## والعلامات حتى 11 اغسطس 2020

Holy\_bible\_1

اكرر هدفي فقط من هذه الخدمة أن نذكر بعضنا باننا نحتاج ان نستعد أي حياة اليقظة الروحية. والاستعداد ليس فقط قبل مجيء المسيح بل ايضا قبل الظلمة التي ستسبق مجيؤه لأننا نور العالم الذي أصبح مظلم وليكون عندنا زيت في مصابيحنا يكفي ان نعبر هذه الظلمة وتكون مصابيحنا مضيئة وقت مجيؤه او من منا سيسلم وديعته في أي وقت. بمعنى نحتاج من الان ان نستعد بقوة بأيمان عامل بالمحبة والتبشير وبتنقية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحنا لان الظلمة والضيقة اقتربت جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة لان وقتها تجميع زيت سيكون صعب جدا بل أستطيع ان أقول من مثل العذاري انه لن يكون هناك زيت الا ما جمعه سابقا.

أفضل ان اقول لنفسي ولكم استعدوا الان لأنه اقترب فنكون مستعدين سواء جاء او نحن ان  
سلمنا وديعتنا عن أنى لا اقول انه اقترب لكيلا يقال عني كاذب وانشر اشاعات او اخيف البعض  
ولكنه يأتي بسرعة بغته. لا اعتقد اي أحد ندم لأنه كان مستعد ومنتظر مجيء المسيح ولم يأتي  
المسيح في زمنه ولكنه انتقل وهو مستعد ولكن كثيرين جدا ندموا على عدم الاستعداد عندما  
انتقلوا

المسيح قال بعض العلامات مثل

انجيل لوقا 21

21: 10 ثم قال لهم تقوم امة على امة ومملكة على مملكة

21: 11 وتكون زلازل عظيمة في اماكن ومجاعات واوبئة وتكون مخاوف وعلامات عظيمة من

السماء

21: 25 وتكون علامات في الشمس والقمر والنجوم وعلى الارض كرب امم بحيرة البحر والامواج

تضج

21: 26 والناس يغطى عليهم من خوف وانتظار ما يأتي على المسكونة لان قوات السماوات

تتزعزع

21:27 وحينئذ يبصرون ابن الانسان اتيا في سحابة بقوة و مجد كثير

## سفر اعمال الرسل 2

2: 19 واعطي عجائب في السماء من فوق وآيات على الارض من أسفل دما ونارا وبخار دخان

2: 20 تتحول الشمس الى ظلمة والقمر الى دم قبل ان يجيء يوم الرب العظيم الشهير

2: 21 ويكون كل من يدعو باسم الرب يخلص

لماذا قال المسيح بعض العلامات؟

أولا لكيلا نرتاع

انجيل متى 24

مت 24: 6 وسوف تسمعون بحروب واخبار حروب **لا ترتاعوا** لأنه لا بد ان تكون هذه

كلها ولكن ليس المنتهى بعد

ثانيا لنؤمن

إنجيل يوحنا 14: 29

وَقُلْتُ لَكُمْ الْآنَ قَبْلَ أَنْ يَكُونَ، حَتَّى مَتَى كَانَ تُؤْمِنُونَ.

ثالثا لنتنبه ونستعد

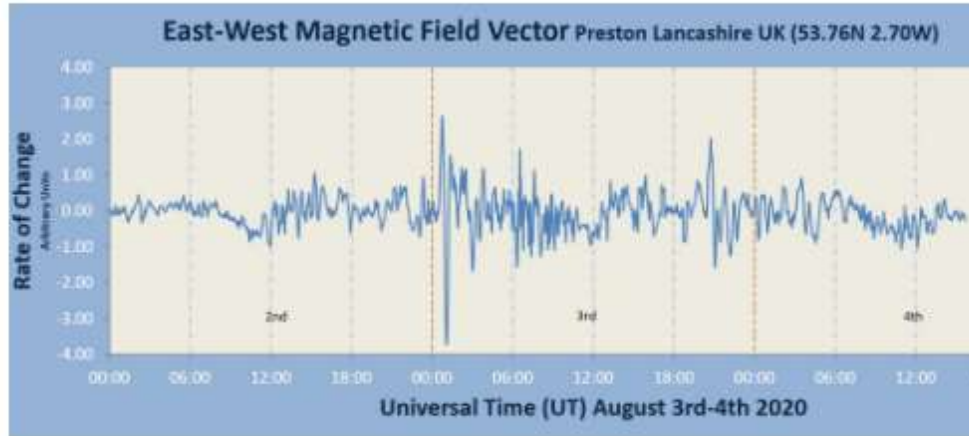

28 وَمَتَى ابْتَدَأَتْ هَذِهِ تَكُونُ، فَاَنْتَصِبُوا وَاَرْفَعُوا رُؤُوسَكُمْ لِأَنَّ نَجَاتَكُمْ تَقْتَرِبُ.».

**EARTH'S MAGNETIC FIELD IS QUIVERING:** A fast-moving (600 km/s) stream of solar wind is blowing around Earth, causing our planet's magnetic field to shake and quiver. "The solar wind is moving the needle on my magnetometer here in the UK," reports Stuart Green, who sends this chart recording from Preston, Lancashire:

"It's always so interesting to see geomagnetic effects for myself, with data streaming down the wires to my PC, showing up as wiggles on a chart." says Green.

"The sensor is buried in my garden about 0.5 meters below the surface in an East/West orientation," he adds. "This allows very sensitive (sub nanotesla) measurements of magnetic declination. The plot shows the change in magnetic flux density in nanotesla occurring between readings every few minutes."

The stream of solar wind causing this unrest is flowing from [a northern hole](#) in the sun's atmosphere. Earth is expected to remain inside it for another ~12 to 24 hours. High latitude sky watchers should remain alert for auroras through August 5th. **Aurora alerts:** [SMS Text](#).

NASA is sounding the alarm over several incoming space rocks, one of which is due to pass within a third of the distance between the Earth and the moon.

To kick things off amid yet another rocky month for Earth and its asteroid hunters, on Tuesday, asteroid 2009 PQ1, measuring 110 meters in diameter, will come within 4.1 million kilometers of Earth. This will be followed just days later by asteroid 2020 OL4 (diameter: 37m) at a distance of 3.6 million km. on Saturday August 8.

# NASA to remove 'offensive' names from planets and other heavenly bodies

'Certain cosmic nicknames are not only insensitive but can be actively harmful'

(NEW YORK POST) -- Political correctness has now expanded to space, where NASA says planets, galaxies and other heavenly bodies will no longer be referred to by “offensive” nicknames.

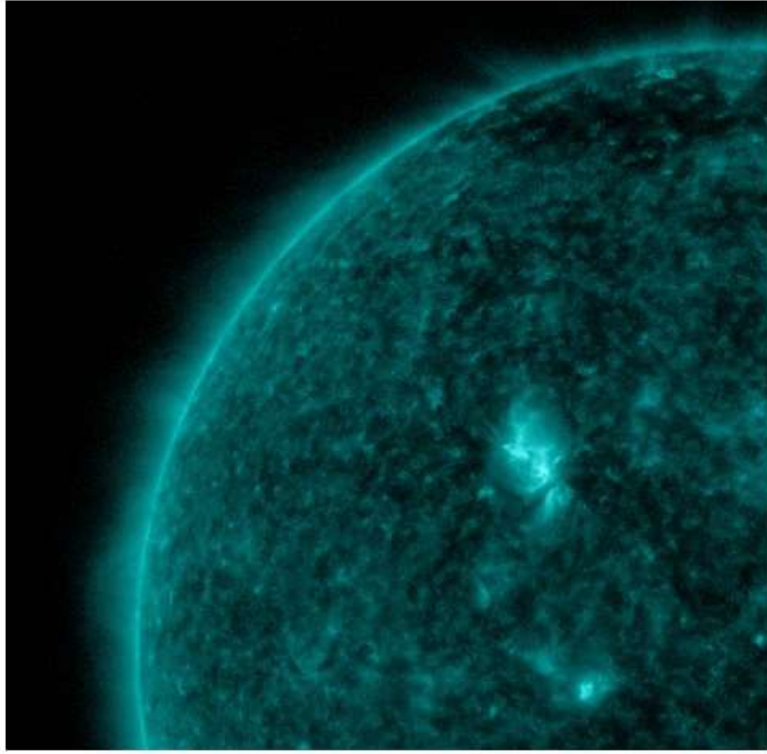

In a press release Thursday, the space agency said that all planets and heavenly bodies will be referred only to by their scientific names, the Houston Chronicle reported.

Under the new rules, the “Eskimo Nebula,” discovered in 1787 by William Herschel, will only be referred to as NGC 2392.

**A NEW-CYCLE SOLAR FLARE:** August 8th began with a bang. At 03:49 UT, the magnetic canopy of new-cycle sunspot AR2770 erupted, producing a [C1-class](#) solar flare. NASA's Solar Dynamics Observatory captured the explosion's extreme ultraviolet flash:

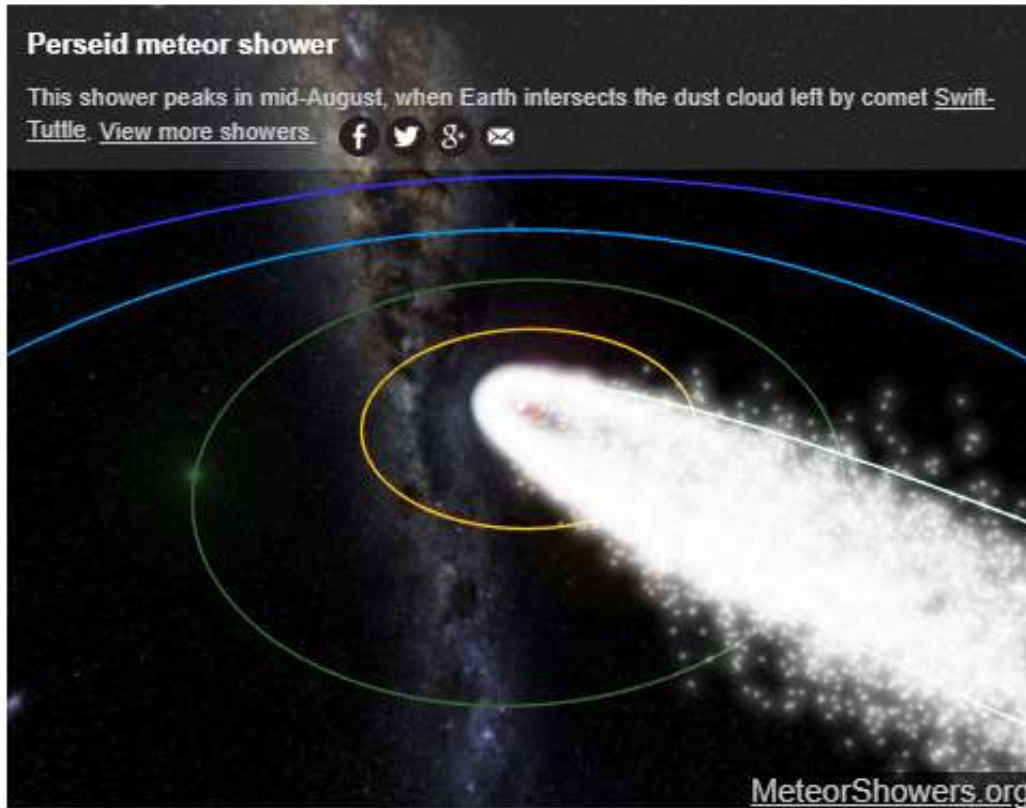

Radiation from the flare ionized Earth's upper atmosphere, briefly disturbing shortwave radio propagation across the western Pacific Ocean: [map](#). Mariners and amateur radio operators might have noticed the effects, which were confined to frequencies below 10 MHz.

**THE 2020 PERSEID METEOR SHOWER:** Earth is entering a stream of debris from giant comet 109P/Swift-Tuttle, source of the annual Perseid meteor shower. If forecasters are correct, the display will peak on the nights of **Aug. 11th** through **Aug. 13th** with dozens of meteors per hour.

[Ian Webster](#) created this interactive visualization of Swift-Tuttle's debris stream cutting across Earth's orbit.

Activity is already picking up; last night NASA's network of [all-sky meteor cameras](#) recorded 16 Perseid fireballs over the USA. A fireball is a very bright meteor, at least as bright as the planets Jupiter or Venus.

No other comet produces fireballs like 109P/Swift-Tuttle—probably a result of its oversized nucleus. The comet's core is 26 km in diameter, and naturally crumbles into fireball-sized chunks. Since 2008, NASA has counted more fireballs from the Perseids than any other shower.

## Tropical Storm Isaias spawns deadly tornado, flooding and widespread outages

Aug 4, 2020 | 0 | \*\*\*\*\*

(CBS) - Tropical Storm Isaias spawned tornadoes and dumped rain along the U.S. East Coast on Tuesday after making landfall as a hurricane in North Carolina, where it smashed boats together and caused floods and fires that displaced dozens of people.

At least two people were killed when one of its twisters hit a mobile home park. About 12 hours after coming ashore, Isaias was still sustaining near-hurricane-strength top winds of 70 mph late Tuesday morning, and its forward march accelerated to 35 mph.

# US Forecasters: Atlantic Hurricane Season to Get Stronger

Trees are buffeted by strong winds as Hurricane Isaias hits the Bahamas on July 31, 2020 in this still image taken from social media video, filmed from the Grand Isle Resort and Spa at Emerald Bay, Great Exuma.

The already record-breaking 2020 Atlantic hurricane season is going to get worse, and forecasters could run out of names for storms, government meteorologists say.

The National Oceanic and Atmospheric Administration updated its forecast Thursday and is now predicting up to 25

## Firefighters battle large fire in Selma

by Terry Woods | Friday, August 7th 2020

Sanger Fire photo by: Super Mega Artists

A five-acre fire in Selma was a challenge for firefighter, with winds spreading the fire through the dry grass quickly to structures and cars in the area. Firefighters from all over the valley were quick to respond.

The fire started around 8:00 PM on a ten-acre parcel of land near McCall and Blaine in Selma. Selma fire PIO says the fire started in some dry grass near an abandoned structure and spread quickly.

As the fire burned, propane and gas cans inside the structures started to explode as well as the gas tanks from the parked cars with the nearest water hydrant a quarter-mile away.

Selma Fire PIO says that four structures and including one house and multiple cars were destroyed by the fire.

### Midwest Severe Threat Continues into the Early Morning Hours

Meteorologist Orelon Sidney looks at the timing of severe storms in the Midwest into the overnight hours.

A derecho raced eastward across the Midwest on Monday, Aug. 10, 2020, where it caused widespread damage to trees, structures and knocked out power to more than one million.

A derecho is a widespread wind damage event caused by severe thunderstorms, and this one got its start in southeast South Dakota and eastern Nebraska during the morning. From there, the destructive thunderstorms spread through Iowa, northern and central Illinois, southern Wisconsin, southwest Michigan, Indiana and northwest Ohio.

### KEY POINTS

- Fauci's testimony before a House subcommittee are at odds with President Trump, who has repeatedly claimed that the virus would "disappear."
- Fauci said the U.S. has so many cases because some states did not shut down early in the outbreak while others reopened too soon.
- He also said there's never a guarantee scientists will discover a safe and effective vaccine for the coronavirus, though he's "cautiously optimistic."

## Abstract

## Objectives

Peripheral blood abnormalities in severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) have not been fully elucidated. We report qualitative and quantitative peripheral blood findings in coronavirus disease 2019 (COVID-19) patients and compare them with a control group.

## Methods

We reviewed electronic medical records, complete blood counts, peripheral blood smears, and flow cytometry data in 12 patients with SARS-CoV-2. These were compared with 10 control patients with symptoms suspicious for SARS-CoV-2 but who tested negative.

## Results

No significant differences were noted in blood counts, except that absolute lymphopenia was present frequently in the control group ( $P < .05$ ). Acquired Pelger-Huët anomaly (APHA) was noted in all COVID-19 cases, in most cases affecting over 5% of granulocytes. This contrasted with APHA in only 50% of control cases, affecting fewer than 5% of granulocytes in all cases ( $P < .05$ ). Monolobate neutrophils were exclusive to COVID-19 cases. COVID-19 patients had greater frequency

The United States has recorded more than 2,000 coronavirus deaths in 24 hours, the highest number of daily fatalities in three months, Johns Hopkins University's real-time tally showed Thursday.

The country, which has seen a major resurgence in coronavirus since the end of June, added 2,060 deaths in one day as well as more than 58,000 new cases, the Baltimore-based university showed at 8:30 pm (0030 GMT Friday).

The last time the US recorded more than 2,000 deaths in 24 hours was on May 7.

## COVID-19 contact tracing app launched in Virginia

August 5, 2020 3:45 pm Bailey Pace

NEWS, TOP STORIES

RICHMOND, Va. (WVVA) - Governor Ralph Northam today announced the launch of COVIDWISE, an innovative exposure notification app that will alert users if they have been in close contact with an individual who has tested positive for COVID-19.

Virginia is the first state in the country to design a COVID-19 app using Bluetooth Low Energy technology developed by Apple and Google, which does not rely on personal information or location data. Users opt-in to download and utilize the free app.

"We must continue to fight COVID-19 from every possible angle," **said Governor Northam.** "The COVIDWISE exposure notification app gives you an additional tool to protect yourself, your loved ones, and your community, while maintaining your personal privacy. I encourage all Virginians to download and use this app, so we can work together to contain this virus."

# US tests intercontinental ballistic missile

by Staff Writers  
Washington (AFP) Aug 4, 2020

The United States on Tuesday successfully tested an unarmed Minuteman III intercontinental ballistic missile (ICBM) in a launch directed from an airborne command center, the Air Force said.

The missile was launched at 12:21 am (0721 GMT) from Vandenberg Air Force Base in California, travelling 6,700 kilometers (4,200 miles) over the Pacific Ocean before landing in the sea near the Marshall Islands.

"The test demonstrates that the United States' nuclear deterrent is safe, secure, reliable and effective," the Air Force said in a statement.

"Airmen... were aboard the US Navy E-6 aircraft to demonstrate the reliability and effectiveness" of the airborne launch control system, it said.

Colonel Omar Colbert, commander of 576th Flight Test Squadron, said "the Minuteman III is 50 years old, and continued test launches are essential."

"This visible message of national security serves to assure our allies and dissuade potential aggressors," he said.

The Air Force added that test launches were "not a response or reaction to world events or regional tensions."

The Minuteman III has been the only surface-to-air missile in the US nuclear arsenal since 2005. It is installed at bases in Wyoming, North Dakota and Montana.

Trident nuclear missiles are deployed on US submarines, and US strategic bombers also carry nuclear devices.

# Pentagon makes case for sea-launched nuclear cruise missile

by Christen Mccurdy  
Washington DC (UPI) Aug 04, 2020

The Pentagon is making a public case for the adoption of a sea-launched nuclear cruise missile, which it says would more effectively deter Russia in the Baltic region.

The Department of Defense posted a press release Tuesday arguing the need for the missile.

It cites a State Department paper, dated July 23, arguing that adoption of the weapon would fill a gap identified in the Pentagon's 2018 Nuclear Posture Review.

According to the Department of Defense, the United States retired its last nuclear sea-launched cruise missile in 2010 -- one of just two remaining theater or tactical nuclear weapons -- where Russia continued a comprehensive program to modernize and expand its theater and tactical nukes.

Defense officials also believe Russian military strategy "actually contemplates the use of these nuclear capabilities in conflict."

"Russia may have pursued this strategy because the United States, unlike Russia, retired most of its non-strategic nuclear systems," said a press release from the Pentagon arguing for adoption of the weapon.

The 2018 Nuclear Posture Review calls for adjustments to U.S. nuclear forces to close this perceived gap on the escalation ladder and reinforce deterrence against low-yield nuclear use, DOD officials said.

# US slaps sanctions on Chinese paramilitary body in Xinjiang

by Staff Writers  
Washington (AFP) July 31, 2020

The United States on Friday imposed sanctions on a major paramilitary group with vast interests in China's northwestern region of Xinjiang, accusing it of abuses against Uighurs and other mostly Muslim groups.

The Xinjiang Production and Construction Corps, which runs its own settlements, universities and media in the region geared at China's Han majority, will have any US-based assets frozen, the Treasury Department said.

"The United States is committed to using the full breadth of its financial powers to hold human rights abusers accountable in Xinjiang and across the world," Treasury Secretary Steven Mnuchin said in a statement.

Founded in the 1950s under orders of communist China's founder Mao Zedong, the Corps, known locally as the Bingtuan, settled demobilized soldiers on work farms in Xinjiang.

It gradually came to run a vast amount of farm land as well as businesses in areas such as real estate, insurance, plastics and cement.

Human rights groups say that China has in recent years stepped up the migration of ethnic Han to the region and has tried to forcibly homogenize Uighurs and other Turkic Muslims, including prohibiting them from many Islamic practices.

Up to 300,000 people in Beirut have been left without a home after the deadly explosion that ripped through a large part of the Lebanese capital on Tuesday, the governor of the city said.

The powerful eruption devastated entire neighborhoods and affected roughly half of the city, Governor Marwan Abboud told local and international media.

With numerous buildings damaged by the blast wave, between 200,000 and 300,000 people in Beirut have been left without a home and will need food, water and shelter. Preliminary estimates place the damage anywhere between \$3 billion and \$5 billion and "maybe more."

Scuffles erupted in Berlin on Friday as police enforced an eviction order for the pub Syndikat, which for decades served as a favorite gathering spot for left-wing activists.

Hundreds of people gathered in Berlin's Neukolln district on Friday for last-ditch protests against the imminent eviction of the pub. The police arrived in large numbers and geared up for the potential repetition of a riot that happened on Saturday last week.

Some clashes occurred between the opposing forces overnight, with activists occasionally pelting the police with firecrackers and bottles, and officers responding with pepper spray.

Nothing that you do on your phone is private. In this day and age, most of us have become extremely dependent on our phones, and most Americans never even realize that these extremely sophisticated little devices are gathering mountains of information on each one of us.

Your phone knows what you look like, it knows the sound of your voice, it knows where you have been, it knows where you have shopped, it knows your Internet searches and it knows what you like to do in your free time.

Google announced that its working on developing the next futuristic technology beyond smartphones -- tattoos that turn the user into a human touchpad. Meanwhile, scientists are developing something way more sinister using similar skin-drawing technology to track its wearer's movements.

Google is developing smart tattoos that, when applied to the skin, will transform the human body into a living touchpad via embedded sensors in the ink. No this isn't science fiction, the wearable project is called "SkinMarks."

Deforestation coupled with the rampant destruction of natural resources will soon have devastating effects on the future of society as we know it, according to two theoretical physicists who study complex systems and have concluded that greed has put us on a path to irreversible collapse within the next two to four decades, as VICE reported.

The research by the two physicists, one from Chile and the other from the UK, was published last week in Nature Scientific Reports. The

# New Study Shows Human Ancestors Had 'Complicated Love Life'

FILE - From left, models representing Flores, Homo sapiens and Neanderthal women stand in the Musee des Confluences, a science and anthropology museum in Lyon, central France, Dec. 18, 2014.

Researchers have confirmed that hundreds of thousands of years ago, Neanderthals mated with at least four other contemporary species of ancient humans, or hominids, and the evidence lives on in the genes of modern men and women.

A study published Thursday in the science journal PLOS Genetics shows how researchers from Cornell University

You may have noticed that food prices have started to go up very aggressively. I repeatedly warned my readers that this is precisely what would happen, and more price increases are on the way. Fear of COVID-19 has sparked a tremendous amount of extra demand as Americans have feverishly stocked up their pantries, and at the same time the virus has made it very difficult for the major food companies to keep up. # The Next Global Depression Is Coming and Optimism Won't Slow It Down

Ian Bremmer

August 6, 2020, 3:40 AM

The world is confused and frightened. COVID-19 infections are on the rise across the U.S. and around the world, even in countries that once thought they had contained the virus. The outlook for the next year is at best uncertain; countries are rushing to produce and distribute vaccines at breakneck speeds, some opting to bypass critical phase trials. Meanwhile, unemployment numbers remain dizzyingly high, even as the U.S. stock market continues to defy gravity. We're headed into a global depression—a period of economic misery that few living people have experienced.

We're not talking about Hoovervilles. Today the U.S. and most of the world have a sturdy middle class. We have social safety nets that didn't exist nine decades ago. Fortunately, that's true even for developing countries. Most governments today accept a deep economic interdependence among nations created by decades of

An ongoing campaign of terror against Christians has been waged across northern Africa in recent weeks, leaving several hundred Christians murdered in at least three African countries from South Sudan to Cameroon.

They're mainly being targeted by Islamic radicals from different groups, including the Boko Haram and Fulani militants.

In Nigeria last month alone, at least 121 people were killed and thousands forced to leave their homes in Christian villages located in

India's PM Narendra Modi has laid the foundation stone of a future Hindu shrine in the city of Ayodhya. The project became possible after a court sided with Hindus over Muslims about whose temple should be built there.

Modi told a gathering at Ayodhya, an ancient city in India's northern Uttar Pradesh State that the shrine "will keep inspiring the future generations," and its construction will serve as "an

## Judge Bans Indoor Services at Defiant California Church

A judge has temporarily banned indoor services at a California church that for weeks has defied virus health orders.

By Associated Press, Wire Service Content Aug. 7, 2020

**VENTURA, CALIF. (AP)** – A California church that for weeks has held indoor worship in defiance of anti-coronavirus health orders must close its doors, a judge ruled Friday.

A temporary restraining order was issued that bars Godspoke Calvary Chapel in Newbury Park from indoor worship services anywhere in the county.

"The court finds that there is an immediate threat to public health and safety due to the 2019 novel coronavirus," Ventura County Superior Court Judge Matthew Guasco wrote.

The order will be in place until another hearing is held on Aug. 21.

The county north of Los Angeles and its health officer sued the church after Pastor Rob McCoy repeatedly defied health orders designed to limit the spread of COVID-19.

Services for as many as 200 worshipers offered "singing, hugging, no masks," in McCoy's words.

The suit was filed last week, a day after the county Board of Supervisors authorized court actions to enforce the health orders.

The suit said permitting the church to keep holding indoor services could harm the public, "including hospitalizations and deaths."

"On a scale of one to 10 of the most immediate irreparable harm possible, this is a 10," Guasco said at the hearing. "It doesn't get much more immediate or irreparable than the threat that a lot of people are going to spread a contagious and deadly disease."

A message left at the church seeking comment from McCoy wasn't immediately returned.
