اكرر هدفي فقط من هذه الخدمة أن نذكر بعضنا باننا نحتاج ان نستعد أي حياة اليقظة الروحية.  
والاستعداد ليس فقط قبل مجيء المسيح بل ايضا قبل الظلمة التي ستسبق مجيؤه لأننا نور العالم  
الذي أصبح مظلّم وليكون عندنا زيت في مصابيحنا يكفي ان نعبر هذه الظلمة وتكون مصابيحنا  
مضيئة وقت مجيؤه او من منا سيسلم وديعته في أي وقت. بمعنى نحتاج من الان ان نستعد بقوة  
بأيمان عامل بالمحبة والتبشير وبتنقية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحنا لان  
الظلمة والضيقة اقتربت جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة لان  
وقتها تجميع زيت سيكون صعب جدا بل أستطيع ان أقول من مثل العذاري انه لن يكون هناك  
زيت الا ما جمعته سابقا.

أفضل ان اقول لنفسي ولكم استعدوا الان لأنه اقرب فنكون مستعدين سواء جاء او نحن ان  
سلمنا وديعتنا عن أنى لا اقول انه اقرب لكيلا يقال عني كاذب وانشرا اشاعات او اخيف البعض  
ولكنه يأتي بسرعة بغته. لا اعتقد اي أحد ندم لأنه كان مستعد ومنتظر مجيء المسيح ولم يأتي  
المسيح في زمنه ولكنه انتقل وهو مستعد ولكن كثيرين جدا ندموا على عدم الاستعداد عندما  
انتقلوا

المسيح قال بعض العلامات مثل

انجيل لوقا 21

21: 10 ثم قال لهم تقوم امة على امة ومملكة على مملكة

21: 11 وتكون زلازل عظيمة في اماكن ومجاعات واوبئة وتكون مخاوف وعلامات عظيمة من

السماء

21: 25 وتكون علامات في الشمس والقمر والنجوم وعلى الارض كرب امم بحيرة البحر والامواج

تضج

21: 26 والناس يغطى عليهم من خوف وانتظار ما يأتي على المسكونة لان قوات السماوات

تتزعزع

21: 27 وحينئذ يبصرون ابن الانسان اتيا في سحابة بقوة و مجد كثير

## سفر اعمال الرسل 2

2: 19 واعطي عجائب في السماء من فوق وآيات على الارض من أسفل دما ونارا وبخار دخان

2: 20 تتحول الشمس الى ظلمة والقمر الى دم قبل ان يجيء يوم الرب العظيم الشهير

2: 21 ويكون كل من يدعو باسم الرب يخلص

لماذا قال المسيح بعض العلامات؟

أولا لكيلا نرتاع

انجيل متى 24

مت 24: 6 وسوف تسمعون بحروب واخبار حروب **لا ترتاعوا** لأنه لا بد ان تكون هذه

كلها ولكن ليس المنتهى بعد

ثانيا لنؤمن

إنجيل يوحنا 14: 29

وَقُلْتُ لَكُمْ الْآنَ قَبْلَ أَنْ يَكُونَ، حَتَّى مَتَى كَأَن تُوْمِنُونَ.

ثالثا لنتنبه ونستعد

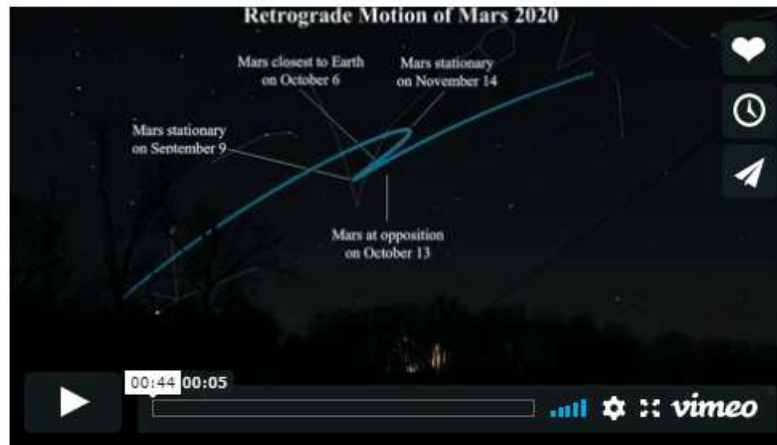

28 وَمَتَى ابْتَدَأَتْ هَذِهِ تَكُونُ، فَأَنْصِبُوا وَارْفَعُوا رُؤُوسَكُمْ لِأَنَّ نَجَاتَكُمْ تَقْتَرِبُ.».

**RETROGRADE MARS:** For months, astronomers have been watching Mars creep eastward among the stars of Pisces. Yesterday, Sept. 9th, Mars reversed course. Now the planet is moving westward. Astronomers call this "[retrograde motion](#)." It's a sign that Earth and Mars are about to have a close encounter.

The video, above, created by graphic artist [Larry Koehn](#), shows why Mars "goes retrograde." Basically, Earth is lapping Mars in a two-way race around the sun. Our planet is faster, so Mars seems to go backwards during the weeks of closest approach.

On **Oct. 6th**, Earth and Mars will be only 62 million km apart--a small distance by interplanetary standards. In fact, its [one of the finest](#) close encounters in years. Mars will be up all night long, outshining every star in the sky with a piercing burnt-orange hue.

Mars is already a lovely sight. It is now shining almost twice as brightly as Sirius, the brightest star in the sky, and its disk has swollen so large that even backyard telescopes reveal astonishing details:

## Phosphine gas in the cloud decks of Venus

### Abstract

Measurements of trace gases in planetary atmospheres help us explore chemical conditions different to those on Earth. Our nearest neighbour, Venus, has cloud decks that are temperate but hyperacidic. Here we report the apparent presence of phosphine ( $\text{PH}_3$ ) gas in Venus's atmosphere, where any phosphorus should be in oxidized forms. Single-line millimetre-waveband spectral detections (quality up to  $\sim 15\sigma$ ) from the JCMT and ALMA telescopes have no other plausible identification. Atmospheric  $\text{PH}_3$  at  $\sim 20$  ppb abundance is inferred. The presence of  $\text{PH}_3$  is unexplained after exhaustive study of steady-state chemistry and photochemical pathways, with no currently known abiotic production routes in Venus's atmosphere, clouds, surface and subsurface, or from lightning, volcanic or meteoritic delivery.  $\text{PH}_3$  could originate from unknown photochemistry or geochemistry, or, by analogy with biological production of  $\text{PH}_3$  on Earth, from the presence of life. Other  $\text{PH}_3$  spectral features should be sought, while in situ cloud and surface sampling could examine sources of this gas.

**GREEN CLOUDS OVER SWEDEN:** Last night, auroras unexpectedly exploded over Abisko, Sweden. "It was a great display," says Chad Blakley of local tour guide service [Lights Over Lapland](#). "But it wasn't the auroras that caught our eye." It was the clouds:

They turned green. Eye-witness Bjorn Vardling of Abisko says "I've been working here for 2 years, and this is the first time I've seen auroras so intense that the clouds themselves were green. It was amazing!" The same phenomenon was sighted [in northern Norway](#).

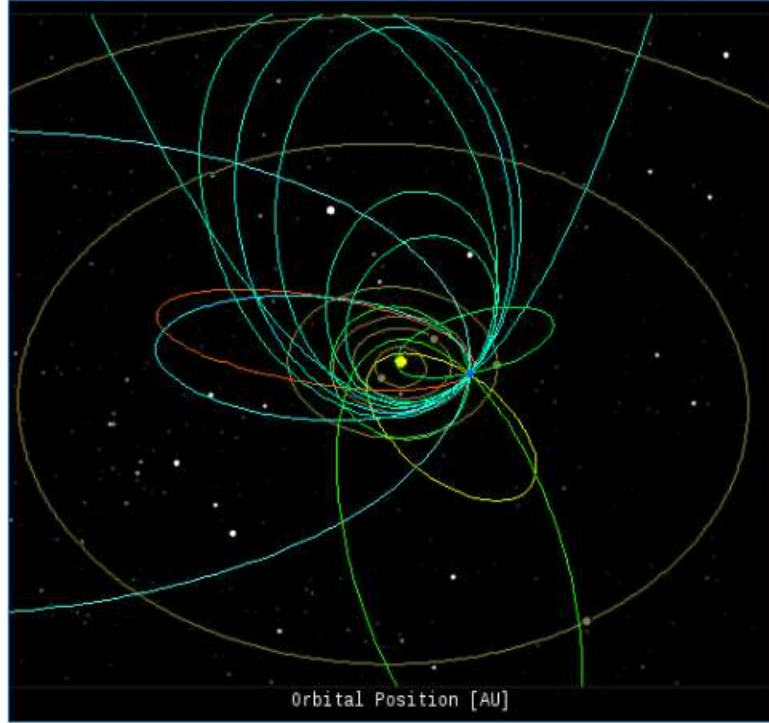

What happened? [A crack](#) opened in Earth's magnetic field. Solar wind poured in to fuel the display. Such cracks form often during weeks around equinoxes—a phenomenon known as the "[Russell-McPherron effect](#)." With the autumnal equinox only 1 week away, more green clouds are in the offing. [Stay tuned](#).

At least 50 people are presumed dead after an artisanal gold mine collapsed near Kamituga in the Democratic Republic of Congo. The mine was the second such facility to collapse in a week.

The mine collapsed on Friday afternoon following heavy rain, a local mining NGO told Reuters. Kamituga is located in the mineral-rich Maniema Province, one of the country's most important gold mining regions.

## DEVELOPING: Nearly 100 earthquakes rattle Yellowstone in 24 hours.

Sep 12, 2020 | 0 |

(ETH) – Yellowstone, the home of the killer supervolcano is experiencing an ongoing swarm of 91 earthquakes that have rattled the Yellowstone National Park region in just a span of 24 hours on Thursday.

The USGS stated that the quakes struck southwest of Yellowstone Lake between Heart Lake and West Thumb. According to the report, this particular area is one of the most seismically active regions in the U.S., but this cluster of quakes "is considered to be on the large side in terms of quantity and magnitude, but stress that they are nowhere near the largest."

Marine Fisheries found nearly 5,000 dead fish off of Bullocks Cove and Allen's Cove on Friday, the Department of Environmental Management said.

The DEM responded to a report of two fish kills in West Barrington and across the bay in Warwick Friday morning.

The fish covered about a 50-yard stretch of the beach, according to DEM Chief Public Affairs Officer Michael Healey.

Healey said although they have not determined an official cause yet, they believe the deaths relate to low levels of dissolved oxygen (DO) in the bay due to the heatwave.

# Six bottlenose whales die after mass stranding on Donegal beach

The northern bottlenose whales were found stranded earlier today.

AT LEAST SIX whales that were stranded on a beach in Donegal today have died, with all of the whales expected to be dead by morning.

A group of northern bottlenose whales were found stranded at Rosnowlagh beach in Donegal earlier today, around 19km north of Bundoran.

Three whales were stranded on the beach, with at least another four identified as stranded in the shallow water of the bay.

The Irish Whale and Dolphin Group (IWDG) has been providing first aid to the whales on the beach, but most of them have died.

Speaking to *TheJournal.ie*, a spokesperson for IWDG said that "there was one alive who did swim out, but it's most likely going to restrand".

"I would say by the morning they will all be dead, which is expected. These are an offshore species," he said.

The IWDG still has team members on the shore, but as the tide comes in, there is little they can do for the whales.

"We're all meeting in the morning up in Rosnowlagh with the Council and the Wildlife Service where they will be recovered by Donegal County Council."

Researchers will use samples from whales to learn more about the species, which are rarely seen in Ireland.

## Abstract

## Objectives

Initial reports indicate adequate performance of some serology-based severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) assays. However, additional studies are required to facilitate interpretation of results, including how antibody levels impact immunity and disease course.

## Methods

A total of 967 subjects were tested for IgG antibodies reactive to SARS-CoV-2, including 172 suspected cases of SARS-CoV-2, 656 plasma samples from healthy donors, 49 sera from patients with rheumatic disease, and 90 specimens from individuals positive for polymerase chain reaction (PCR)-based respiratory viral panel. A subgroup of SARS-CoV-2 PCR-positive cases was tested for IgM antibodies by proteome array method.

## Results

All specificity and cross-reactivity specimens were negative for SARS-CoV-2 IgG antibodies (0/795, 0%). Positive

# Russia to stage huge 'Caucasus' drills in September

by Staff Writers  
Moscow (AFP) Sept 11, 2020

Russia said on Friday it would stage massive military drills in the Caucasus in late September with troops from countries including China, Iran and Pakistan invited to participate.

More than 12,000 troops will take part in the "Caucasus-2020" war games, which will take place in southern Russia from September 21 to 26 and include land and naval exercises, Deputy Defence Minister Alexander Fomin told a briefing.

"The Caucasus-2020 drills are not aimed against other countries," the defence ministry said in a statement.

China, Iran, Pakistan and Myanmar have been invited to take part in the drills, along with ex-Soviet Armenia, Azerbaijan and Belarus, the defence ministry said.

Up to 250 tanks and around 450 infantry combat vehicles and armoured personnel carriers will take part in the drills that will involve 80,000 people including support staff, the statement said.

Russia regularly holds large-scale drills -- two months ago President Vladimir Putin ordered 150,000 personnel to take part in war games in the country's southwest.

The drills often involve allied countries, one of the biggest in recent years coming with China in 2018.

# China says US biggest threat to peace in South China Sea

by Staff Writers  
Beijing (AFP) Sept 10, 2020

China accused the US of becoming "the biggest driver of militarization" in the contested South China Sea, as tensions between Washington and Beijing look set to swamp a regional Asian summit.

US-China rivalry is expected to dominate discussion at this year's ASEAN conference, which comes just days after Beijing launched ballistic missiles in the flashpoint waters as part of live-fire exercises.

Beijing claims the majority of the resource-rich South China Sea, invoking its so-called nine-dash line to justify its alleged historic rights to the key trade waterway, also contested by Vietnam, the Philippines, Malaysia, Brunei and Taiwan.

As tensions simmer, Chinese Foreign Minister Wang Yi told an online meeting of foreign ministers from Southeast Asian countries that "the United States is becoming the biggest driver of militarization of the South China Sea."

Wang said that China's greatest interest in the waters was "peace and stability", while accusing the US of "creating tension and seeking profit from it".

"The United States is becoming the most dangerous factor damaging peace in the South China Sea," Wang added, according to state news agency Xinhua on Thursday.

China has reinforced its claim to the South China Sea by building up small shoals and reefs into military bases with airstrips and port facilities.

It rejected a 2016 UN-backed tribunal's ruling that its claims were without legal basis.

# China says forced to take 'countermeasures' against India at tense border

by Staff Writers  
Beijing (AFP) Sept 8, 2020

China on Tuesday said its troops were forced to take "countermeasures" after Indian soldiers crossed their tense Himalayan border and opened fire.

The relationship between the two nuclear-armed neighbours has deteriorated since a clash in the Ladakh region on June 15 in which 20 Indian troops were killed.

Beijing's defence ministry accused India of "severe military provocation" after soldiers crossed the Line of Actual Control in the western border region Monday and "opened fire to threaten the Chinese border defence patrol officers".

"The Chinese border defence troops were forced to take corresponding countermeasures to stabilise the terrain situation," said Zhang Shuili, spokesperson for the Western Theater Command of the People's Liberation Army (PLA).

Zhang said India had violated agreements reached by the two countries and warned their actions could "easily cause misunderstandings and misjudgments".

He called for India to withdraw the troops who crossed the border and investigate the officers who opened fire.

# Pompeo urges Southeast Asia to shun South China Sea firms

by Staff Writers  
Hanoi (AFP) Sept 10, 2020

Washington's top diplomat urged Southeast Asia on Thursday to cut ties with Chinese companies helping build islands in the South China Sea, weeks after the US blacklisted two dozen firms working in the disputed waters.

Secretary of State Mike Pompeo's comments came at a regional Asian summit overshadowed by the US-China rivalry over a range of issues, from trade to the coronavirus.

Tensions are also simmering over the South China Sea, with the US last month sanctioning 24 Chinese state-owned companies it said had helped Beijing's military buildup in the resource-rich waterway.

Pompeo said it was time for Southeast Asian governments to reconsider their own relationship with firms working in the sea.

"Don't just speak up, but act," he told the 10 foreign ministers of the Association of Southeast Asian Nations (ASEAN) during an online summit.

"Reconsider business dealings with the very state-owned companies that bully ASEAN coastal states in the South China Sea.

"Don't let the Chinese Communist party walk over us and our people."

This year's ASEAN summit comes days after Beijing launched ballistic missiles in the South China Sea as part of live-fire exercises.

# Japan's Abe urges stronger defences to face missiles

by Staff Writers  
Tokyo (AFP) Sept 11, 2020

Japan must strengthen its ballistic missile defences, Prime Minister Shinzo Abe said Friday, a potentially controversial proposition given the country's pacifist constitution, which limits its military capabilities.

Abe made the call despite being in the final days of his tenure, after deciding to resign for health reasons -- a sign, analysts said, of the importance he attaches to the issue.

In a statement he warned that the country's security environment is becoming more testing, citing the ballistic missile threat posed by North Korea, and questioned whether Japan could protect itself sufficiently with interception systems alone.

"I believe it is necessary to enhance deterrence and thereby further reduce the possibility of an attack against Japan by ballistic missiles and others," Abe said.

In order to discourage such attacks, his government had considered a new missile policy.

Abe insisted that the discussions were within the "scope of the constitution and in compliance with international law.

"Japan's exclusively defence-oriented policy will not change at all," he said.

But the possibility of Japan acquiring a strike capacity, even if couched in terms of deterrence and defence, is controversial.

A massive fire has engulfed Beirut's port facilities shortly after a bang was reportedly heard in the area. The incident is said to have caused panic in the city, still reeling from the port blast that killed 190 a month ago.

The fire apparently began earlier on Thursday, with social media users flooding their pages with footage of flames rising up in the devastated port area. Some publications suggested that the bang was heard before the blaze.

As locals wondered what could have caused the blaze, a Reuters source in the Lebanese

# 'Drone Swarm' Invaded Palo Verde Nuclear Power Plant Last September — Twice

David Hambling Contributor @

Aerospace & Defense

*I'm a South London-based technology journalist, consultant and author*

Documents gained under the Freedom of Information Act show how a number of small drones flew around a restricted area at Palo Verde Nuclear Power Plant on two successive nights last September. Security forces watched, but were apparently helpless to act as the drones carried out their incursions before disappearing into the night. Details of the event gives some clues as to just what they were doing, but who sent them remains a mystery.

Details of the events were obtained from the Nuclear Regulatory Commission by Douglas D. Johnson on behalf of the Scientific Coalition for UAP Studies (SCU) using the Freedom of Information Act (FOIA). The SCU's main

## Review: In Ground Breaking French Film "A Good Man" Noemie Merlant Is Stunning As a Trans Man Who Gives Birth

■ Movies

I'm the first to tell you I am out of my depth writing about trans anything, gender fluid issues. I'm respectful of all the different aspects, but it's not an area of expertise.

Last night I clicked on a film called "A Good Man" on the TIFF Digital press site. I thought it was a new Anthony Hopkins film because of a press release I'd received several times concerning Sir Anthony and the word "Good" in the title.

What I got was a French film that seemed to be about a young, attractive heterosexual couple in Provence. He was a doctor, she was a teacher. They'd moved to a house by the seaside, they told his brother on a visit, because it was easier than living in the city of Aix in Provence. (I thought, really? I'd love to live in Aix.)
