هدف هذه الخدمة

اكرر هدفي فقط من هذه الخدمة أن نذكر بعضنا باننا نحتاج ان نستعد أي حياة اليقظة الروحية. والاستعداد ليس فقط قبل مجيء المسيح بل ايضا قبل الظلمة التي ستسبق مجيؤه لأننا نور العالم الذي أصبح مظلم وليكون عندنا زيت في مصابيحنا يكفي ان نعبر هذه الظلمة وتكون مصابيحنا مضيئة وقت مجيؤه او من منا سيسلم وديعته في أي وقت. بمعنى نحتاج من الان ان نستعد بقوة بأيمان عامل بالمحبة والتبشير وبتنقية القلب وان نثمر بالخدمة أي نجمع زيت في مصابيحنا لان الظلمة والضيقة اقتربت جدا ومن لن يستعد لها بزيت كافي من الان لن يجد زيت في الضيقة لان وقتها تجميع زيت سيكون صعب جدا بل أستطيع ان أقول من مثل العذارى انه لن يكون هناك زيت الا ما جمعته سابقا.

أفضل ان اقول لنفسي ولكم استعدوا الان لأنه اقترب فنكون مستعدين سواء جاء او نحن ان سلمنا وديعتنا عن أنى لا اقول انه اقترب لكيلا يقال عني كاذب وانشر اشاعات او اخيف البعض ولكنه يأتي بسرعة بغته. لا اعتقد اي أحد ندم لأنه كان مستعد ومنتظر مجيء المسيح ولم يأتي المسيح في زمنه ولكنه انتقل وهو مستعد ولكن كثيرين جدا ندموا على عدم الاستعداد عندما انتقلوا

السيد المسيح قال بعض العلامات مثل

انجيل لوقا أصحاح 21

10 ثُمَّ قَالَ لَهُمْ: «تَقُومُ أُمَّةٌ عَلَى أُمَّةٍ وَمَمْلَكَةٌ

WILL MEGACONSTELLATIONS DAMAGE EARTH'S MAGNETIC FIELD?

Something unprecedented is happening in Earth orbit. In only a few short years, the satellite population has skyrocketed, more than doubling since 2020. In the past year alone, more satellites have been launched than during the first thirty years of the Space Age. Much of this activity is driven by SpaceX and its growing megaconstellation of Starlink internet satellites.

Environmentalists have raised many concerns about Starlink including [light-pollution](#) of the night sky, a potentially hazardous [traffic jam](#) in low-Earth orbit, and even [ozone depletion](#). Copycat mega-constellations by other companies and countries will only multiply these concerns.

Now there's a new reason to worry. According to [a new study](#) by Sierra Solter, megaconstellations could alter and weaken Earth's magnetic field.

في الفترة الأخيرة كمية الستلايت تضاعفت جدا حول الأرض وهذا بالإضافة الى تسببها في تاكل الأوزون الطبقة الحامية أيضا تتسبب في تضعف اكثر المجال المغناطيسي وهذا كارثة حقيقية

Potential Perturbation of the Ionosphere by Megaconstellations and Corresponding Artificial Re-entry Plasma Dust

S. Solter-Hunt

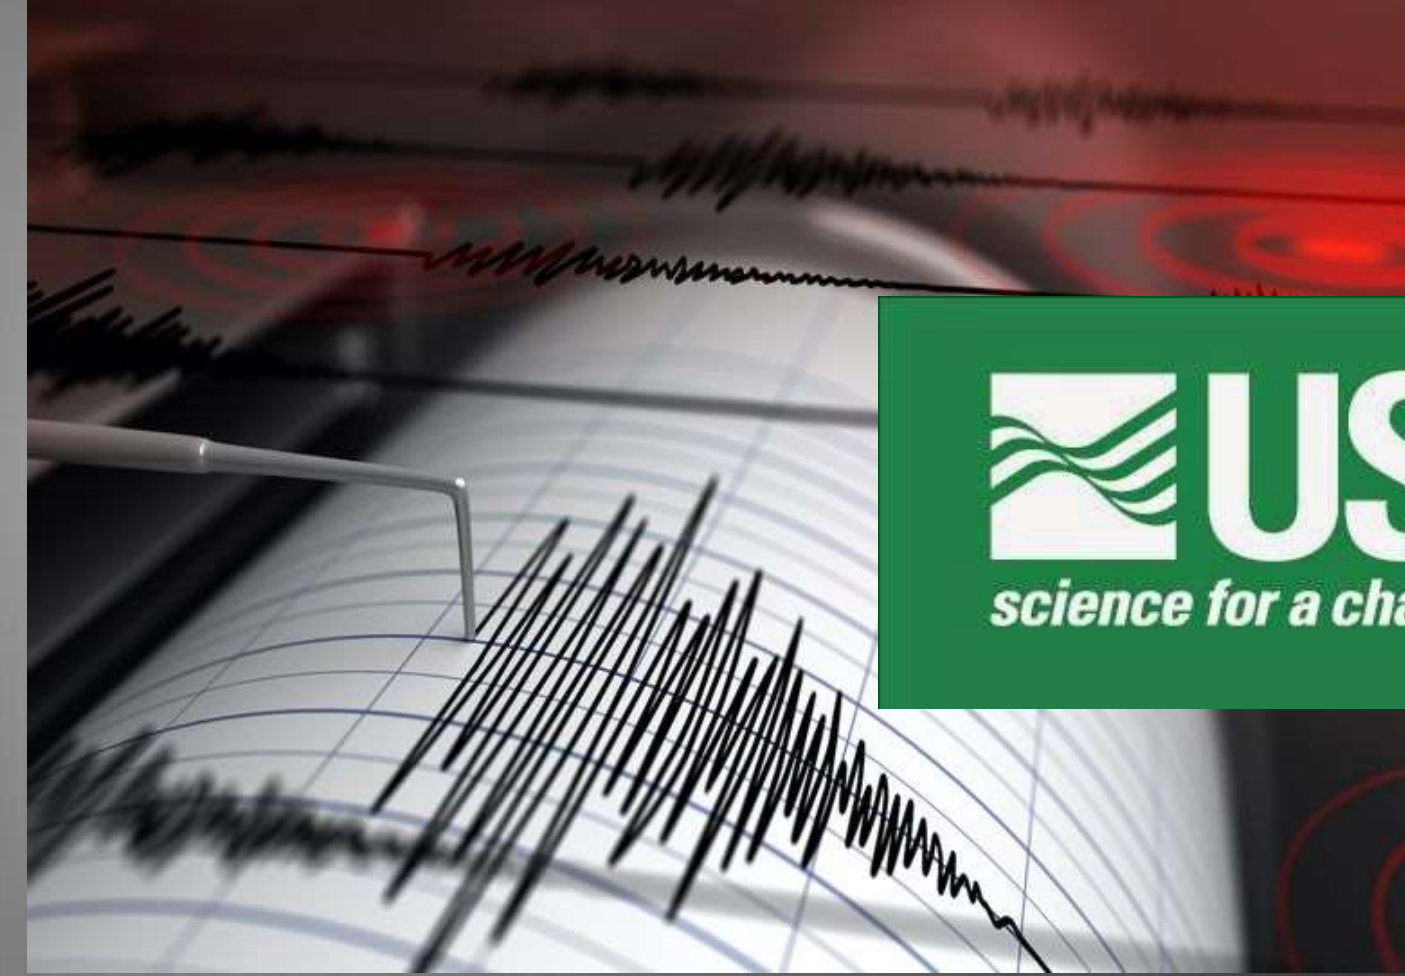

[Download PDF](#)[HTML \(experimental\)](#)

500,000 to 1 million satellites are expected in the next decades, primarily to build internet constellations called megaconstellations. These megaconstellations are disposable and will constantly re-enter and be replaced, hence creating a layer of conductive particulate. Here it will be shown that the mass of the conductive particles left behind from worldwide distribution of re-entry satellites is already billions of times greater than the mass of the Van Allen Belts. From a preliminary analysis, the Debye length in spaceflight regions is significantly higher than non-spaceflight regions according to CCMC ionosphere data. As the megaconstellations grow, the Debye length of the satellite particulate may exceed that of the cislunar environment and create a conductive layer around the earth worldwide. Thus, satellite reentries may create a global band of plasma dust with a charge higher than the rest of the magnetosphere. Therefore, perturbation of the magnetosphere from conductive satellites and their plasma dust layer should be expected and should be a field of intensive research. Human activity is not only impacting the atmosphere, it is clearly impacting the ionosphere.

Excess mortality in England

Introduction

Monitoring excess mortality provides understanding of the impact of COVID-19 during the course of the pandemic and beyond. Excess mortality in this report is defined as the number of deaths from 21 March 2020 above the number expected had the pandemic not occurred, based on mortality rates in earlier years.

For this report, expected numbers of deaths are modelled using five years' data (2015-2019) to estimate the number of deaths we would expect each week from 21 March 2020 onwards. Excess deaths are estimated by week and in total from 21 March 2020 onwards, based on the date each death was registered. Excess deaths are presented by age, sex, deprivation group, ethnic group, region, upper tier local authority, cause of death and place of death. For details see the [methodology document](#) or take a look at [the code](#).

The data in this report are [Experimental Statistics](#) and are derived from provisional death registration data.

Presentation

Weekly view

The upper chart presents the weekly excess (ie the number of deaths that occurred minus the number expected that week if there had been no pandemic). For most breakdowns, the lower chart presents total registered deaths each week, broken down by whether or not COVID-19 is mentioned on the death certificate.

The cause of death weekly chart is slightly different. Each analysis includes all deaths with a mention of the selected cause anywhere on the death certificate. The lower chart shows counts of these deaths each week, broken down by underlying cause. This shows how many deaths in people with these conditions were caused primarily by COVID-19 and how many were caused primarily by the selected cause itself. The purple dashed line indicates the expected number of deaths each week with a mention of the selected cause.

The time range covered by the charts can be restricted by selecting a start date and end date, and the data can be filtered to show the time series for each subgroup in turn.

Cumulative view

The upper left chart shows numbers excess deaths, extending to the right on the chart – cases where there have been fewer deaths than expected are indicated by bars extending to the left. The upper right chart shows the same data as ratios (observed divided by expected rather than observed minus expected).

Ratios allow comparisons between groups of different sizes and different background levels of risk. It is important to note that the ratios are relative to the expected number of deaths for that specific group. For example, the ratio for the Asian group is the ratio between deaths in this group registered in the whole period selected and the estimate of expected deaths for that period in the Asian group based on the preceding 5 years. It is not the ratio between the Asian group and all ethnic groups combined.

The lower left chart shows the total registered deaths in the period selected, broken down by whether or not COVID-19 was mentioned on the death certificate. The time range covered by the charts and table can be restricted by selecting a start and end date, and the data can be filtered to show the breakdowns for different population subgroups.

Data download

The data presented in all the charts and tables can be downloaded as an ods file by selecting the Data download link at the bottom of the main menu on the left.

How to use this tool

[Here](#) is a short video on how to navigate this tool.

Interpretation

Although every effort has been made to estimate the expected deaths as robustly as possible, mortality rates do vary considerably from year to year and we have no way of knowing what would have happened, had the pandemic not occurred. Excess deaths are based on the assumption of an 'average' year, given the trends in death rates and demographic change.

The charts which show counts demonstrate the scale of different groups. The ratio charts allow comparisons between groups. Because each breakdown (apart from the UTLA, cause of death and place of death analyses) is taken from the same predictive model, each one presents results that account for the other factors. For example, comparisons between ethnic group take account of differences in age distribution between ethnic groups.

Deprivation is based on the area people live - variation between individuals within these small areas is not accounted for. Every effort has been made to attribute ethnic groups accurately, but any inconsistencies in recording practice could affect the analysis.

Prediction intervals are not currently shown on the charts, but where the numbers of deaths are small, it is likely that differences between groups could have arisen by chance.

Update schedule

The data in the report and data download will update at 09:30 on the second Thursday of the month – except where bank holidays feature then it will be the second Friday of the month.

Abstract

Our understanding of COVID-19 vaccinations and their impact on health and mortality has evolved substantially since the first vaccine rollouts. Published reports from the original randomized phase 3 trials concluded that the COVID-19 mRNA vaccines could greatly reduce COVID-19 symptoms. In the interim, problems with the methods, execution, and reporting of these pivotal trials have emerged. Re-analysis of the Pfizer trial data identified statistically significant increases in serious adverse events (SAEs) in the vaccine group. Numerous SAEs were identified following the Emergency Use Authorization (EUA), including death, cancer, cardiac events, and various autoimmune, hematological, reproductive, and neurological disorders. Furthermore, these products never underwent adequate safety and toxicological testing in accordance with previously established scientific standards. Among the other major topics addressed in this narrative review are the published analyses of serious harms to humans, quality control issues and process-related impurities, mechanisms underlying adverse events (AEs), the immunologic basis for vaccine inefficacy, and concerning mortality trends based on the registrational

Biden Warned of Nuclear Threat Amid Pressure to Launch Strikes on Iran | Live With Josh

Views 36.3K • Jan-30-2024

President Joe Biden is suggesting the United States will launch military counterattacks after three U.S. troops were killed and more than 30 were injured from a drone attack in Jordan. Some Republicans are supporting the idea of broadening the war in the region, with some even urging President Biden to strike Iran. And as this h...

Russia and China warn against 'cycle of retaliation' as Biden threatens to target their ally Iran after drone attack killed three US soldiers

- The United States has vowed to respond to a drone attack on its base in Jordan
- But Beijing and Moscow have both urged Biden to show restraint as he reportedly plots which targets to strike in retaliation against Iran and its proxies

Russia and **China** have rushed to the defence of their ally **Iran** and urged the United States to show restraint in its response to the killing of three American soldiers.

The United States has vowed to respond to a drone attack on a base in Jordan that claimed the lives of three American soldiers, raising fears of an escalating Middle East conflict.

Iran-backed militants have been blamed for the strike on the Tower 22 base, leading to calls at home for US president **Joe Biden** to respond robustly and with force.

But in an apparent bid to temper America's expected retaliation against their Iranian ally, both Russia and China have today called for a de-escalation in the region.

Time Trend of the Arctic Sea Ice Extent

Since 2007 no significant decline has been observed

Allan Astrup Jensen

Nordic Institute of Product Sustainability, Environmental Chemistry and Toxicology, Denmark

Abstract

The NSIDC website, IPCC's reports and some scientific papers have announced that the Arctic Sea ice extent, when it is lowest in September month, in recent years has declined dramatically, and in few decades the sea ice is supposed to disappear completely in the summer. In that way new and shorter ships routes will open up north of the continents.

The facts are, that the Arctic Sea ice extent measured by satellites since 1978 expresses annual variations and it has declined considerably from 1997 to 2007. However, before that time period, from 1978 to 1996, the downward trend was minimal, and in the last 17 years from 2007 to 2023 the downward trend has also been about zero. Therefore, there is no indication that we should expect the Arctic Sea summer ice to disappear completely, as predicted, in one or two decades.

Regarding the extent of the summer (February) sea ice at the Antarctic, the downward trend during the years 1979-2021 was very small but in 2022 and 2023 a considerable decline was observed, and a decline was also clearly observed for the whole period of 2007- 2023. That was in contradiction to what happened in the Arctic. The pattern of the annual levels was not the same for the Arctic and Antarctic, indicating different drivers in the North and the South.

These data show that there is no apparent correlation between the variable extent of the Arctic and the Antarctic Sea ice and the gradually increasing CO₂-concentrations in the atmosphere as proposed by NSIDC, IPCC and others, also for these areas of cold climate.

LAHORE, Pakistan (Christian Daily International-Morning Star News) – Police intimidation and lax investigations into Islamist rioting that destroyed scores of Christian homes and businesses in Jaranwala, Pakistan in August has dampened hopes of justice for the victims, sources said.

Police harassment of complainants and witnesses, officers deliberately arresting innocent bystanders instead of known assailants, and Christian leaders' failure to ensure proper investigation and legal cases has resulted in most suspects walking free on bail,

JUBA, South Sudan (Morning Star News) – Militants from the paramilitary Rapid Support Forces (RSF) killed one Christian on Saturday (Jan. 20) and beat another unconscious on Monday (Jan. 22) in Omdurman, Sudan, sources said.

The RSF militants, which have been fighting the Sudan Armed Forces (SAF) since April 15, shot dead Hidar Al Amin at his home in the Umbda area of Omdurman, across the Nile from Khartoum, a relative said.

The Muslim militants insulted Al Amin, a member of the Sudanese Presbyterian Evangelical Church in his 30s, for being a Christian, he said. They looted his property and left him in a pool of blood.

“He was killed by the RSF after they stole all that he had,” the relative said in a text message to Morning Star News.

ABUJA, Nigeria (Christian Daily International-Morning Star News) – Recent Muslim extremist attacks in an area of central Nigeria resulted in dozens of deaths and the closure of 10 Baptist churches, including one now used as a mosque, a denominational leader said.

The attacks in Plateau state's Mangu County by Fulani herdsmen and other terrorists included an assault on one village that killed 24 Christians, said Plateau Baptist Conference President Koeleh Kelvin Saleh. The raids drove 500 church members from 10 villages and resulted in the closure of a Baptist church in each community, he said.

On January 23 I [posted](#) on X, "Five days ago @MattWalshBlog wrote, 'This is now the fourth article in a major media publication in the span of one week pushing 'polyamory.'" Today, the @WSJ noted that 'polyamory is having a moment.' Perhaps this article that I wrote in 2012, [called](#), 'The Next Sexual Revolution Has Arrived,' focusing on polyamory, deserves another read?"

That same day, I noticed an article written by Dennis Prager [titled](#), "19 Years Ago, the Los Angeles Times

Published a Column on Antisemitism on American Campuses."

Prager noted that, "I recently came across is a column titled 'When Young Jews Major in Antisemitism,' published in 2005 in the Los Angeles Times. When I looked to see who wrote the column, I saw — to my surprise — that I did. I did not recall writing the piece. But it is very much worth reading today."

He then reproduced his article in full, which gave serious pause for reflection.

A **Montana** mom and dad who lost custody of their daughter after they refused to transition her gender have told DailyMail.com the ordeal 'has torn their family apart.'

Krista Kolstad revealed the family's nightmare began when they received a call that their 14-year-old daughter Jennifer told friends at school that she wanted to commit suicide in August 2023.

Later that night, Child Protective Services (CPS) went to the Kolstad's home in **Glasgow** to inspect the house and interview Jennifer, later determining that she needed to transition to get better.

رسالة بولس الرسول الي أهل رومية 13

11: 13 هذا وأنكم عارفون الوقت انها الان ساعة لنستيقظ من النوم فان خلاصنا الان أقرب مما كان حين امنا

12: 13 قد تنهى الليل وتقارب النهار فلنخلع اعمال الظلمة ونلبس اسلحة النور

13: 13 لنسلك بلباقة كما في النهار لا بالبطر والسكر لا بالمضاجع والعهر لا بالخصام والحسد

14: 13 بل البسوا الرب يسوع المسيح ولا تصنعوا تدبيراً للجسد لأجل الشهوات

احترس ان لم تتمسك بالمسيح من الان قد لا تستطيع في المستقبل القريب بسبب الظلام.

وكما قلت هو اخبرنا

لكني لا نخاف

وَلَكِنْ وَإِنْ تَأْتِيَكُمْ مِنَ الْبُرِّ،
فَطُوبَىٰ لَكُمْ. وَأَمَّا خَوْفُهُمْ فَلَا تَخَافُوهُ وَلَا
تَضْطَرِبُوا..... (1 بطرس 3 : 4)

2 بِلِ نُوْمِن

قُلْتُ لَكُمْ الْآنَ قَبْلَ أَنْ يَكُونَ،
حَتَّى مَتَى كَأَن تُوْمِنُونَ....

(يوحنا 14 : 29)

لِنُنْتَبِهَ وَنَسْتَعِدَّ

وَمَتَى ابْتَدَأَتْ هَذِهِ تَكُونُ، فَانْتَصِبُوا

وَارْفَعُوا رُؤُوسَكُمْ لِأَنَّ نَجَاتَكُمْ تَقْتَرِبُ

لوقا 21 : 28

افرحوا لان عريسنا قد اقترب مجيؤه.
وانتبهوا الشيطان يريد أن نفقد سلامنا ولا ننال أكاليل.
وأیضا استعدوا فقد تسلموا وديعتكم في أي وقت فهناك 150 ألف شخص يموتوا
في اليوم الواحد انت لا تعرف متى ستكون منهم
المسيح اقترب فاصنعوا ثمار تليق بالتوبة واستعدوا لاستقبال العريس

والمجد لله دائماً
