimalaria Drugs for Covid-19

Two major studies casting doubt on the ability of antimalaria drugs to treat Covid-19 patients based on data from a little-known Chicago company, Surgisphere Corp., were retracted Thursday.

The Lancet first pulled a study published late last month that found antimalarials provided no benefit as a treatment for Covid-19 infections while increasing the risk of heart problems and death. The New England Journal of Medicine then retracted a separate article, published in early May, that examined the impact of cardiovascular and blood-pressure drugs in Covid-19 patients.

Both articles featured three of the same authors, Mandeep Mehra, Amit Patel and Sapan Desai, and were based on data supplied by Dr.

China has committed "a crime against all of humanity" by deliberately spreading the virus around the world while at the same time, spreading disinformation about its human-to-human properties in the early days of the outbreak, said Gordon Chang, author of *The Coming Collapse of China* and *The Great U.S.-China Tech War*.

The Communist Party of China has not only acted recklessly, but also maliciously, to bring other countries to a fair playing field after the outbreak occurred in Wuhan in late 2019, Chang told Kitco News.

Washington seeks to turn space into combat zone, Russian Ambassador to US says

by Staff Writers
Washington DC (Sputnik) Jun 02, 2020

On 18 May, the US Space Force issued a \$2.375 billion contract to defence company Northrop Grumman to build two missile early detection satellites by the end of December 2025. Dubbed Next Gen OPIR, the satellites are the first of an anticipated five-sat constellation expected to be in place by 2029.

On Friday, the Russian Ambassador to the US Anatoly Antonov said that Washington seeks to turn space into a combat zone, adding that there is no need to exacerbate the situation.

"We see that the Americans, with the support of their NATO allies, are trying to turn space into a combat zone and battleground for possible clashes between our nations", he said in an interview with Zvezda TV Channel. "We are doing everything possible to prevent this."

Antonov went on to say that Moscow has so far failed to convince Washington of the need to work together to prevent an arms race in outer space.

"The Russian government has not managed to convince the US to work together to prevent an arms race in space and to refrain from deploying any weapons there, that's a fact", he said. "We have always tried to convince them that less money is needed to prevent an arms race in the first place than to disarm later."

China's Defense Ministry Urges US, Japan to refrain from arms race in space

by Staff Writers
Beijing (Sputnik) Jun 02, 2020

China is calling upon countries that have created space military units to prevent space from becoming a new international battleground, Chinese Defense Ministry spokesman Ren Guoqiang said on Friday.

"Separate countries have created space military forces, under the pretext of a threat coming from other countries, but in reality in pursuit of military superiority in space", Ren said at a briefing.

"We call upon these countries to adhere to a reasonable and responsible approach, prevent space from becoming a new battleground, and to jointly protect sustainable peace in space".

According to the spokesman, the intensification of military activity in space risks "to trigger an arms race in space and in the future negatively affect global strategic stability". China is closely monitoring any such actions, as stated by the spokesman.

Ren reiterated that China has consistently insisted on the peaceful use of space and strongly opposed any attempts to militarize it.

On 18 May, Japan launched the first-ever space unit of its self-defense forces with a declared mission to monitor threats to the country's satellites. The US space force was established last December.

Unveiling the troops' flag in an official ceremony on 15 May, Pentagon chief Mark Esper said that the unit comes in response to competitor countries having already militarized space.

North Korea threatens to scrap military deal with South

by Staff Writers
Seoul (AFP) June 4, 2020

North Korea threatened Thursday to scrap a military agreement with the South and close down a cross-border liaison office unless Seoul stops activists from flying anti-Pyongyang leaflets over the border.

The statement issued by the powerful younger sister of North Korean leader Kim Jong Un comes amid a deep freeze in inter-Korean ties, despite three summits between Kim and the South's President Moon Jae-in in 2018.

North Korean defectors and other activists have long flown balloons across the border carrying leaflets that criticise Kim over human rights abuses and his nuclear ambitions.

"The South Korean authorities will be forced to pay a dear price if they let this situation go on while making all sort of excuses," Kim Yo Jong said in a statement carried by the official KCNA news agency.

Calling the defectors "human scum" and "rubbish-like mongrel dogs" who betrayed their homeland, she said it was "time to bring their owners to account" in a reference to the South Korean government.

US military's South Korean civilian staff to go back to work

Seoul (AFP) June 3, 2020 - Thousands of South Koreans working at US military bases in the country, furloughed in a row over funding for the American presence on the peninsula, will go back to work this month after Seoul offered to pay their wages.

Washington has around 28,500 troops stationed in South Korea to defend it against the nuclear-armed North and protect US interests in north-east Asia.

But the security allies' relationship has been strained by the Trump administration's demands that the South pay billions of dollars more towards the cost of their presence after the previous funding pact expired last year.

Around 4,000 local civilian employees of US Forces Korea (USFK) were put on unpaid leave in April after funds to pay their salaries ran out with talks stalled on cost-sharing.

China warns Britain interfering in Hong Kong will 'backfire'

By Beiyl SEOW
Beijing (AFP) June 3, 2020

China warned Britain on Wednesday that interfering in Hong Kong will backfire, after the former colonial power vowed to give sanctuary to locals who may flee the city if a controversial security law is passed.

The United States and Britain have enraged Beijing with their criticism of planned national security legislation that critics fear would destroy the semi-autonomous city's limited freedoms.

British Foreign Secretary Dominic Raab has further angered Beijing by suggesting that it had time to "reconsider" the plan, which could soon be enacted after the proposal was endorsed by China's rubber-stamp parliament last week.

Prime Minister Boris Johnson, meanwhile, said London would not "walk away" from Hong Kongers worried by Beijing's control over the international business hub.

India, Australia strengthen defence ties as China tensions loom

by Staff Writers
New Delhi (AFP) June 4, 2020

India and Australia strengthened defence ties Thursday, including sealing a pact to boost military logistics support and maritime cooperation, as both nations experience heightened tensions with regional superpower China.

In a virtual summit held online as the coronavirus pandemic restricts international travel, the two leaders signed a Mutual Logistics Support Arrangement as they hailed an upgrade of their strategic partnership.

"India is committed to further intensifying comprehensive relations with Australia," India's Prime Minister Narendra Modi said in opening remarks.

"This is important not only for our two nations, but is also needed for the Indo-Pacific region as well as for the world."

His Australian counterpart Scott Morrison added that "in a time like this, we want to deal very much with friends and trusted partners".

The foreign and defence ministers will now meet at least biannually to discuss strategic issues, the two nations said in a joint statement.

Other agreements on education, mining, and defence science and technology were also inked during the summit, which took place after two earlier scheduled visits by Morrison to India were postponed because of the Australian bushfires and the pandemic.

UN nuclear watchdog has 'serious concern' at Iran denying inspections

By Jastinder KHERA

Iran has now accumulated enriched uranium at nearly eight times the limit of a 2015 deal and has for months blocked inspections at sites where historic nuclear activity may have occurred, the UN watchdog said Friday.

The International Atomic Energy Agency (IAEA) noted "with serious concern that, for over four months, Iran has denied access to the Agency... to two locations," according to a report seen by AFP.

The IAEA has questions as to the possible "use or storage of nuclear material" at the two sites and that one of them "may have been used for the processing and conversion of uranium ore including fluorination in 2003".

The aforementioned site "underwent significant changes in 2004, including the demolition of most buildings", the IAEA report noted.

US launches first Taliban air strikes since Afghan ceasefire end

by Staff Writers
Kabul (AFP) June 5, 2020

The US launched its first air strikes against the Taliban since a rare ceasefire between the insurgents and Afghan forces ended more than a week ago, the US military said Friday.

The two assaults took place on Thursday and Friday in separate provinces in Afghanistan, US forces spokesman Sonny Leggett said on Twitter.

"These were the 1st US airstrikes against (the Taliban) since the start of the Eid ceasefire," he wrote.

"We reiterate: All sides must reduce violence to allow the peace process to take hold," he added.

Ten members of the Afghan forces were killed on Friday in a separate attack targeting a Humvee vehicle, the Interior Ministry said, blaming the assault on the Taliban.

There was no immediate comment from the group.

The Taliban announced a surprise three-day ceasefire with Afghan forces that ended on May 26 to mark the Eid al-Fitr holiday.

There has since been an overall drop in violence across the country, with the Afghan government saying it is ready to start long-delayed peace talks with the insurgents.

The US negotiator with the Taliban, Zalmay Khalilzad, left Friday for the region to discuss "the practical next steps necessary for a smooth start to intra-Afghan negotiations," the State Department said.

(FOX Business) – Target is temporarily closing 175 stores in 13 states, the company announced Saturday evening. This news comes after videos circulated on social media showing the big-box retailer getting looted amid Minneapolis-based protests related to the death of George Floyd. The protests have resulted in the destruction of several commercial properties.

"We are heartbroken by the death of George Floyd and the pain it is causing communities across the country. At this time, we have made the decision to close a number of our stores. We anticipate most stores will be closed temporarily," the company said in a statement. "Our focus will remain on our team members' safety and helping our community heal."

Do you have to go to “looting school” to learn this stuff? It is not that difficult to smash a few store windows and grab a few things, but some of the incidents that we have witnessed over the last several days have been so bizarre that it is hard to believe that they are actually real. In fact, if they were put into a big Hollywood disaster movie at lot of people would probably dismiss them as “unrealistic”. But it

US Warns No End to Fight Against Islamic State

By Jeff Seldin
June 04, 2020 07:22 PM

FILE - Secretary of State Mike Pompeo speaks at a news conference at the State Department in Washington, April 29, 2020.

More than a year after the U.S.-led coalition declared victory over the Islamic State's self-declared caliphate in Iraq and Syria, a top U.S. official admits the fight against the terror group is not close to over.

U.S. Secretary of State Mike Pompeo delivered the blunt assessment Thursday to representatives of 31 countries and partners during a virtual meeting of the coalition, urging allies not to be complacent.

For Russia, SpaceX success is 'wakeup call'

By Romain COLAS
Moscow (AFP) May 31, 2020

Russia has lost its long-held monopoly as the only country able to ferry astronauts to the International Space Station following the flawless manned launch by US company SpaceX.

The Russian space agency congratulated the United States and Elon Musk's SpaceX on the first crewed flight ever by a private company, but experts said the launch should be a wakeup call for Roscosmos.

"The success of the mission will provide us with additional opportunities that will benefit the whole international programme," cosmonaut Sergei Krikalev, Roscosmos executive director for crewed space programmes, said in a brief video address.

Saturday's launch was the first of American astronauts from US soil since the mothballing of the US shuttle programme in 2011 that left Russia's more basic and reliable Soyuz spacecraft solely responsible for transporting crews.

Astronauts since then have all trained at Star City outside Moscow and studied Russian before blasting off from Baikonur launchpad in Kazakhstan.

'Trampoline is working': Musk taunts Russia

Moscow (AFP) May 31, 2020 - Russian space agency chief Dmitry Rogozin once ridiculed the lack of a US manned flight programme, saying it might as well "deliver its astronauts to the ISS by using a trampoline".

Six years later Elon Musk and NASA had the last laugh.

"The trampoline is working," quipped the 48-year-old US entrepreneur at a post-flight news conference alongside NASA administrator Jim Bridenstine.

Both men laughed. "It's an inside joke," Musk added.

On Saturday, his SpaceX made history by becoming the first commercial company to send humans into orbit.

The US feat and Musk's joke set Russian social media alight, with wits ridiculing Rogozin, and the Russian space chief's name began trending on Twitter.

"How do you like this, Dmitry Rogozin?" one critic prodded.

The **coronavirus** pandemic, **natural disasters** and **civil unrest** have left many wondering whether more disaster is yet to come in 2020. The Bible has warned of trouble and cataclysm in the end days during a seven-year period known as the Tribulation. When asked by his disciples about the end of the world, Jesus Christ is said to have warned of a Tribulation greater than anything witnessed since the beginning of time.

A Crash in the Dollar Is Coming

Bloomberg **Stephen Roach**

Bloomberg June 8, 2020

(Bloomberg Opinion) -- The era of the U.S. dollar's "exorbitant privilege" as the world's primary reserve currency is coming to an end. Then French Finance Minister Valéry Giscard d'Estaing coined that phrase in the 1960s largely out of frustration, bemoaning a U.S. that drew freely on the rest of the world to support its over-extended standard of living. For almost 60 years, the world complained but did nothing about it. Those days are over.

Already stressed by the impact of the Covid-19 pandemic, U.S. living standards are about to be squeezed as never before. At the same time, the world is having

A Storm Is Coming: Why Secularism's Dangerous Agenda Threatens America's Future

06-04-2020 - CBN News

A storm is coming and it has nothing to do with hurricane season. This is a secular storm of dangerous ideas threatening our future.

Christianity in America has been declining for decades, with secularism infiltrating society, even the Christian church, to some degree.

From threats against religious liberty and redefining marriage and family, to attacks on the dignity of human life, today's church is in unprecedented territory. How should Christians respond to this challenge?
